

SLEEP-RELATED BREATHING DISORDERS & CRANIOFACIAL PAIN

For Adults & Children – A System for Dx and Tx Mini-Residency

EARLY BIRD DEAL

Register by
June 30th, 2020
to get the Early Bird Deal of only
\$1,800 for Session 1
at San Diego, CA ONLY

Register and be entered to
**Win One Night Hotel
Accommodations**

DISCOUNT CODE: 2020FallEarlyBird
Please write the DISCOUNT CODE on your registration form. This offer may not be combined with any other sale, promotion, discount code, coupon and/or offer. If the discount code is not present at the time of registration, the discount will not be applied at a later day.

System

Learn a system for screening & triage of structural injuries, OSA & systemic inflammatory conditions

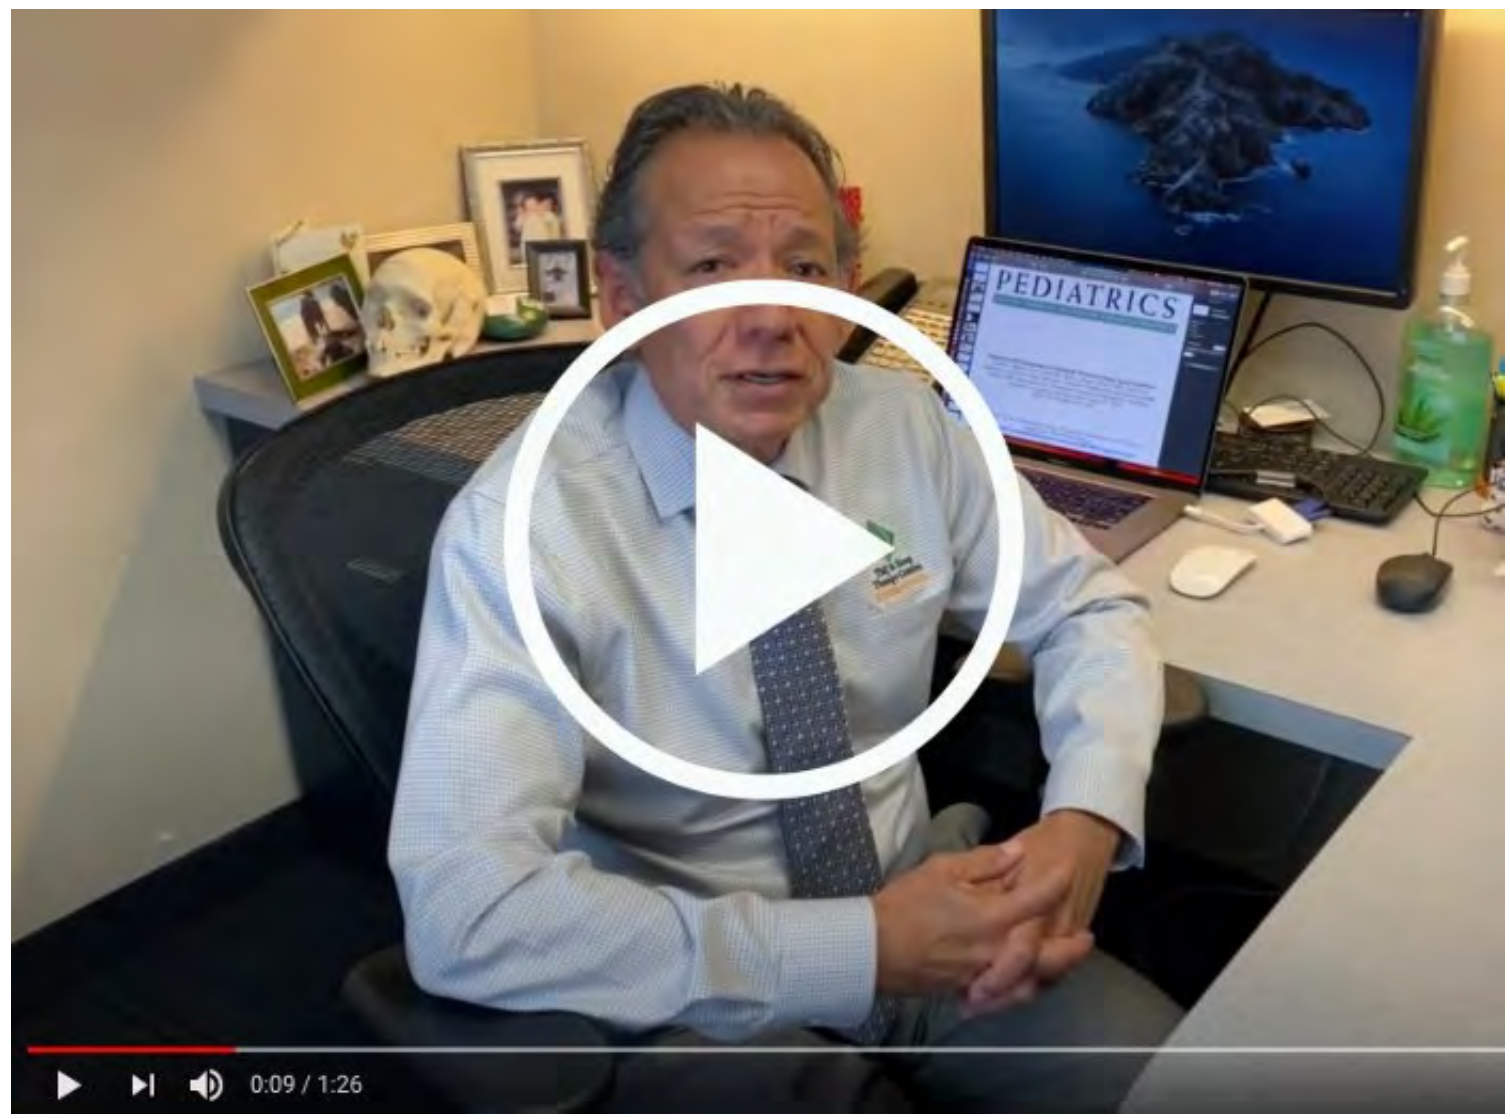

Treatment

Understand the proper steps and protocols for patient treatment to achieve reproducible results.

Resources

All forms & documentation (patient intake, clinical exam, tracking, billing) are supplied to successfully treat patients.

“ 2020 Mini-Residency in SDB/Craniofacial Pain (for adults & children), is a powerful display of new cases, new technologies, live demonstration that cannot be duplicated via video. It must be experienced. This program is a turnkey for implementing a “System” that has been proven all over the world. It has evolved from its inception 20 years ago. The manuals, literature is continuously updated, so if it has been a few years since you attended, it is time to see how much simpler in technique with a huge base of information. I look forward to showing you what is possible. ”

– Dr. Steven Olmos, TMJ & Sleep Therapy Centre International Founder & CEO

Session 1

- Screening SDB, Sleep Disordered Breathing, OSA, Craniofacial Pain
- How to Find CR
- Imaging: CBCT, MRI Interpretation (Your Cases)
- Electrodiagnostics: JVA
- Motor Nerve Reflex Evaluation (Neural and Orthopedic Screening)
- Anatomy Head & Neck
- Airway and TMJ Neuroanatomy
- Diagnosis and Treatment Planning

Session 2

- Sleep Disorders
- Triage of Sleep Appliance Therapy
- Headaches
- Recapturing Discs
- Orthotic Design & Indications
- Pharmacology

Session 3

- Sleep Disorders that Cause TMJ Pain
- Neuropathic Disorders
- Typical and Atypical Neuralgias
- Musculoskeletal Pain
- Physical Medicine Modalities
- Orthodontic/Orthopedic, Removable and fixed prosthodontics treatment for facial/jaw pain and breathing disorders
- Nutrition
- Pediatric OSA (Treatment Options)
- Myofunctional Therapies and Myobrace

**Directed by International Educator
Steven Olmos, D.D.S.**
Founder, TMJ & Sleep Therapy Centres International
Diplomate, American Board of Craniofacial Dental Sleep Medicine
Diplomate, American Board of Dental Sleep Medicine
Diplomate, American Board of Craniofacial Pain
Diplomate, Academy of Integrative Pain Management
FAAOP, FAACP, FICCMQ, FADI, FIAO

Course Includes:

- 3 DIGITAL Manuals.
- One Hour Quarterly Follow Up Webinars for Attendees.
- All Forms & Documentation are Supplied to Successfully Implement Treatment.

Dates:

Session 1 September 25-26, 2020
Session 2 October 16-17, 2020
Session 3 November 13-14, 2020

Location: Hyatt Regency Mission Bay Spa And Marina - San Diego, CA

**Learn the
“System” that
dentists
worldwide are
using with
reproducible
success!**

Testimonials

“You will leave this course prepared to treat TMD and Sleep Disordered Breathing at a level you didn’t even know existed. No other CE program has delivered results like this one. Dr. Olmos’ researched/evidenced based systems added \$1,000,000 of production to our practice within 12 months. This will be the best investment you’ve ever made in your practice.”

- Dr. Daniel Klauer, South Bend, IN

“The TMJ & Sleep Therapy mini - residency was a game changer for me in how I evaluate and treat my entire patient base. I’ve always known there was a “blind-spot” in my evaluation and management of bruxers and patients with facial pain. Dr. Olmos’ course taught me more than I could ever imagine about chronic pain, airway and breathing concerns and bruxism. Most important, the material learned is supported by an unimaginable amount of researched literature references.”

- Dr. Ryan Skale, Chicago, IL

A Hands-On Program For Finding Structural Injury

Chronic pain is the most difficult diagnostic puzzle the body can present. One acute injury unresolved or un-healed results in plastic changes to the central nervous system (CNS) and adaptive postures that result in mechanical overload and breakdown of basic and necessary function of the organism.

