Illustration: High standards, please

The Norwegian source of how not, to create a strong democratic system with so many different individuals in a symbiotic state of mind with the media system, in general. The whole country is basically a slave of the elite'S.

Regarding the 2025 election in Norway, iacte Ltd. would like to extend some general advice for the future nation within four years of this government. How this will turn out is more than interesting, due to power positions.

- Enjoy your last years as a PM
- Give people information, not words
- Omit the use of incompetent ministers
- EU will make you look incompetent in 2029 - "msm / the media system"
- Make NRK, our nation's biggest propaganda machine, write a good article of any of the things Mr. Trump has achieved for his nation, or what actually are registered at www.whitehouse.gov
- Im watching

The democratic influence and power positions in our societies as a whole (at least in Europe), and what they have achieved, is interesting. It is the opposite of knowledge and history. It is basically so far away from evolution, you can ever imagine. Well, the media is to blame. And the governments are to blame also because they favour it, and allow it to be so. Let us all watch the choices he makes for Norway, and not necessarily every other nation (in war).

Welcome to Oslo, USS Gerald Ford. Stay as long as you want.

Regards,
The NV
