

As an eye opener

- The NV vs. Norway conflict

The main reason why iacte Ltd. supports Norse mythology is because it seems to be the most accurate relationship between mind-body-soul and nature/environment, when it comes to describing how quantum mechanics and physics relate to the human in form of what kind of force, how it operates and how it affects 'your' way of living.

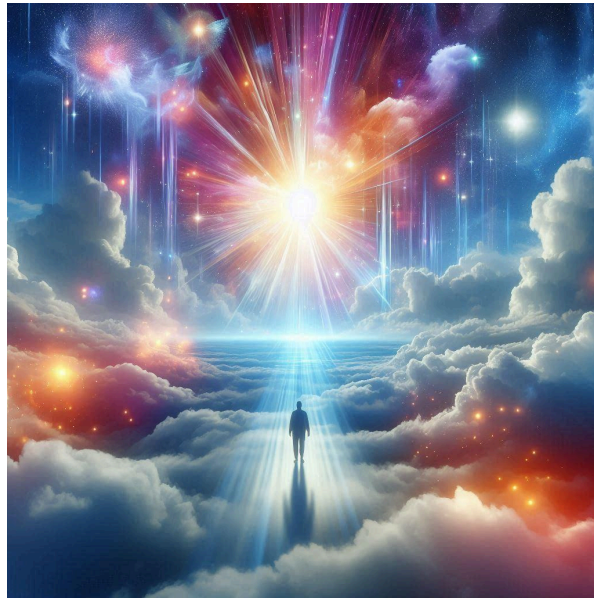

Illustration: In the search of light and collaboration, you must first acknowledge

There has been published a [document](#) with a list of names, as a thought experiment. This list can, and will, be updated alongside the stupidity transferred over to Norwegian innocent citizens by either government officials or people with some form of private relation. After a long time of thinking and reflecting, it is decided that the government officials listed, are those who will face the worst consequences. It is a result of both personal life, and work related issues. They are basically wanted dead or deported. And the longer it takes, the worse it becomes.

So, it has all started. The NV will not engage in any positive matter dealing with prosperity for Norway (for quite some time). iacte Ltd. is supposed to focus on high tech development within the global technological driven societies, but as a result of withholding information as a strategic way of achieving global prosperity, the focus must be on how to fix your nation. And nothing is fixed with peace & love due to horrible systems implemented.

The chaos theory is very fascinating. And (probably) only if you have lost yourself and your self you have seen how this planet operates solely on the mechanics. Quantum mechanics, noise and purely the machine / the apparatus.

Question: Is this document of such a friendly reminder, actually that friendly?

None of you (your nation) is in a position where Norway can be attacked. Deprosperity is The NV's path