The value of MNRT is that it gives us the priority of injuries for each individual based on survival instincts. There are many ways to evaluate injuries, however only MNRT gives us the order in which to treat.

[CLICK HERE TO READ MORE](#)

Testimonials

Course Objectives:

- Learn how to treat cause instead of chasing symptoms
- Learn a reproducible SYSTEM for screening and triaging of structural injuries
- Learn how to identify and handle dual primary problems
- Know when to refer and who to refer to
- Learn how being the director of patient care gets you results in treatment
- Learn what to do when the patient is still symptomatic.
- Understand the difference between Neural Reflex Testing and Kinesiology (Muscle) Testing and when to use one over the other

Course Includes:

- 2 Full Days of Lecture & Hands-On Instruction
- Instructional Videos
- Step-by-Step Digital Manual
- Protocol Flowcharts

DR. OLMOS BIO

A Message from Dr. Olmos

"As doctors treating p.n.s, sleep breathing disorders and other conditions, we are always looking for tools to assist us in elevating our diagnostic skills. In my 33 years of treating patients, the most reliable testing I have ever used is without questions, the patient's own neurology! Therefore, Motor Nerve Reflex Testing has been a staple in the diagnosis and treatment of orthopedic problems throughout our medical community as well as over 60 TMJ & Sleep Therapy Centres spanning 7 countries. This is the most exciting course I teach! Without Motor Nerve Reflex Testing, I could not practice at the level I do today. I look forward to sharing this diagnostic skill with you."

-Steven Olmos, D.D.S

Airway Management

A Solution for our Health Crisis

by Dr. Steven Olmos (Author)

When was the last time you really focused on your breathing? For most of us, it's something that automatically happens without thought or effort. We invest little time or energy in the importance of proper breathing (airway management) for optimum health. Although the medical community is continuously identifying links between airway management and health, we rarely consider that conditions from which people suffer and for which they medicate (diabetes, heart disease, high blood pressure) may very well be improved through a simple understanding and development of airway management.

In this book, Dr. Steven Olmos will discuss healthcare problems that can arise from ignoring the airway's effect on the body for both adults and children.

He will explain:

- Obstructive sleep apnea
- Proper breathing / function of the nose
- Signs and symptoms of sleep-related breathing disorders
- Finding the core problem vs simply treating the symptoms
- Relationship between chronic pain and proper breathing
- Screening by healthcare providers
- Importance of patient awareness

This invaluable exploration of an often overlooked topic is your guide to better health and a better life.

Improved Nasal Volume Utilizing Hyperosmotic Saline Xylitol Mixture

(Effective Alternative or Adjunct to Decongestants and Antihistamines)

by Dr. Steven R. Olmos & Dr. Joseph Baba

This paper quantifies the reduction of soft tissue hypertrophy of the nasal complex resulting in an increase of nasal volume and increased flow using a mixture of Xylitol and Saline. The health benefits of improved nasal breathing through increased inspired nasal NO (nitric oxide) and the antimicrobial benefits of Xylitol are discussed. Restoration of functional breathing (nasal) and it's relation-ship to up righting head posture is reviewed.

American Academy of Craniofacial Pain
Global Summit on Clinical Care
& Adapting Communities
AUG 7-8 2020

WE'RE GOING VIRTUAL

The American Academy of Craniofacial Pain is excited to announce that in moving our Annual Meeting to a virtual platform, we were able to expand our programming. This means you have access to 20 of our favorite industry leaders, presenting the most relevant science in chronic pain, sleep and breathing, and all things Oro- and Craniofacial Pain! Not only that, but this virtual program gives you access to over 20 hours of Continuing Education credits, in the comfort of your own home, on your schedule.

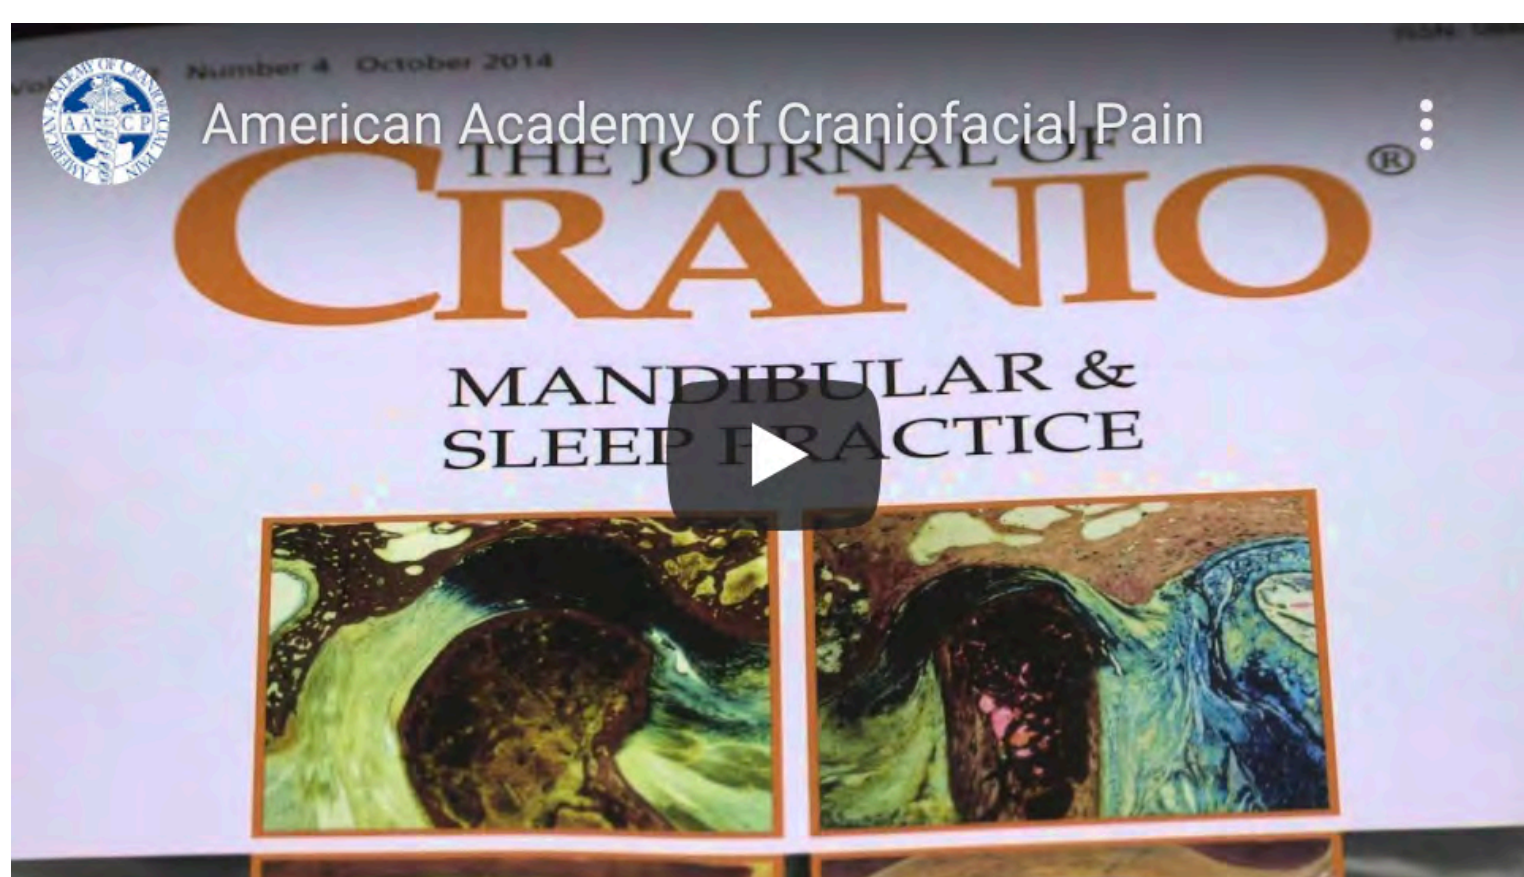

The virtual meeting will include a complete Annual Meeting experience from the keynote speakers and break-out sessions with live Q & A, to innovative networking opportunities with fellow attendees and the ability to schedule virtual meetings with exhibiting vendors.

Don't miss this unique opportunity to learn from the best and engage with industry-leading companies highlighting new tools and resources to practice in these unprecedented COVID-19 times.

WE SUPPORT SPOKANE

Our thanks to the Davenport Hotel for an early offer to defer to 2022. We look forward to coming to your exceptional property and appreciate the partnership.

STRATEGIC PARTNERS SPOTLIGHT

Featuring BioResearch

**BETTER DIAGNOSIS.
BETTER TREATMENT OPTIONS.
BETTER PATIENT EXPERIENCE.**

**BETTER CHOICES
THROUGH BETTER
TOOLS!**

MLS LASER

MULTI-WAVE LOCKED SYSTEM
The synchronized action, specific of MLS Laser Therapy, allows you obtain a complex and refined light pulse to feel better faster.

PRODUCTS

MLS Laser Therapy technology is the most advanced laser therapy system on the market. Reduction of response times, and therefore overall treatment times, distinguishes MLS Laser Therapy from traditional laser therapy with reciprocal advantages for both the operator and the patient.

TECHNOLOGY IN THE PRACTICE

MLS Warm Laser Technology: Our office uses MLS Laser Therapy, a revolutionary system that has been shown to reduce inflammation, reduce pain, and promote healing DRUG-FREE! This laser is the pride and joy of our office. Almost everything a Dentist treats is either painful, or inflammatory, and some procedures require rapid healing. This laser causes no pain, and works immediately on your pain and inflammation to make you feel like you didn't even go to the dental, as soon as possible!

