Our Problem

- Clean water is a basic human right. Approximately 650 million people do not have access to clean, safe drinking water. Lack of clean water affects the community at its core. It not only determines the health of individuals but drives economy, affects education and self-esteem.

Our Goals

- Life Beyond Water believes that we can end the water crisis in our lifetime by ensuring that every person on the planet has access to life's most basic need...clean water.
- Everyone deserves to live a LIFE BEYOND WATER.

Our Vision

- To provide relief through education, aide and support to areas that are plagued by the lack of clean water and sanitation.

Global Missions

Life Beyond Water Global Outreach d started on the foundation of missions. We have planned mission assignments for volunteers to get to see first hand what life is like in areas with an unimproved water source. We also give them the first hand experience of being apart of the clean water solution through empowerment, access, education and faith.

Clean Water Projects

Life Beyond Water is making an impact by directly improving the source of water in the local community. We are assisting and financing the placement of new wells at strategic locations. We also are providing water filters to individual homes and communities as a part of our missions. Our proven track record of impact makes us one of the best charities to donate to

Medical Missions

In areas where there is a lack of clean water people are plagued at alarming rates with waterborne illness. In order to combat this we set up medical missions, clinics, and health education in areas that may not have regular access to medical care.

Disaster Relief

When natural disaster strikes one of the first things compromised is the water source. In response we provide relief to the areas with water filters, debris removal, manpower, and support through distribution of necessities. We aim to provide relief in a very turbulent time through collaboration with local organizations foreign and domestic. This also includes our COVID -19 Responses
