BIO

Dr. Thomas Bock is a seasoned Operations Research Analyst and Military Analyst with over 20 years of experience in enhancing processes for commercial and government clients. Holding a Ph.D. in Engineering Management from Old Dominion University, he has excelled in roles at prestigious organizations like American Systems and CACI, where he streamlined operations and drove digital transformation initiatives. Dr. Bock's expertise spans data architecture, modeling and simulation, and systems integration, enabling him to lead successful projects such as the migration of legacy systems for the Naval Safety Center at Nakupuna Solutions. His contributions extend beyond the workplace, with numerous publications and presentations that showcase his commitment to advancing the field of operations research and military analysis. Driven by a passion for innovation and excellence, Dr. Bock continues to be a respected leader and subject matter expert in his field.