MLS Laser - Dual Wavelength Therapy

For more information Call 1-800-251-2315

JOINT VIBRATION ANALYSIS

All occlusal analysis, starts with the TM Joint BioJVA or "Joint Vibration Analysis" is a quick, non-invasive method for objectively evaluating the Temporomandibular Joints.

PRODUCTS

Joint Vibration Analysis is based on simple principles of motion and friction. When smooth surfaces rub together, little friction is created, and little vibration. If these surfaces become rough, then friction and vibration are created when these surfaces articulate.

TECHNOLOGY IN THE PRACTICE

Your TMJ's or jaw joints are the skeletal foundation of your mouth. All dentists are required to assess the health and function of your TMJ's. Our office uses Joint Vibration Analysis (JVA) which records the vibrations created by joint fluid, cartilage and bone as you open and close your mouth. This test allows us to objectively measure and document the health of your Jaw Joint in just 30 seconds of opening and closing.

T-SCAN OCCLUSAL ANALYSIS

The T-Scan NOVUS brings unprecedented accuracy to analysis of dental occlusion, making you a more informed practitioner.

PRODUCTS

For years, dental occlusion had been largely a matter of guesswork for dentists. Meet the next evolution of dentistry with the T-Scan innovative solutions.

TECHNOLOGY IN THE PRACTICE

Many dental procedures can change the way you bite. Fillings, crowns, bridges, extractions, and orthodontics as well as many more. For over 100 years dentists have relied on paper covered in ink to see where the upper and lower teeth contact. But this old technique gives no information on the force, timing, and balance of your bite. And that's exactly what makes you feel your bite is "off". We use the T-Scan NOVUS system that displays all this information on a computer so that your dentist can use it to get your bite right with minimal tooth loss from guessing.

NARIS - RHINOMETRY/RHINOMANOMETRY

A1 ACOUSTIC RHINOMETER AND NR6 RHINOMANOMETER
The A1 Acoustic Rhinometer and NR6 Rhinomanometer assist in the collection of nasal investigation data by using a sound pulse technology and a flow/pressure measurement.

PRODUCTS

The A1 Acoustic Rhinometer and NR6 Rhinomanometer assist in the collection of nasal investigation data by using a sound pulse technology and a flow/pressure measurement. The examination of nasal structure is done using the sound pulse of the Rhinometer. The examination of nasal function is measured via the Rhinomanometer.

TECHNOLOGY IN THE PRACTICE

How you breathe through your nose can be influenced by proper growth and development of your upper and lower jaws. We measure how you breathe through your nose and may be able to improve that with various treatment options or in cooperation with an ENT.

48 Hours Lecture & Participation CE

System

Learn a system for screening & triage of structural injuries, OSA & systemic inflammatory conditions

Treatment

Understand the proper steps and protocols for patient treatment to achieve reproducible results.

Resources

All forms & documentation (patient intake, clinical exam, tracking, billing) are supplied to successfully treat patients.

"2020 Mini-Residency in SDB/Craniofacial Pain (for adults & children), is a powerful display of new cases, new technologies, live demonstration that cannot be duplicated via video. It must be experienced. This program is a turnkey for implementing a "System" that has been proven all over the world. It has evolved from its inception 20 years ago. The manuals, literature is continuously updated, so if it has been a few years since you attended, it is time to see how much simpler in technique with a huge base of information. I look forward to showing you what is possible."

– Dr. Steven Olmos, TMJ & Sleep Therapy Centre International Founder & CEO

Session 1

- Screening SDB, Sleep Disordered Breathing, OSA, Craniofacial Pain
- How to Find CR
- Imaging: CBCT, MRI Interpretation (Your Cases)
- Electrodiagnoses: JVA
- Motor Nerve Reflex Evaluation (Neural and Orthopedic Screening)
- Anatomy Head & Neck
- Airway and TMJ Neuroanatomy
- Diagnosis and Treatment Planning

Session 2

- Sleep Disorders
- Triage of Sleep Appliance Therapy
- Headaches
- Recapturing Discs
- Orthotic Design & Indications
- Pharmacology
- Appliance design /selection

Session 3

- Sleep Disorders that Cause TMJ Pain
- Neuropathic Disorders
- Typical and Atypical Neuralgias
- Musculoskeletal Pain
- Physical Medicine Modalities
- Orthodontic/Orthopedic, Removable and fixed prosthodontics treatment for facial/jaw pain and breathing disorders
- Nutrition
- Pediatric OSA (Treatment Options)
- Myofunctional Therapies and Myobrace

Testimonials

"You will leave this course prepared to treat TMD and Sleep Disordered Breathing at a level you didn't even know existed. No other CE program has delivered results like this one. Dr. Olmos' researched/evidenced based systems added \$1,000,000 of production to our practice within 12 months. This will be the best investment you've ever made in your practice."

- Dr. Daniel Klauer, South Bend, IN

"The TMJ & Sleep Therapy mini - residency was a game changer for me in how I evaluate and treat my entire patient base. I've always known there was a "blind-spot" in my evaluation and management of bruxers and patients with facial pain. Dr. Olmos' course taught me more than I could ever imagine about chronic pain, airway and breathing concerns and bruxism. Most important, the material learned is supported by an unimaginable amount of researched literature references."

- Dr. Ryan Skale, Chicago, IL

MOTOR NERVE REFLEX TESTING

A Hands-On Program For Finding Structural Injury

COVID-19 PRECAUTIONS

TMJ & Sleep Therapy Centre International has always been committed to the highest safety standards. We continue to do so and have added extra precautions to ensure our attendees health and safety.

- All attendees will be have their temperature taken before entering the meeting room.
- All attendees will be required to wear a mask or face shield.
- All attendees will be required to wear gloves (MNRT Course Only, TMJ & Sleep Therapy Centre International will supply).
- A TMJ & Sleep Therapy Centre International team member will ensure that chairs, equipment and all surfaces in between breaks are sanitized.
- There will be hand sanitizer available throughout the event space and hotel.

16 Hours Lecture & Participation CE

Proper diagnosis is 95% of effective treatment.

Chronic pain is the most difficult diagnostic puzzle the body can present. One acute injury unresolved or un-healed results in plastic changes to the central nervous system (CNS) and adaptive postures that result in mechanical overload and breakdown of basic and necessary function of the organism.

The value of MNRT is that it gives us the priority of injuries for each individual based on survival instincts. There are many ways to evaluate injuries, however only MNRT gives us the order in which to treat.

[CLICK HERE TO READ MORE](#)

Testimonials

Course Objectives:

- Learn how to treat cause instead of chasing symptoms
- Learn a reproducible SYSTEM for screening and triaging of structural injuries
- Learn how to identify and handle dual primary problems
- Know when to refer and who to refer to
- Learn how being the director of patient care gets you results in treatment
- Learn what to do when the patient is still symptomatic.
- Understand the difference between Neural Reflex Testing and Kinesiology (Muscle) Testing and when to use one over the other

Course Includes:

- 2 Full Days of Lecture & Hands-On Instruction
- Instructional Videos
- Step-by-Step Digital Manual
- Protocol Flowcharts

A Message from Dr. Olmos

"As doctors treating pain, sleep breathing disorders and other conditions, we are always looking for tools to assist us in elevating our diagnostic skills. In my 33 years of treating patients, the most reliable testing I have ever used is without questions, the patient's own neurology! Therefore, Motor Nerve Reflex Testing has been a staple in the diagnosis and treatment of orthopedic problems throughout our medical community as well as over 60 TMJ & Sleep Therapy Centres spanning 7 countries. This is the most exciting course I teach! Without Motor Nerve Reflex Testing, I could not practice at the level I do today. I look forward to sharing this diagnostic skill with you."

-Steven Olmos, D.D.S

Airway Management

A Solution for our Health Problem

by Steven Olmos (Author)

When was the last time you really focused on your breathing? For most of us, it's something that automatically happens without thought or effort. We invest little time or energy in the importance of proper breathing (airway management) for optimum health. Although the medical community is continuously identifying links between airway management and health, we rarely consider that conditions from which people suffer and for which they medicate (diabetes, heart disease, high blood pressure) may very well be improved through a simple understanding and development of airway management.

In this book, Dr. Steven Olmos will discuss healthcare problems that can arise from ignoring the airway's effect on the body for both adults and children.

He will explain:

- Obstructive sleep apnea
- Proper breathing / function of the nose
- Signs and symptoms of sleep-related breathing disorders
- Finding the core problem vs simply treating the symptoms
- Relationship between chronic pain and proper breathing
- Screening by healthcare providers
- Importance of patient awareness

This invaluable exploration of an often overlooked topic is your guide to better health and a better life.

If you still don't have Dr. Steven Olmos
book what are you waiting for?

Chasing Pain (Diagnosing and Treating Trigeminal Neuralgia in General Dentistry)

by Steven Olmos, DDS, DABCP, DABCDISM, DABDSM, DAAPM, FAAOP, FAACP, FICCMO, FADI, FIAO

As dentists, we know quite a bit about tooth and gum pain, but when it comes to chronic facial pain and neuropathic pain, our dental school education leaves us unprepared. The objective of this article is to explain the differences between men and women with chronic orofacial pain and the relationship to proper functional breathing, using a case study as demonstration.

Headache & jaw locking comorbidity with daytime sleepiness

by Dr. Steven R. Olmos, DDS, Franklin Garcia-Godoy, DDS,MS, PHD, Timothy L. Hottel, DDS, MS, MBA & Nhu Quynh T. Tran, PHD

Purpose: To investigate the relationship between craniofacial pain symptoms (painful conditions present in the cranium and face, including jaw joint-related pathology and primary headache conditions) and daytime sleepiness, determined by the Epworth sleepiness scales (ESS), to correlate the comorbidity as well as potential predictive factors.

