

A list of **Norwegian** government officials who either support child predators, or do not care

- And do not forget that they either do not care, or do not understand children
- ["We Destroy Children!"](#)

There are many children in Norway who could have a way better youth and environment than they do. That's why some parents take it to court. As written; there is no love in the system, it is all about energy given to get paid.

*Question 1:* Why would Iacte Ltd. front such a particular case, if there was nothing to morally fight for?

*Hint:* Age of stupidity, and an ongoing situation for 5 years of plain hell due to incompetent people in certain power positions makes it pretty clear that this is no joke. Try telling that to an ignorant useless judge, without even being able to make a timeline depicting when happenings occur, but rather trust the system when it is totally wrong.

*Question 2:* Who is right in such a situation?

- a) A lying mother
- b) A father who is seeking answers
- c) The most apathetic and useless court system on Earth
- d) All of the above

[Håvard Kjeldås](#) (Magistrate - Telemark District Court)

The necessity of pictures and illustrations of these so-called 'trusted people' is not valuable regarding the context of this document. Norway has already proven twice in one specific situation that this country actually destroys children and future generations. The Geo-blocking initiative, making every Norwegian start using VPN, is already implemented and will continue to be for some time.

*Do yourself a predictable favour and restrict your collaboration with the Norwegian State Government, immediately.*
