

Why Do Birds Need the Bitterroot River?

Birds need the river for food, water, and a safe place to live!

Many birds drink from the river, catch fish or bugs to eat, and build their nests in trees nearby.

A Healthy River Helps Birds Thrive

If the river is clean and full of life, birds can find everything they need to eat, drink, and raise their babies.

If the river gets polluted, birds might get sick or lose their homes.