MOTOR NERVE REFLEX TESTING

A Hands-On Program For Finding Structural Injury

COVID-19 PRECAUTIONS

TMJ & Sleep Therapy Centre International has always been committed to the highest safety standards. We continue to do so and have added extra precautions to ensure our attendees health and safety.

- All attendees will be have their temperature taken before entering the meeting room.
- All attendees will be required to wear a mask or face shield.
- All attendees will be required to wear gloves (MNRT Course Only. TMJ & Sleep Therapy Centre International will supply).
- A TMJ & Sleep Therapy Centre International team member will ensure that chairs, equipment and all surfaces in between breaks are sanitized.
- There will be hand sanitizer available throughout the event space and hotel.

16 Hours Lecture & Participation CE

Proper diagnosis is 95% of effective treatment.

Chronic pain is the most difficult diagnostic puzzle the body can present. One acute injury unresolved or un-healed results in plastic changes to the central nervous system (CNS) and adaptive postures that result in mechanical overload and breakdown of basic and necessary function of the organism.

The value of MNRT is that it gives us the priority of injuries for each individual based on survival instincts. There are many ways to evaluate injuries, however only MNRT gives us the order in which to treat.

[CLICK HERE TO READ MORE](#)

Testimonials

Course Objectives:

- Learn how to treat cause instead of chasing symptoms
- Learn a reproducible SYSTEM for screening and triaging of structural injuries
- Learn how to identify and handle dual primary problems
- Know when to refer and who to refer to
- Learn how being the director of patient care gets you results in treatment
- Learn what to do when the patient is still symptomatic.
- Understand the difference between Neural Reflex Testing and Kinesiology (Muscle) Testing and when to use one over the other

Course Includes:

- 2 Full Days of Lecture & Hands-On Instruction
- Instructional Videos
- Step-by-Step Digital Manual
- Protocol Flowcharts

A Message from Dr. Olmos

"As doctors treating pain, sleep breathing disorders and other conditions, we are always looking for tools to assist us in elevating our diagnostic skills. In my 33 years of treating patients, the most reliable testing I have ever used is without questions, the patient's own neurology! Therefore, Motor Nerve Reflex Testing has been a staple in the diagnosis and treatment of orthopedic problems throughout our medical community as well as over 60 TMJ & Sleep Therapy Centres spanning 7 countries. This is the most exciting course I teach! Without Motor Nerve Reflex Testing, I could not practice at the level I do today. I look forward to sharing this diagnostic skill with you."

-Steven Olmos, D.D.S

Dates:

November 15-16, 2020

SLEEP-RELATED BREATHING DISORDERS & CRANIOFACIAL PAIN

For Adults & Children
A System for Dx and Tx Mini-Residency

48 Hours Lecture
& Participation CE

“The Mini-Residency in Sleep-Related Breathing Disorders & Craniofacial Pain (for adults & children), is a powerful display of new cases, new technologies & live demonstration that cannot be duplicated via video. It must be experienced. This program is a turnkey for implementing a “System” that has been proven all over the world.”

– Steven Olmos DDS,
TMJ & Sleep Therapy Centre International Founder & CEO –

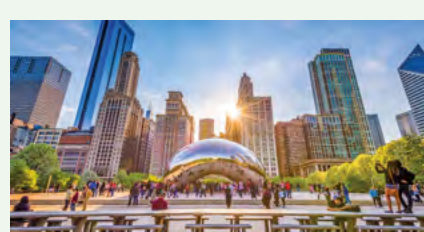

SESSION #1 April 23-24, 2021

Chicago Marriott Downtown Magnificent Mile

DOCTORS WILL LEARN:

- Screening SBD, Sleep Disordered Breathing, OSA, Craniofacial Pain.
- How to Find CR.
- Imaging: CBCT, MRI Interpretation (*Your Cases*).
- Electrodiagnostics: JVA.
- Motor Nerve Reflex Evaluation (*Neural & Orthopedic Screening*).
- Anatomy Head and Neck.
- Airway and TMJ Neuroanatomy.
- Diagnosis and Treatment Planning.

BUY DR. STEVEN OLMOS BOOK TODAY

Airway Management A Solution for our Health Crisis by Dr. Steven Olmos (Author)

When was the last time you really focused on your breathing? For most of us, it's something that automatically happens without thought or effort. We invest little time or energy in the importance of proper breathing (airway management) for optimum health. Although the medical community is continuously identifying links between airway management and health, we rarely consider that conditions from which people suffer and for which they medicate (diabetes, heart disease, high blood pressure) may very well be improved through a simple understanding and development of airway management.

In this book, Dr. Steven Olmos will discuss healthcare problems that can arise from ignoring the airway's effect on the body for both adults and children.

He will explain:

- Obstructive sleep apnea
- Proper breathing / function of the nose
- Signs and symptoms of sleep-related breathing disorders
- Finding the core problem vs simply treating the symptoms
- Relationship between chronic pain and proper breathing
- Screening by healthcare providers
- Importance of patient awareness

This invaluable exploration of an often overlooked topic is your guide to better health and a better life.

THANKS GIVING

Thanksgiving is our favorite time of the year. Time flies too fast sometimes, but Thanksgiving is the perfect time to slow down, see your family & friends again, and be happy & thankful for everyone special in your life. We would like to pause for a moment and thank you for your business and support. Without you, we wouldn't be here today.

We'll be raising a glass to you this year, and hope you have a safe, happy, and delicious holiday.

i-CAT™ | Featuring Dr. Steven Olmos

Envision a Future of Freedom with i-CAT™

i-CAT™ FLX V-SERIES

Q & A With Dr. Stuart Frost About i-CAT™

THE MOST COMPREHENSIVE 3D TREATMENT SOLUTION FROM THE MOST TRUSTED 3D IMAGING BRAND

i-CAT Solutions Have Been Installed in More than 6,500 Sites Around the World

i-CAT centers have access to highly specialized service and support, as well as continuing education. We are dedicated to helping dentists and specialists use the latest in cone beam technology.

The 3D Experts
Recognized as innovators in cone beam technology, i-CAT provides unparalleled, highly specialized service and support that can only come through a dedicated 3D team.

As part of the i-CAT community, you have exclusive access to unprecedented educational programs, the vast knowledge of a global community of clinicians, and a world of support with our best-in-class, geographically convenient technical response team.

TELEPHONE SUPPORT

REMOTE ASSISTANCE

ACCESS TO 3D EDUCATION AND TRAINING

RESPONSIVE FIELD SERVICE AND PRODUCT SPECIALIST TEAMS ACROSS THE US AND CANADA

THE i-CAT PHILOSOPHY

Combining highly precise, cone beam 3D technology with procedure-based upgradeable fields-of-view, software and flexible planning and treatment tools, i-CAT FLX V-Series offers a full suite of solutions to meet your practice's needs. As the first upgradeable dedicated CBCT unit, the V-Series can easily grow as your practice needs to expand with the easily upgradeable field of view. You can care for your patients with greater confidence and control than ever before.

SCAN
Clinical Control and Optimized Patient Care

With i-CAT, there's no need to compromise between image quality and patient safety. High resolution, volumetric images provide complete 3D views for more thorough analysis of bone structure and tooth orientation, while flexible scanning options allow you to control the dose and follow ALARA (As Low As Reasonably Achievable) radiation protocols.

PLAN
Powerful, Comprehensive Treatment Tools

More than just a scanner, i-CAT includes powerful, yet easy-to-use, planning and treatment tools to help you take charge of your practice. Designed to streamline your workflow, i-CAT helps you move from scanning to immediate 3D treatment planning in less than 90 seconds.

TREAT™
More Advanced Procedures with Greater Predictability

Start planning immediately and offer an effective course of treatment – from implants to surgical guides and restorations. i-CAT's open software architecture seamlessly integrates with orthodontic, surgical, CAD/CAM, prosthetic, imaging software, and practice management programs, ensuring your practice's capabilities.

EFFICIENT WORKFLOW

Deliver Treatment Plans in Minutes and Increase Office Efficiency

SELECT EFFECT
SELECT DOSE
SELECT SCANNING
SELECT TREATMENT

Less than 90 seconds from scan to plan

i-CAT understands that time is a valuable commodity in the dental office. Our comprehensive 3D imaging solution provides the fastest scan to plan workflow. A full arch, high-quality 3D scan can be obtained in as little as 4.8 seconds, and even complete treatment plans can be completed in a few minutes with the Tx STUDIO software – leaving the office moving quickly while offering excellent care.

SCHEDULE A DEMO

3D COMPUTED TECHNOLOGY

FLX V8

i-CAT FLX V8

The V8 represents your gateway into the world of industry-leading 3D CBCT imaging at an affordable price. With 8cm x 5cm and 8cm x 8cm FOVs, clinicians are able to capture specific areas of the anatomy instead of the entire oral-maxillofacial complex accomplished in one scan. Should the need arise for more coverage of the anatomy, upgrade to the V10 is simple. All V-Series systems use the same capture process, and the scan is viewed within the same 3D software.

Applications

Applications for the i-CAT FLX V8 include single implant, general practice, and endodontics.

Compatible with Tx STUDIO

Tx STUDIO, powered by Anatomage, is an integral part of the fast i-CAT workflow and provides the power of multiple software systems combined into one simple-to-use solution.

i-CAT FLX V10

The i-CAT FLX V10 combines highly precise cone beam 3D technology with flexible planning and treatment tools. i-CAT offers a full suite of solutions to meet your practice's needs. You can care for your patients with greater confidence and control than ever before.

The i-CAT FLX V10 has all the functionality of the V8, such as clinical control, powerful, comprehensive treatment tools, and more advanced procedures with greater predictability. The difference between the V8 and V10 primarily relates to the available fields of view. V10 scan sizes range from an adjustable 8cm x 5cm to 16cm x 10cm.

Applications

Applications for the i-CAT FLX V10 include implant, some OMS, periodontics, upper/lower airway analysis, TMJ, and pediatrics.

