Rams Glen Inc: Warranty is for one year against all factory defects. Quarizz[®] is a cement type material and will last years with proper care. Tables should be cleaned with soap and water daily. Night residue can build up if let go. **NEVER** use abrasive cleansers on your table tops. If necessary, use a Citrus type cleaner (Orange Cleaner) and brush lightly with a soft bristle brush. Be sure to rinse off cleaner residue with clean water. Do not set busing trays on table tops. Do not bang tops together or on the walls. Touch up kits are available from the factory. Bases need to be rinsed off monthly with soap and water. Do not turn tables upside down on each other, as water will collect in base and between table tops. Proper care is important for longer lasting good looks.
