This document is part of the series 'Three documents creating chaos'

The pictures in this document is solid proof of child abuse. Physical and sexual. Examples of child behaviour (2-3 years old) will also be included, and it will start right away: 'Mom hits me', 'I have something inside me'...

Since government officials are in some form of obligated to act when they get informed by such horrible acts, and instead choose to cover it over due to corruption within the psychologists used (not only in this specific court case, but several hundreds as well), it is a clear sign of governmental decay. Welcome to the Telemark district court. The list mentioned, published and referred to several times, can not be triumphed by anything. They must die or leave.

The mother of the child in this specific case, which quite honestly reminds of something close to a retarded self-centered psychopath, blames the father of the child, instead of her inbred father (Helge Ørvik) and her child molesting step-mother (Inger Lise Dybvik). Family first, right? What a f***** joke of a mother.

No one in the kingdom of Norway knows anything about psychology. They know how to memorize and use their outdated curriculum learned decades ago, and of course behave in such a manner that keeps placing them in a power position they should not have. But hey, this is Norway, we do not care about future generations, we rather destroy children. Not a f***** joke. The psychologist Hans Moen, trying to use some form of declined knowledge, says that the mental abuse in this case is if the father tells his daughter what might have happened to her. Every outspoken sentence referred to within the case can be verified by surveillance within the district court.

So, by this document meaning: restrict collaborations with Norway.

- There might come a day, where iacte Ltd. alongside with the Norwegian Vatican, decides that the third document of chaos will be published. When (and if) this will be published there is no other nation on Earth being considered when it comes to the demolition of a government. And again to try to explain to all of you piece of shit government officials from Norway, the demolition has nothing to do with blowing up buildings, it is rather reputation based. Destruction of the poisoned mind, in other words. Die.

And if you ever hear from a Norwegian judge that we can not do anything for you in the situation regarding the child, why can't we just wipe out the judicial system caring for children? Seems like we need a DOGE here.

Possible answer (?): Well it looks good on paper that we operate like this. But not in reality. F***** joke of a nation resembling how underdeveloped countries doing it open source. Norway is just as bad as all of you.

No need to worry about Thee NV conquering Norway. There is zero value in disgusting government officials.

- Let them dig their own graves

Question: How would it be possible to detect violent abuse if the child was black at the age of 2-3 years old?

Note: two separate actions (

Picture one: the right hand of an adult trying to grab the child while running away (1-2 weeks old bruises)

Picture two: the right hand of an adult trying to grab the child while possibly running away (3-5 days old bruises)

Picture three: "Let all the 1-4 years old children know how it feels to put their hands in a grown man's pocket, to find a treasure map!"

- Sandøya Naturbarnehage & Inger Lise Dybvik's favourite kindergarten