Compatible with Tx STUDIO

Tx STUDIO, powered by Anatomage, is an integral part of the fast i-CAT workflow and provides the power of multiple software systems combined into one simple-to-use solution.

i-CAT FLX V17

Designed to accommodate the widest range of clinical applications, the V17 is the most flexible of the V-Series options. The V17 has a maximum and scalable FOV of up to 23 cm x 17 cm. The V17 is used most often by orthodontists, oral maxillofacial surgeons and oral radiologists; however, this system is appropriate for any dentist who wishes to view the entire oral-facial complex.

Applications

Applications for the i-CAT FLX V17 offer the most flexibility and image sizes for all 3D needs including orthodontics, orthognathics, airway analysis, and oral surgery.

Compatible with Tx STUDIO

Tx STUDIO, powered by Anatomage, is an integral part of the fast i-CAT workflow and provides the power of multiple software systems combined into one simple-to-use solution.

AIRWAY ANALYSIS

i-CAT™: Near-end of the new Kavo Imaging Portfolio

Cone Beam 3D Panoramic Dental Imaging System

“In my business, I have to figure out why people hurt and don't breathe. Since orthopedic disorders of the TMJ and facial pain are often the result of breathing disorders, volumetric evaluation of the nasal, nasopharyngeal, velopharynx and hypopharynx are absolute. My i-CAT really gives me this vital information with the lowest radiation dose possible. In fact, the i-CAT FLX does it so much easier with a fraction of the radiation.”

— Steven R. Olmos, DDS
Founder, TMJ & Sleep Therapy Centre International, LLC
La Mesa, CA

For patients with suspected airway or sinus issues, you can use i-CAT scans in software such as Tx STUDIO to review the 3D data and reveal compromised airways – which can be an indication of a sleep disorder.

Assess airway volume at-a-glance using color-coded contour overlays. Quickly trace airways on-screen to perform automatic calculations and measurements of paranasal sinuses to facilitate treatment options.

Additionally, scanning patients while wearing oral appliances can show the effectiveness of the device through changes in airway volume.

* The iCAT FLX device is not intended for the diagnosis of airway disorders such as sleep breathing disorders, OSA and related conditions. The i-CAT cannot be used to make a definitive diagnosis of any disease or condition. It should be used in conjunction with other confirmatory information and diagnosis measures. The i-CAT can provide two-dimensional images and three-dimensional volume reconstructions of the airway for use in planning and diagnostic support in adult and pediatric care. For the full instructions please visit www.i-cat.com/flu.

TMJ

Detect TMJ and Assess Fractures

Direct TMJ assessment for the ability to design effective patient treatment using the TMJ evaluation tool, assess oral and temporomandibular joints to identify areas of concern, and create 3D models to assist with the optimal Restored Design Studio models.

“The i-CAT CBCT allowed me to acquire and process remarkable views of the TMJ quickly, efficiently, and with low radiation dosage for the patient. The patient does not have to leave the office, and we can provide the patient with nearly instant feedback.”

— Steven A. Catterberg, DMD, MD
Neurologist, American Board of Neurological and Sleep Medicine
Houston, TX

Testimonials

"The TMJ & Sleep Therapy mini – residency was a game changer for me in how I evaluate and treat my entire patient base. I've always known there was a "blind-spot" in my evaluation and management of bruxers and patients with facial pain. Dr. Olmos' course taught me more than I could ever imagine about chronic pain, airway and breathing concerns and bruxism. Most important, the material learned is supported by an unimaginable amount of researched literature references."

— Ryan L. Skale, DDS – Chicago, IL

"You will leave this course prepared to treat TMD and Sleep Disordered Breathing at a level you didn't even know existed. No other CE program has delivered results like this one. Dr. Olmos' researched/evidenced based systems added \$1,000,000 of production to our practice within 12 months. This will be the best investment you've ever made in your practice."

— Dr. Daniel Kluener, South Bend, IN

Course Includes:

- ◆ 3 DIGITAL Manuals.
- ◆ One Hour Quarterly Follow Up Webinars for Attendees.
- ◆ All Forms & Documentation are Supplied to Successfully Implement Treatment.

Airway Management

A Solution for our Health Crisis
by Dr. Steven Olmos (Author)

When was the last time you really focused on your breathing? For most of us, it's something that automatically happens without thought or effort. We invest little time or energy in the importance of proper breathing (airway management) for optimum health. Although the medical community is continuously identifying links between airway management and health, we rarely consider that conditions from which people suffer and for which they medicate (diabetes, heart disease, high blood pressure) may very well be improved through a simple understanding and development of airway management.

In this book, Dr. Steven Olmos will discuss healthcare problems that can arise from ignoring the airway's effect on the body for both adults and children.

He will explain:

- Obstructive sleep apnea
- Proper breathing / function of the nose
- Signs and symptoms of sleep-related breathing disorders
- Finding the core problem vs simply treating the symptoms
- Relationship between chronic pain and proper breathing
- Screening by healthcare providers
- Importance of patient awareness

This invaluable exploration of an often overlooked topic is your guide to better health and a better life.

TMJ & Sleep Therapy Centre
INTERNATIONAL

Invites You To Listen To

Dr. Steve Olmos, Founder and CEO of TMJ & Sleep Therapy Centre International discusses the diagnosis, treatment and long term management of sleep disordered breathing, TMD, and chronic pain.

Dr. Steven Olmos has been in private practice for more than 35 years, with the last 30 years devoted to research and treatment of craniofacial pain, temporomandibular disorder (TMD), and sleep-disordered breathing. He obtained his DDS from the University of Southern California School of Dentistry and is Board Certified in both Chronic Pain and Sleep Related Breathing Disorders by the American Board of Crainiofacial Pain, The Academy of Integrative Pain Management, American Board of Dental Sleep Medicine, and American Board of Craniofacial Pain and Dental Sleep Medicine.

SLEEP-RELATED BREATHING DISORDERS & CRANIOFACIAL PAIN

For Adults & Children
A System for Dx and Tx Mini-Residency

48 Hours Lecture
& Participation CE

This comprehensive program will teach you a system for diagnosis and treatment for patients suffering with chronic pain and sleep breathing disorders. Dr. Steven Olmos will walk you through the proper steps and protocols for patient treatment to achieve success. He will teach you to screen and triage structural injuries, sleep breathing disorders and systemic inflammatory conditions. His years of clinical experience and research on these subjects blended with his passion, makes for an eye opening learning environment. The multidisciplinary approach he advocates puts these proven systems in a league where all doctors feel more confident when patients present with Sleep Breathing Disorders and/or Craniofacial Pain.

“The Mini-Residency in Sleep-Related Breathing Disorders & Craniofacial Pain (for adults & children), is a powerful display of new cases, new technologies & live demonstration that cannot be duplicated via video. It must be experienced. This program is a turnkey for implementing a “System” that has been proven all over the world.”

Treating Severe OSA – Versatility is Key

Dental Sleep Practice | Winter 2020

by Steven Olmos, DDS, DABCP, DABCDSM, DABDSM, DAIPM, FAAOP, FAACP, FICCMO, FADI, FIAO, FACD

Sleep disordered breathing (SDB) is comprised of various structural and neural pathologies of the upper airway. Obstructive sleep apnea (OSA) is among the most prevalent forms of SDB. Regardless of disease severity, OSA has a host of metabolic and cardiovascular comorbid conditions. Mild and moderate apnea is often treated with positive pressure devices including APAP, BiPAP, and CPAP. However, 46% to 83% of patients are nonadherent if compliance is defined as usage for 4 or more hours per night.

Orthodontic Practice US (Volume 10 Number 2) | April 2019

by Steven Olmos, DDS, DABCP, DABCDSM, DABDSM, DAIPM, FAAOP, FAACP, FICCMO, FADI, FIAO, FACD

Dr. Steven R. Olmos explores high-tech solutions to treatment problems.

Chronic pain and breathing disorders can be effectively treated with various technologies that take the frustration out of treatment for both the clinician and the patient. Check out the variety of technologies that help Dr. Steven Olmos treat these disorders.

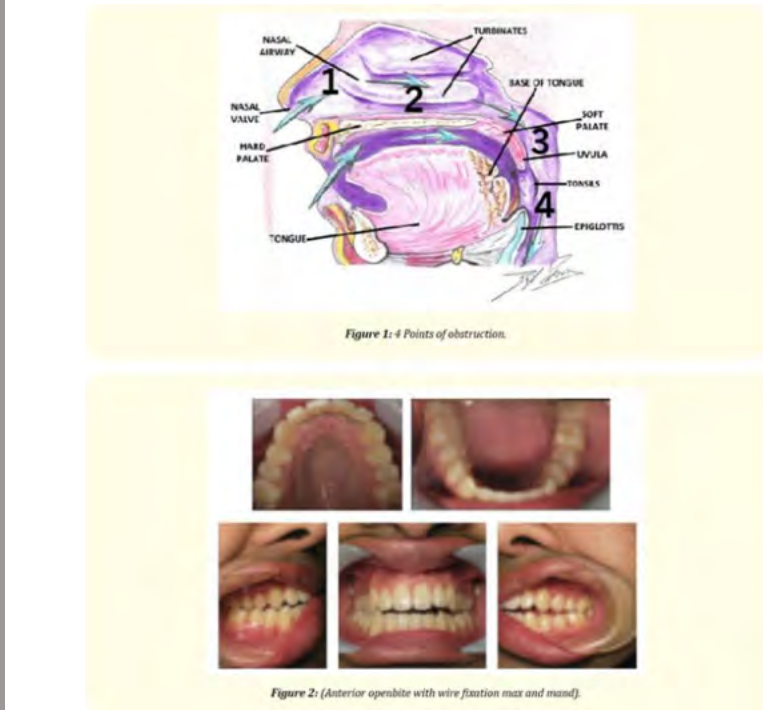

Educational aims and objectives:

This clinical article aims to discuss how to treat chronic pain and breathing disorders with technology.

