

## How planet Earth can be similar to a galaxy

- Earth is special. Earth is an experiment. Earth is sick due to human beings. Controversial, but true.

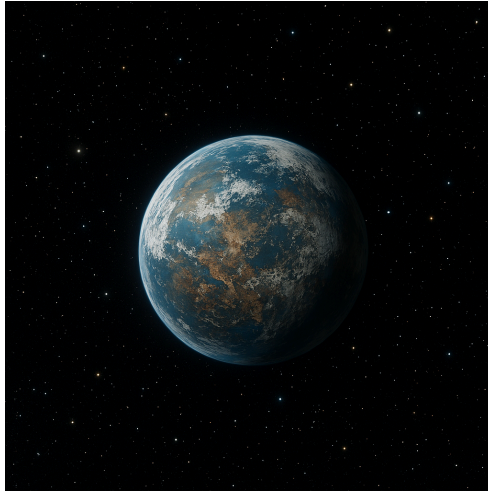

Illustration: Get both your act and consciousness together

What a f\*\*\*\*\* joke you all are, if the truth wont kill you. Praise the lord. Allah is dead.

If [Per Kaald](#) is still alive, he will get killed. Killed by time, slowly.

Lets say that a galaxy exists of x amount of exo planets with evolved beings. Much more evolved than the circus Earth we are all living on. We have the same amount of nations representing the evolved beings being able to travel interstellar. They will all think about prosperity for themselves. Not money given to them, provided, or bribed by other nations. The trade system is mainly for survival of the race and not materialistic needs caused by governments.

This circus planet is a result of the experiment. A human being is a result of not natural development but rather an interest in conscious evolutionary differential diversity driven factors done by wave functions. Place and time.

Every ET nation/planet involved has failed just as much as the Earthlings. And it is the main reason for not being attacked or basically eliminated. The result of stupidity of the ETs. They are just as stupid as us, but more evolved.

Release classified files as soon as possible. It will never gain your nation, nor prosperity. It is our response.

*Question one:* What is/was a foo fighter?

*Question two:* Why do they not assist or help?

*The ultimate source for self prosperity lies within, not without. Brutalism in architecture in other words.*
