

STEP BY STEP

1

In-Person Estimate

Upon arrival, we document important and cautionary areas that you would like us to focus on by taking photographs for reference. Then we create a detailed list of the cleaning services requested to ensure your specific needs are met.

2

Proposal

We conduct an assessment of the labor, time, and supplies required for the requested services to provide an accurate estimate. **Within 48 hours** of an in-person visit, we provide a detailed proposal outlining the requested services and prices. After mutual agreement, we coordinate and schedule the best day for you to commence the cleaning process.

3

Prior to Service

Please consider safely stowing away any objects that may impact the service or hold sentimental value to prevent breakage. If necessary, certain additional services may require your assistance, we will provide instructions in advance. For further details, **please visit our 'Additional Services' page** where you may find answers to some of your questions.

4

Post Service

To ensure optimal results, we recommend scheduling **routine cleanings**—whether **weekly, biweekly, monthly, triweekly, or according to a schedule that best fits your needs**. After certain additional services, we may recommend specific post-care procedures. Rest assured, we will provide instructions to ensure the best results after the services are completed.