Expected outcomes:

- Recognize how 3D imaging can be beneficial for evaluation of chronic pain and breathing disorders.
- Realize the role that low-level laser therapy can play in chronic pain treatment.
- Realize how orthodontic appliance therapy can help in treatment of chronic pain, sleep-breathing disorders, and orthopedic/orthodontic therapy.
- Identify some testing methods for these chronic pain and breathing disorder issues.

Improved Nasal Volume Utilizing Hyperosmotic Saline Xylitol Mixture (Effective Alternative or Adjunct to Decongestants and Antihistamines)

ECronicon Open Access – EC Pulmonology and Respiratory Medicine | April 2019

by Dr. Steven R. Olmos & Dr. Joseph Baba

This paper quantifies the reduction of soft tissue hypertrophy of the nasal complex resulting in an increase of nasal volume and increased flow using a mixture of Xylitol and Saline. The health benefits of improved nasal breathing through increased inspired nasal NO (nitric oxide) and the antimicrobial benefits of Xylitol are discussed. Restoration of functional breathing (nasal) and it's relation-ship to up righting head posture is reviewed.

The AACFP in collaboration with Dr. Judith Owens, Dr. Edmund Liem and Dr. Rakesh Bhattacharjee are asking for donations to the Pediatric Screening Tool Fund.

Validating this form will help more offices identify children potentially suffering from a sleep breathing disorder!

This fund helps support the pilot study engineered by Dr. Judy Owens, Dr. Edmund Liem and Dr. Rakesh Bhattacharjee which will streamline the diagnosis of childhood obstructive sleep apnea (OSA) - a disease that disproportionately affects minority populations. Although OSA wasn't officially recognized in children until the 1970s, an estimated 2.25 million children have OSA. OSA can lead to lasting issues with both cardiovascular and metabolic functions.

By homogenizing the process of identification and diagnosis both dentally and medically, many more children will receive the help they need.

MONTHLY COMPLIMENTARY WEBINARS SCHEDULE

Our monthly complimentary webinars are for the dentists with an interest in helping patients both adults and children achieve a higher level of health. Watch monthly as our experts share their vast knowledge on subjects related to craniofacial pain, sleep breathing disorders, OSA, orthodontics and more. Packed with real patient data on diagnosis, treatment and care, these webinars will open your eyes to a whole new world of dental medicine.

Each program will present the most current literature-based techniques and procedures with references to additional reading materials to expand your knowledge!

Diamond Orthotic Lab - Digital Lab Rx

Wednesday, February 17, 2021
5:00 PM - 6:00 PM PDT

Live Complimentary Webinar

FEATURING:

Matt Rago

Director of Operations at Diamond Orthotic Laboratory International

Matt will review the Lab Rx and website portal

DOCTORS & THEIR TEAM WILL LEARN:

- Recognize all the different components of the Lab Rx
- Recognize all the different components of the website portal
- How to fill out the Lab Rx
- How to use the website portal

[REGISTER TODAY](#)

Cracked and Crooked Teeth? What You Could Be Missing

Thursday, February 18, 2021
12:00 PM - 1:00 PM PDT

Live Complimentary Webinar

1 CE FREE

FEATURING:

STEVEN OLMOS, DDS

DABCP, DABCDMS, DABDSM, FAAOP, FAACP, FICCMO, FADI, FIAO, FACD, FPFA

Dr. Olmos will review why you are seeing crooked and cracked teeth in your patients. He will review symptomology of TMD and Sleep breathing disorders and help you to identify patients suffering with these conditions in your practice.

DOCTORS & THEIR TEAM WILL LEARN:

- Identify patients that may have an underlying issues.
- Screen for sleep breathing disorders.
- Understand symptomology of OSA and TMD.

[REGISTER TODAY](#)

Pediatric Screening Tool Webinar

Friday, February 19, 2021
12:00 PM - 12:30 PM PDT

PRE RECORDED

FEATURING:

STEVEN OLMOS, DDS

DABCP, DABCDMS, DABDSM, FAAOP, FAACP, FICCMO, FADI, FIAO, FACD, FPFA

Dr. Olmos will provide an update on the research project on validating a screening tool for Pediatric Sleep Breathing Disorders in collaboration with Rady's Children's Hospital in San Diego and Boston Children's hospital.

FEATURING:

Lorin Berland DDS, FAACD

Founder - Dr. B Dental Solutions

Lorin Berland, DDS, was an internationally acclaimed cosmetic dentist and one of the most published authors on clinical dentistry. With well over 100 articles, the best-selling Lorin Library Smile Style Guide as well as instructional videos, Dr. Berland has made a lasting impact on dental education. Dr. Berland was the 1st Fellow of the AACD, included in the Top 100 CE Leaders for 19 consecutive years and was even recognized by the AACD for "Outstanding Contributions to the Arts & Science of Cosmetic Dentistry". Dr. Berland created the original Dental Spa concept and the multi-specialty group practice. His unique approach to dentistry has been featured in major national print and TV publications, such as 20/20, Time, Town & Country, Reader's Digest, and GO.

Dr. B began his career as a denture technician, and after more than 35 years of listening to patients, he retired to start Dr. B Dental Solutions with a full line of products specifically designed to treat the common yet serious issues affecting the daily lives of people with oral appliances- Oral Infections and Dry Mouth- which are not addressed by major brands. His website DrBDentalSolutions.com is also a great source of useful information on oral appliances and hygiene tips for patients. His new informative & interactive website, www.DrBDentalSolutions.com, connects people missing teeth &/ or terminal dentition with top dental professionals.

Dr. Berland will educate dental professionals on the importance of educating their patients about proper oral hygiene with all removable dental prosthetics and oral appliances. This is crucial to successful treatment, patient satisfaction, and overall health.

DOCTORS & THEIR TEAM WILL LEARN:

- The best, most up to date methods to clean, disinfect, and maintain removable oral appliances & dental prosthetics, as well as their patients long term health.

STUDY CLUB SCHEDULE

*(Virtual sessions for 2021 will meet the
last Thursday of the month, except November)*

JANUARY

"Welcome and Introduction"

[Steven R. Olmos, DDS, DABCP, DABCDMS, DABDSM, FAAOP, FAACP, FICCMO, FADI, FIAO, FACD, FPFA](#)

FEBRUARY

"Anatomy"

[Shab Krish, DDS, MS, DABCP, DABCDMS](#)

Dr. Shab Krish, Centre Director, is passionate about helping people and improving their quality of life. As a double specialist in both Periodontics and Endodontics, she founded Associates in Periodontics, Implantology and Endodontics and has been serving the Lewisville, Flower Mound, Denton, and surrounding North Texas communities for over 25 years.

Because she suffered from Temporomandibular Disorder (TMD) pain herself, she started to study TMD, Sleep Disordered Breathing, and Craniofacial Pain. She now has about 10,000 Continuing Education credits in the field, including board certifications with the American Academy of Craniofacial Pain and the American Board of Craniofacial Dental Sleep Medicine.

After learning how to relieve her own pain and improve her sleep, Dr. Krish decided to devote all of her time to exclusively treating TMD, Craniofacial Pain, and sleep disorders by opening the TMJ & Sleep Therapy Centre of North Texas.

Education:

- Marquette University Dental School, Milwaukee, Wisconsin
- Masters of Science in Periodontics, University of Texas Health Science Center at San Antonio
- Endodontic training, University of Texas Health Science Center at San Antonio
- Surgical training from Misch International Implant Institute in Implantology and Advanced Bone Grafting
- TMJ training through the American Academy of Craniofacial Pain, Dental Sleep Medicine at the University of California Los Angeles
- Steve Olmos TMJ and Dental Sleep Medicine Mini-Residencies

MOTOR NERVE REFLEX TESTING

A Hands-On Program For Finding Structural Injury

16 Hours Lecture & Participation CE

TMJ & Sleep Therapy Centre INTERNATIONAL

"As doctors treating pain, sleep breathing disorders and other conditions, we are always looking for tools to assist us in elevating our diagnostic skills. In my 33 years of treating patients, the most reliable testing I have ever used is without questions, the patient's own neurology! Therefore, Motor Nerve Reflex Testing has been a staple in the diagnosis and treatment of orthopedic problems throughout our medical community as well as over 60 TMJ & Sleep Therapy Centres spanning 7 countries. This is the most exciting course I teach! Without Motor Nerve Reflex Testing, I could not practice at the level I do today. I look forward to sharing this diagnostic skill with you."

– Steven Olmos DDS,
TMJ & Sleep Therapy Centre International Founder & CEO –

Proper diagnosis is 95% of effective treatment.

Chronic pain is the most difficult diagnostic puzzle the body can present. One acute injury unresolved or un-healed results in plastic changes to the central nervous system (CNS) and adaptive postures that result in mechanical overload and breakdown of basic and necessary function of the organism.

The value of MNRT is that it gives us the priority of injuries for each individual based on survival instincts. There are many ways to evaluate injuries, however only MNRT gives us the order in which to treat.

STRATEGIC PARTNERS SPOTLIGHT FEATURING

MYOFUNCTIONAL RESEARCH CO.

