

Create A Happier, Healthier Workplace With B&P Micro Markets

What is a Micro Market?

Micro-Markets are small, self-contained convenience stores in an employee lunchroom or breakroom. Each market offers hundreds of choices to employees including fresh food, delicious meals, fruit, snacks and drinks. Employees pay for their purchases at a self-service kiosk with credit, debit, cash loaded on a Market Card,

Apple Pay, or even their fingerprint!

Employees love the variety of fresh food options, and employers love that they are able to provide a valued benefit to their employees, **at no cost to the organization.**

"All we had to do was provide power, an internet connection, and a space for the market. B&P did the rest."

More reasons to have a B&P Market

- 1 Health and Wellness
- 2 Improved Morale
- 3 Eliminates Service Calls
- 4 Security/No Risk

Variety, convenience, and
healthy foods...
all at no cost to your
organization!

Health & Wellness

In addition to being extremely convenient, micro markets are instrumental in helping your employees live healthier lifestyles.

- Markets provide shelves and coolers full of healthy options.
- Employees can browse the market and read labels - before they buy - to help them make the best choices.

Improved Morale

Many satisfied customers have told us that the best reason for installing a B&P Market is the morale boost - employees love it!

- Employees are more productive.
- No need to go out for lunch
- employees stay on site to enjoy the market and hang out with co-workers.

Better Service

No more products stuck in a vending machine, or having to call for a refund. Having a B&P Market virtually eliminates services calls and maintenance issues.

No Risk!

Every B&P Market comes equipped with surveillance cameras and security equipment to watch over the market and keep theft to a minimum. Best of all, B&P will be responsible if shrinkage does occur,

so there is No Risk to you!
