

Retreat, and deport

- Geopolitical conflict related

Illustration: Why you can not explain quantum physics to a frog

The EU is actually the most advanced high standards delivered for the people, and prosperity in every other way than migrating imbeciles who are trying to force their belief systems over others we have on planet Earth. Its safety rules and regulativeness is something way beyond every other collaborating group of district regulators. Their combination of trying to rule the 'center' of the atmospheric mantle, and then providing safety rules, seem to be a bit off of the geopolitical directions we are heading towards. Use parts of EU's settlements, and abolish most of them.

Everything besides migration and border control is OK with the EU.

Question: Who or how many are in charge in the EU parliament?

Even in 2026, Earth is not ready for total globalization. What a f***** circus this planet is. For many decades there has been a geopolitical war, making the highly educated people fleeing from a war zone being favored by some nations. Immigrants with a high risk of mental illness will be sent to lower ranked hierarchical nations, such as the U.K., Germany, France and others. We are again talking about miscalculations. It has basically been a business.

It is highly recommended that every nation sends their illegal aliens and criminals back to where they stem from.