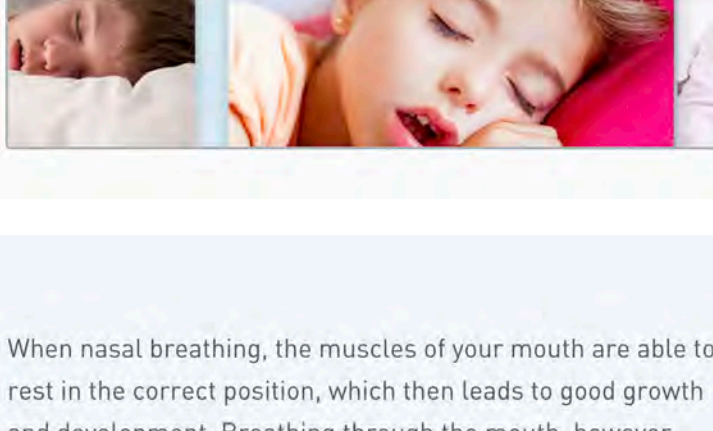

Correcting Breathing Habits for the Last 25 Years

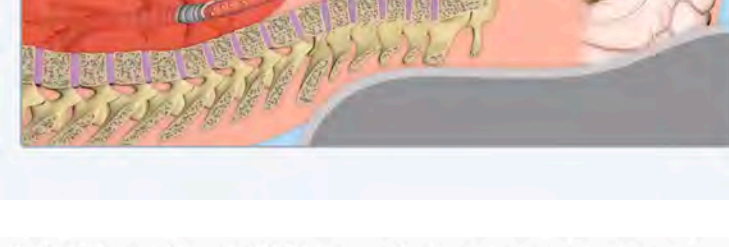

The importance of learning MRC's philosophy

We are currently facing a global healthcare crisis

A new challenge has been emerging for medical and dental practitioners since before the turn of the century. Research shows that up to 90% of children will develop malocclusion and the majority of them will also develop an airway disorder. While millions of people suffer from TMJ disorders, it is estimated that well over one billion people worldwide are suffering from airway disorders, with the majority going undiagnosed. Meanwhile, the healthcare system is doing very little to prevent this far-reaching and growing epidemic.

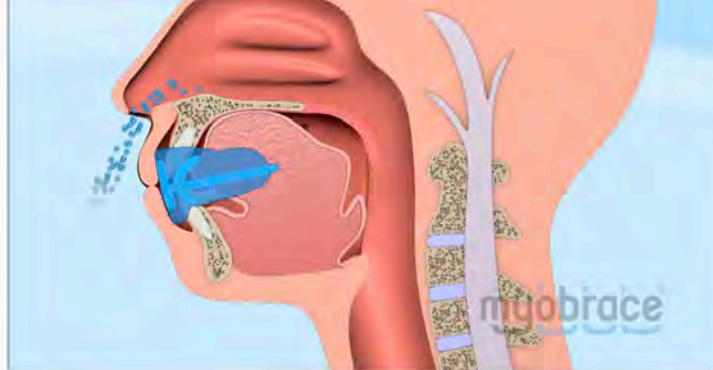

The airway is the missing link

When nasal breathing, the muscles of your mouth are able to rest in the correct position, which then leads to good growth and development. Breathing through the mouth, however, changes the position of your facial muscles and this has been proven to lead to an array of dental issues, including poor facial growth, crowding of the teeth and TMJ disorders. Mouth breathing is also recognised by the medical community as a subset of Sleep Related Breathing Disorders (SRBD) which have a significant negative impact on health.

MRC simplifies the treatment

Most treatments temporarily manage the symptoms of these problems and have risks, limitations and side effects. MRC's treatment systems present a better way of treating the underlying airway and muscular causes of these problems by rehabilitating the patient in a simple and non-invasive way. Aside from the dental benefits, a correctly functioning airway carries with it a myriad of other health benefits as well.

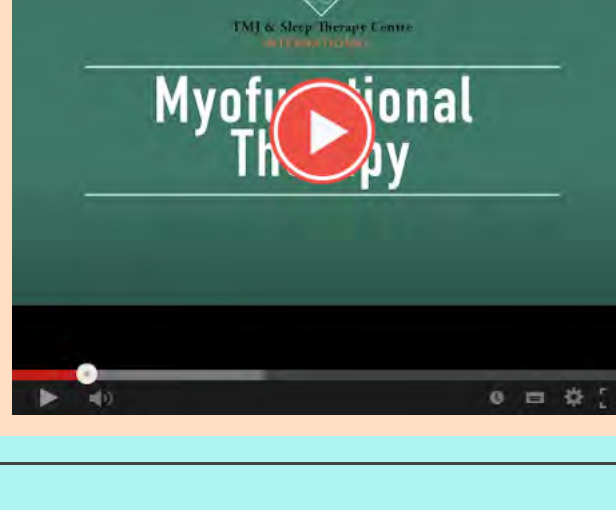

Join the movement

The current prevalence of sufferers and the increasing demand for better alternatives means that there is no shortage of people requiring treatment. Practitioners are constantly looking for new ways to broaden their skill set so they are able to help more patients. In very little time, MRC's online education teaches you to use our systems and differentiate yourself from other practitioners by providing the type of treatment that more and more patients are seeking.

Dr. Karina Patel from our TMJ & Sleep Therapy Centre of London, UK explains Myofunctional Therapy and how to find a trained specialist.

MRC's Online Courses World-Class Education Anywhere, Anytime

Browse through our wide range of online courses covering a variety of topics, starting at the introductory level and progressing to the advanced subjects. Use the Course Topics menu to navigate to the course you are interested in.

In-House Training MRC's treatment systems taught by distinguished presenters

MRC's training programs provide practitioners and their staff with the necessary theoretical and practical knowledge for the treatment of malocclusion, breathing dysfunction and TMJ disorders. Our accredited online training and in-person courses allow you to learn and implement at your own pace.

In-house Courses and Events

Our in-house courses and events provide you with the opportunity to learn and receive hands-on training from the world's leading experts on MRC's treatment systems. Take a hands on approach to learning and register your interest today for an upcoming course in your region.

Myobrace Certified Educator Mini-Residency!

Myobrace Educator Mini-Residency

Thu, March 4 2021 - Sat, March 6 2021
Four Points by Sheraton Bellingham (Washington)

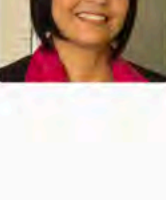

About the Course:
The Myobrace Certified Educator Mini-Residency course includes the basics in anatomy and physiology of the orofacial musculature. This is an exciting opportunity to learn from the world's pre-eminent experts in the field and gain insight into the only myofunctional system that has been successfully integrated into dental, orthodontic, TMD and sleep practices in over 100 countries worldwide.

Course Topics:

- History of myofunctional therapy and traditional myofunctional techniques.
- Functional anatomy and physiology related to breathing and orofacial musculature.
- Myobrace® Activities intensive workshop and troubleshooting.
- Live patient observation in the world's largest myofunctional practice.
- How to conduct a proper consultation and evaluation of myofunctional disorders.
- Case studies.
- Habit elimination (e.g., thumb sucking).
- Latest research and exercises related to Sleep Disordered Breathing (SDB) and sleep apnea.
- How to conduct a Myobrace® Educator (ME) Check, a myofunctional evaluation form completed at each appointment to accurately quantify improvement, thereby determining progression of treatment.
- How to conduct an activity support session, a special myofunctional troubleshooting appointment for if treatment is not progressing as expected.
- Hands-on record taking (including photos and video).

Key Presenters

Dr. Ana Lorena Gómez

Dr. Ana Lorena Gómez has practiced general dentistry for 27 years. Her practice was exclusively orthodontics for 17 years, however, she incorporated The Myobrace® System as a regular treatment for her patients in 2008. This resulted in an increase in the number of patients treated and better results in stability of cases and facial harmony. Dr. Gómez shares her experience of how she changed the way of doing the initial diagnosis, incorporating myofunctional evaluations and, in doing so, was able to address the problem of bad function earlier and as part of an integral preventive orthodontic treatment, changing the way the delivery of care was given.

Kelly Baker

RDH, DMFT

Ms. Kelly Baker began her career as a chairside dental assistant in high school and went on to become a registered dental hygienist. She furthered her education in the dental field by learning more about critical applications of techniques and obtaining her local anesthesia permit in 2008. She attended an ADA course to become a myofunctional therapist in October of that same year. After spending 19 years practicing as a RDH and DMFT, she took up a role as the lead US educator with MRC where she has been able to express her passion of belief in myofunctional therapy.

The AACFP in collaboration with Dr. Judith Owens, Dr. Edmund Liem and Dr. Rakesh Bhattacharjee are asking for donations to the Pediatric Screening Tool Fund.

Validating this form will help more offices identify children potentially suffering from a sleep breathing disorder!

This fund helps support the pilot study engineered by Dr. Judy Owens, Dr. Edmund Liem and Dr. Rakesh Bhattacharjee which will streamline the diagnosis of childhood obstructive sleep apnea (OSA) - a disease that disproportionately affects minority populations. Although OSA wasn't officially recognized in children until the 1970s, an estimated 2.25 million children have OSA. OSA can lead to lasting issues with both cardiovascular and metabolic functions.

By homogenizing the process of identification and diagnosis both dentally and medically, many more children will receive the help they need.

DONATE TODAY

NEW IN 2021

For the first time ever, the 2021 Spring TMJ & Sleep Therapy Centre Mini Residency will be streamed LIVE on You Tube. This will be available only to International attendees at a reduced rate. You will still receive all manuals and course paperwork via a dropbox link. You will be able to ask questions during the meeting and connect with the other attendees in a Facebook Group!

50% off Course Fees

If you are able to attend the live stream, we are taking 50% off the registration fee. This is only for International Attendees.

SESSION #1 April 23-24, 2021

Live Stream on You Tube | Once your registration is processed, you will receive a unique log in link to view the stream.

DOCTORS WILL LEARN:

- Screening SBD, Sleep Disordered Breathing, OSA, Craniofacial Pain.
- How to Find CR.
- Imaging: CBCT, MRI Interpretation (*Your Cases*).
- Electrodiagnostics: JVA.
- Motor Nerve Reflex Evaluation (*Neural & Orthopedic Screening*).
- Anatomy Head and Neck.
- Airway and TMJ Neuroanatomy.
- Diagnosis and Treatment Planning.

