

Judgement day(s) - since time itself does not operate within human ways of functioning
- *and its advantages as a leading provoker for the global society and its prosperity*

Illustration: What to believe in a world of misleading lies and manipulation?

This is a document meant for prosperity, the challenge is how negatively you are capable of thinking regarding your own ego, or sins. The ultimate test, in other words. What do you do to make Earth a better place?

Introduction: Earth has 190-200 nations with their own flags. With many different religions and way many different systems operating as it would be the best, Humanity is lost. Nothing is good, and every system is a joke. When, or if, you understand how the systems shape the people, you will most likely agree. It only requires an open mind.

Table of content:

- 1.1 Religion
- 2.1 Operating state systems
- 3.1 Economics
- 4.1 Secrecy
- 5.1 Who is who, and what is what
- 6.1 Science

1.1:

Possible guideline: Belief system Doc 3.1 / Doc 4.1

Religion has killed far more people than any other aspect of what we refer to as a global society, with Buddhism as no.1. Christianity and its bible is incorrect, but the message appears as solid as a rock. Islam is the youngest religion, and frankly the most staggering obstacle for human global development. The jews are clearly following their agenda (recommended to fact check top leaders of different world banks). Hinduism has a fascinating background regarding 'lokas' and 'shramans'. In many ways, religion is belief. Unless you are not capable of distinguishing ego and life.

2.1:

No system, what so ever, is sustainable. This is due to lobbyism, economic needs, and greed.

3.1:

Question: Let's say that Earth has an astonishing global economic asset portfolio worth \$500 trillion in some years in the future. But the system keeps holding back information and development. Would this trigger prosperity or mistrust/riots? What kind of circus would exist when men can bear children and science and technology rules?

4.1:

Information is available. For everyone. To keep covering up such lies will haunt your legacy and family of younger generations. Talk about stupidity. A f***** joke. Yes, the human race. The media is your only temporary solution.

5.1:

Get your act together, unless you have a starfleet.

6.1.

In science we trust, because there are no lies and manipulation within it. A saviour for humanity.

The situation we have on Earth, now, has been built and planned for many decades. Whatever you want to refer to as the people on the top level, also had to adapt to a variation of outcomes. It seems that the stupidity of the human race (which they basically have caused) has resulted in them being wicked in their own web of mischief. It's just sad.

Earth/Terra is sick, and so are human beings. As a result of misleading information and stupidity over time
