

Miro 16

DTF Powder Shaker

INTRODUCTION

The **Miro 16** is DTF STATION's smart powder shaker solution for 45cm (17.7") DTF printers—designed to bridge the gap between entry-level setups and professional-grade performance. Tailored for mid-size operations, it offers effortless, even curing without the typical setup complexity or power demands of larger systems. Its compact, plug-and-play design makes it ideal for growing businesses ready to scale, delivering production-level consistency with minimal footprint.

FEATURES

- **Patented bottom platen heating** for even, consistently cured transfers
- **Patented built-in air purification system** ensures a safe workspace
- **No need for expensive electrical modifications**
- **Intuitive touchscreen controls:** Easy to set up and operate
- **Compact Size:** Fits through standard doorways
- **Safety-first:** Advanced sensor for a safer and more reliable workflow

BENEFITS

- **3-in-1: powdering, curing, and air purifying in one machine**
- **Easy to use: intuitive touchscreen control panel & a suite of videos on installation, use, and maintenance at your fingertips**
- **Low power consumption:** Optimized for seamless integration into home-use electrical systems
- **DTF STATION Quality:** Built on our patented shaker technology, trusted by professionals worldwide
- **Full tech support:** in addition to thorough videos, contact DTF Station techs at any time via instant messaging support through Discord
