

The unbalanced Earth

Illustration: Prompt (since 'swastika' is a restricted word on image generators): A cross with legs symbolizing movement and rotation

If you get offended by seeing a swastika, do some research on what this symbol actually means.

Everything is dynamic on a planet. Not only nature itself but also systems under development and coordinations for our beloved, but still sick and unhealthy Earth. It is getting sick as a result of human beings being manipulated. Manipulated by the media systems, solely because some of our fellow beings have an enormous appetite for control of the 'total' amount of wealth flowing. And also wealth being generated. This is Earth, as we speak (or read/write).

Energy + economics = 0 influence in the coming decades -> Do your necessary work

Question one: How many years has it taken for some living generations to blindly trust the media?

Well, as mentioned; The CIA made a huge mistake in the 50s/60s(?) by not including the factor of podcasts and the www, making the global situation we now experience into their calculations. It is of course always easy to be hindsighted. But if we do not learn, it is more difficult to prosper in the right direction, as our society requires.

Question two: How can we make Earth more balanced?

- A possible way is to not start a conflict, but rather finish it

Question three: How can you finish a conflict where the opponent is a little shitkid?

Question four: Europa does not work, so we need more Europa?

At the lowest level of conflict existing on Earth, every nation can start by using professionals when it comes to innocent children and future generations. But many nations (especially Norway) do not manage to do even that
