

Farm Animals Need the River Tool!

Farm animals like cows, horses, sheep, and chickens need clean water to drink, just like people do!

Farmers use water from the Bitterroot River or wells (filled by the river) to keep their animals healthy and happy.

Animals need water to stay cool, digest their food, and make milk or eggs.

Without clean water, farm animals couldn't grow or help provide food for us!

Fun Fact:

A cow can drink **over 30 gallons** of water in one day. That's like a whole bathtub!
