WHY CHOOSE AN ENTRANCE[®] COMPOSITE DOOR?

Low Maintenance - Impact resistant GRP skins replicate the grain of an oak tree creating a natural look. Our extensive range of colours are resilient against UV damage giving you a 10 year surface finish guarantee.

Unique to You - With an array of colours from Standard to Stained, Premium to Painted, you can truly make your door unique to your taste. We offer a wide range of frame colour options and we even can paint your frame the same colour as your door!

All in the Detail - From our triple-glazed glass designs to our door handles and furniture, Entrance carefully pick the finest range of products to compliment our doors. Recently, we have worked with our suppliers to match our Rose Gold furniture to tie in with exclusive glass designs containing Rose Gold coming to finish your door to the highest of standard.

Superior Security - Our doors have been tested to and passed the rigours of PAS 24 security testing. Each door is supplied with a Winkhaus lock independently approved by the 'Secured by Design' policing initiative known for their knowledge in quality and security, paired with the Brisant Ultion 3 Star security cylinder with a £2,000 Guarantee to the homeowner against burglar attacks (see page 7).

Structural Strength - The internal frame of the door is manufactured from laminated timber which prevents any twisting and warping, giving you the benefits of a Composite but look of a Timber door, resulting in a 10 year structural guarantee.

Thermal Efficiency - With a high-density, foam insulated core, our composite doors have been proven to be 19% more thermally efficient than 48mm solid timber core composite doors, and 17% more than your traditional timber door. Our doors help keep the heat locked inside your home by preventing heat escaping through your door, therefore decreasing the energy loss and costs!

*All door styles may not be available in 'Standard' due to availability however the door can be painted to the closest RAL of the standard colour | **Premium colours come in already extruded as the specified colour not requiring painting. This is not possible when colourmatch frame has been chosen or on certain door designs | ***Available as a premium finish in some door designs, check our door builder for availability | Colours are for visual representation only, printing practices may cause colour variation.

PROFILE COLOUR OPTIONS

At Entrance® we offer a wide selection of profile colour options along with the option of Ovolo for the traditional sculptured look or Chamfered for a more modern, clean look of frame styles.

Choose from our Standard Frame Colours shown on this page, all of which are foiled (excluding the White PVC and Colourmatch Smooth option), or opt for your door and frame to be painted the same colour at the same time to give your house the grand Entrance® it needs.

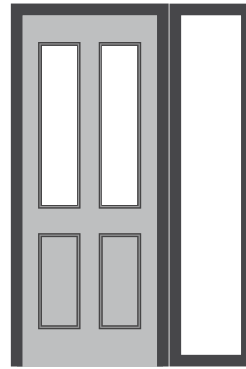

Colourmatch Smooth Frame Option - A lightly textured finish on a smooth frame to perfectly compliment our smooth door collections. If white is chosen on inside it will be our standard white PVC frame.

Colourmatch Grained Frame Option - A painted, pre-foiled frame to give a grain effect and painted and or stained at the same time as the door to ensure a colour match.

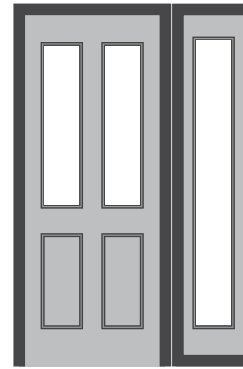

*Available on both sides only
 **Available on 1 side only in chamfered
 ***Available on 1 side only in chamfered

LEAVE YOUR WORRIES AT THE DOOR

First and foremost, at Entrance Composite Door Solutions we provide your home with the security you and your family need. Our doors have been independently tested to exceed the requirements of PAS24 – the UK security standard for external doors; and are Part Q compliant.

The Entrance Composite Door leaf is a hybrid GRP Composite, comprising of an impact resistant, 2mm GRP skin, an LVL and Timber frame structure and filled with a insulated foam core containing a security board.* It has been tested to PAS24 regulations and excelled at the cut through test proving the utmost security for your home.

At Entrance Composite Door Solutions, we want nothing but the best for our doors on your home. We class all of our GRP doors as enhanced security as they are fitted and supplied with German manufactured Winkhaus multipoint locking systems along with high security Brisant 3 Star Kitemark Cylinders with £2,000 Guarantee against burglar attacks, giving you peace of mind that an Entrance door is the best way to secure your home with the most reliable security options in the market.

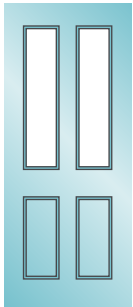

For Lock & Hardware options please see pages 64-68, featuring our NEW AV3 locking system

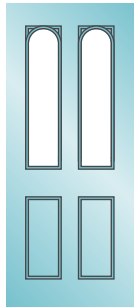

*Some door styles have a 4mm security skin whereas other door styles contain a security board inserted in the centre of the door.

SECURITY AS STANDARD

As standard, Entrance® composite doors come complete with an impressive range of high security features.

Manufactured in Germany, our multipoint locking system features two compressing security hooks and a central deadbolt to provide high levels of both security and weather performance. To further enhance this security your home will be protected by the industry leading Brisant Ultion 3 star Security Cylinder.

With an extensive range of handle colours and complimentary door furniture including knockers and letterplates you can dress your door to meet your desires.

CONTEMPORARY & HERITAGE

WINKHAUS AV3

At Entrance® Composite Door Solutions, we want nothing but the best for our doors on your home and are proud to supply German manufactured Winkhaus locks, knowing that they have the best and most reliable security options in the market.

The AV3 is the next generation of the highly acclaimed AV2 automatic locking system which we have naturally progressed our Contemporary, Heritage and Electronic hardware options to recently. The AV3 gives you the best of both worlds, security and control!

Door image features mid-height version of the AV3 lock. This is also available in Heritage version with a higher key position.

Daylatch Feature

With all of the benefits of knowing your door is locking automatically behind you, it is also nice to know that you can authorise entry to your house for family members or simply if you want to nip out to get something from the car! The main change from the AV2 to the AV3 is the magnetic Daylatch feature which allows you to do just that. By simply flipping the switch on your frame you are able to turn off the magnet that causes the hooks to engage, meaning you or your family can easily enter or exit your home without worrying about forgetting your key.

Quick, Secure and Silent

The AV3 features multi-point, independently acting hooks for claw action and sealing elements for a dynamic contact pressure. By pulling the door closed, the sealing elements and the sturdy hooks are triggered by means of a magnetic release on the frame and the door is secured against undesired entry. This ensures that the door always remains securely locked and remains firmly in its frame even without additional locking. The sturdy hooks, sealing elements and latch can be retracted manually using the locking cylinder or door handle.

Smooth Operation

Our Winkhaus AV3 door lock is operated by key which is why it works best with our Contemporary and Heritage hardware options and despite the large double hook feature, the lock smoothly engages and retracts with ease. One of the best features of our Contemporary hardware options is the ease of use on opening your door the inside, and now it's available on the Heritage hardware too!

At Entrance® we uniquely provide a lever on rose internal handle fitted to your door when the bolt through pull or cylinder pull handle options is chosen, making it nice and easy to open your door while exiting or letting visitors in. To open the door you simply push down on the lever handle, and when you close it there is no need to loft the handle for deadlocking as the hooks will automatically drop when in the closed position. We also offer back-to-back pull handle options if you would prefer and the door is opened by simply turning the thumbturn cylinder supplied.
