

# STAMPS AND BATES NUMBERING

## CASE STUDY - Implementing Stamps and Bates Numbering on PDF Documents

### EXECUTIVE SUMMARY

For this case study, a law firm needed stamps and Bates numbering on numerous PDFs, which are crucial for legal document management and referencing.

### BACKGROUND

This law firm needed to automate the application of a large number of stamps and Bates numbering on PDFs for legal proceedings, in an efficient and error-free process.

### CHALLENGES

- Large volume of pages that needed to be edited took too much time
- Too much reliance on paralegals to manually enter the appropriate stamps and Bates numbering, without error and further review.

### SOLUTION

We developed a custom solution to automatically apply specific stamps and sequentially number pages across multiple PDFs in a timely and error-free manner.

### OUTCOME

Our automation facilitated document organization, improved efficiency in preparing legal documents, and ensured accuracy in numbering; all of which are essential for legal reviews and proceedings. This case illustrates the use of automation to enhance legal document management practices.