REGISTER TODAY

SESSION #2 May 14-15, 2021

Live Stream on You Tube | Once your registration is processed, you will receive a unique log in link to view the stream.

DOCTORS WILL LEARN:

- Sleep Disorders.
- Triage of SleepAppliance Therapy.
- Headaches.
- Recapturing Discs.
- Orthotic Design& Indications.
- Pharmacology.

REGISTER TODAY

SESSION #3 June 11-12, 2021

Live Stream on You Tube | Once your registration is processed, you will receive a unique log in link to view the stream.

DOCTORS WILL LEARN:

- Sleep Disorders that Cause TMJ Pain.
- Neuropathic Disorders.
- Typical and Atypical Neuralgias.
- Musculoskeletal Pain.
- Physical Medicine Modalities.
- Orthodontic/Orthopedic, Removable and fixed prosthodontics treatment for facial/jaw pain and breathing disorders.
- Nutrition.
- Pediatric OSA (*Treatment Options*).
- Myofunctional Therapies and Myobrace.

REGISTER TODAY

COURSE INCLUDES

You Will Receive All Manuals & Course Paperwork Via a Dropbox Link.

One Hour Quarterly Follow Up Webinars for Attendees.

3 DIGITAL Manuals

All Forms & Documentation are Supplied to Successfully Implement Treatment.

STRATEGIC PARTNERS SPOTLIGHT FEATURING

Advancing Health
Through Better Sleep

BRAEBON

Over the past 20 years, BRAEBON has evolved into a single-source provider of high-quality PSG sensors, accessories, Home Sleep Testing (HST) systems, sleep sensors, and software solutions for sleep medicine.

BRAEBON Medical Corporation is a proud North America leading designer, manufacturer and distributor of diagnostic home sleep apnea recorders, high quality diagnostic sleep sensors, accessories, Intraoral therapeutic appliance compliance micro-recorder and software solutions. Our product line includes: MediByte®, MediByte Jr®, DentiTrac®, patient consumables and accessories.

BRAEBON is aware that you have a choice when purchasing diagnostic and therapeutic HST equipment. Our commitment to you is to provide exactly what you need. We have developed a unique combination of over 140 products at the forefront of technology for today's busy environment of sleep medicine. Our products are of the highest quality, easy to use, reliable and well-supported.

In addition to our high-quality products, BRAEBON offers clients unparalleled after-sales support with industry-leading warranties, technical support and our helpful Rapid Replacement Program.

BRAEBON is an ISO 13485 and CE-compliant company with an international customer base. Our products are used on six continents and comply with: U.S.FDA, Health Canada, European CE, IEC 60601 and Australian TGA standards.

LIVE EVENTS: April 8–10, 2021

COURSES BY SPEAKER

ODA COURSE

TOPIC: OCCLUSION/TMD

Craniofacial Pain, Headaches, TMD, Apnea Answers for Children and Adults

RECOMMENDED FOR **DENTISTS** **HYGIENISTS** **ASSISTANTS**

COURSE NUMBER **5128** CE CREDITS **2**

Since 2005, oral appliances have been outlined as a primary treatment for mild and moderate obstructive sleep apnea (OSA) by the American Academy of Sleep Medicine in their published Practice Parameters. It is recommended that 25% of the American population be screened for sleep disordered breathing (SDB); to date, 50% of SDB has not been diagnosed. The most recognizable symptom of SDB is bruxism and the most common treatment of bruxism is a nightguard. Current literature demonstrates that nightguards for patients with apnea make their condition 50% worse 40% of the time.

At the conclusion of this course, attendees will be able to:

- Identify signs and symptoms of SDB and OSA in your patients
- Understand how and why there are no age boundaries of conditions
- See why the need for a comprehensive evaluation of symptoms is necessary for successful treatment
- Be an integral part of the multidisciplinary team in treating patients with oral appliances for the treatment of OSA and other SDB
- Identify types of treatments available for children and adults

Steven Olmos, DDS
Dr. Olmos has been in private practice for more than 30 years, with the last 20 years devoted to research and treatment of craniofacial pain and sleep-related breathing disorders. He obtained his DDS from the University of Southern California School of Dentistry and is board certified in both chronic pain and sleep breathing disorders by the American Board of Craniofacial Pain, the American Academy of Pain Management, American Board of Dental Sleep Medicine, and American Board of Craniofacial Pain and Dental Sleep Medicine. Dr. Olmos is the founder of TMJ & Sleep Therapy Centre International, with over 60 licensed locations in seven countries dedicated exclusively to the diagnosis and treatment of craniofacial pain and sleep disorders. He is the immediate past president of the American Academy of Craniofacial Pain and continues to lecture and educate internationally. conduct of interest disclosure: Dr. Olmos is the owner of the Olmos Clinical Laboratory.

ODA COURSE

TOPIC: OCCLUSION/TMD

SDB and TMD in the Dental Practice *Screening, Diagnosis, and Treatment*

RECOMMENDED FOR **DENTISTS** **HYGIENISTS** **ASSISTANTS**

COURSE NUMBER **5129** CE CREDITS **2**

Thirty-three percent of the men and 18% of the women in your dental practice have Sleep Disordered Breathing (SDB). Eighty to ninety percent of these patients are undiagnosed. Over 60% of diagnosed patients remain untreated, because they won't use CPAP. Physicians use CPAP as their main form of treatment, and no other non-invasive treatments. Only dentists can make oral appliances for these patients. Physicians are now asking dentists to participate in the treatment of SDB. Headaches and facial pain (craniofacial pain) have a high co-morbidity with SDB. In this course, you will learn how to effectively screen, diagnose, and treat both.

At the conclusion of this course, attendees will be able to:

- Learn the signs of SDB you should be looking for in your dental patients
- Triage sleep disorders and TMD/craniofacial pain
- Learn how to take a bite registration (day and night) for oral appliances
- Develop the proper treatment options for sleep Disordered breathing and TMD/OSA
- Oral appliance determination
- Understand how to perform a comprehensive examination for either condition
- Know the proper data to collect and its importance

SPEAKERS

TMJ Fundamentals Course

TMJ Fundamentals offers a comprehensive overview of the latest advancements in the study of TMJ. Recommended for DVMs and DMDs looking to elevate their specialized skills in TMJ. Centered around heightening understanding of TMD and craniofacial pain, sleep related breathing disorders and the power of nutrition. This course will improve your patient(s) quality of life through instruction on recognizing TMD, jaw joint identification, patient screening for sleep disorders, recognizing comorbidities and more.

The Fundamentals of Craniofacial Pain & Sleep Therapy: Back to Basics Course will take place on Thursday, August 5, 2021 from 12:30pm - 5:00pm. Once completing the workshop, you will easily transition to the Main Scientific Program starting Friday morning.

Schedule

Time	Title	Speaker
12:30PM - 1:30PM	Understanding Craniofacial Pain	Edmund Liem, DDS
1:30PM - 2:30PM	Closed Lock Temp Solution	Brandon Brunner, DDS
2:30PM - 2:45PM	Coffee Break	
2:45PM - 3:45PM	OSA	Gary Demerjian, DDS, FAACP, DAAPM, FICCMO
3:45PM - 4:45PM	Mouth: Night Guard, Why We are Cautious	Farshid Ariz, DMD
4:45PM - 5:00PM	Q&A

139 East Kilbourn Avenue, Milwaukee, WI 53202

Expert
Doctors

Expert Live Panel

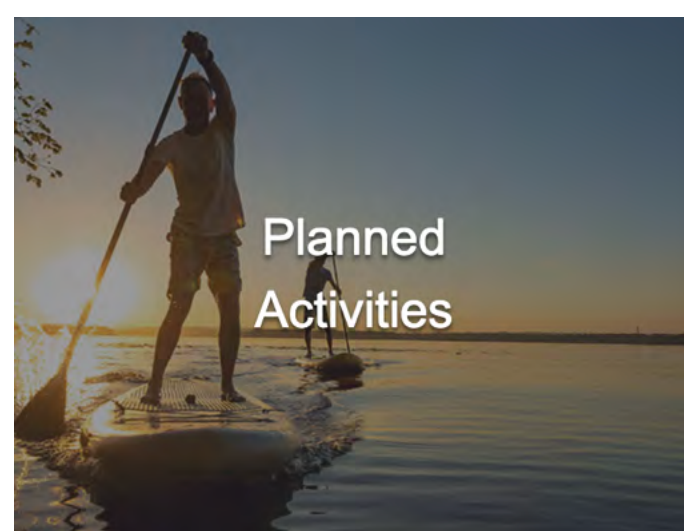

While all of our speakers and attendees have strong opinions about their own treatment philosophy, we believe that EVERY clinician who objectively diagnoses before he or she treats patients is ultimately on the same side.

Mentoring
Sessions

Mentor Appointments

This has been a very well received activity that we are extremely proud to offer our clients. Sit down with John Radke, Mike Smith, Greg Kamyszek, Dr. Kerstein, Ray Becker, and others one-on-one and ask them anything.

Planned
Activities

Events/Activities

There will be fun activities and events planned for evenings and at your whim. Milwaukee has some of the finest museums, sports venues, and Lake Michigan offering endless opportunities outside of the conference.

Invited Speakers

Steven R. Olmos, DDS

DABCP, DABCDISM, DABDSM, FAAOP, FAACP, FICCMO, FADI, FIAO, FACD, FPFA

Dr. Olmos has been treating Craniofacial Pain and Sleep Disordered Breathing for 25 years. Through that time he's continued to evolve and adapt better techniques and better treatments. Dr. Olmos will show cases that he treated 20 years ago and talk about how he would do them differently today and where he sees the future of dentistry evolving.

Daniel Klauer, DDS

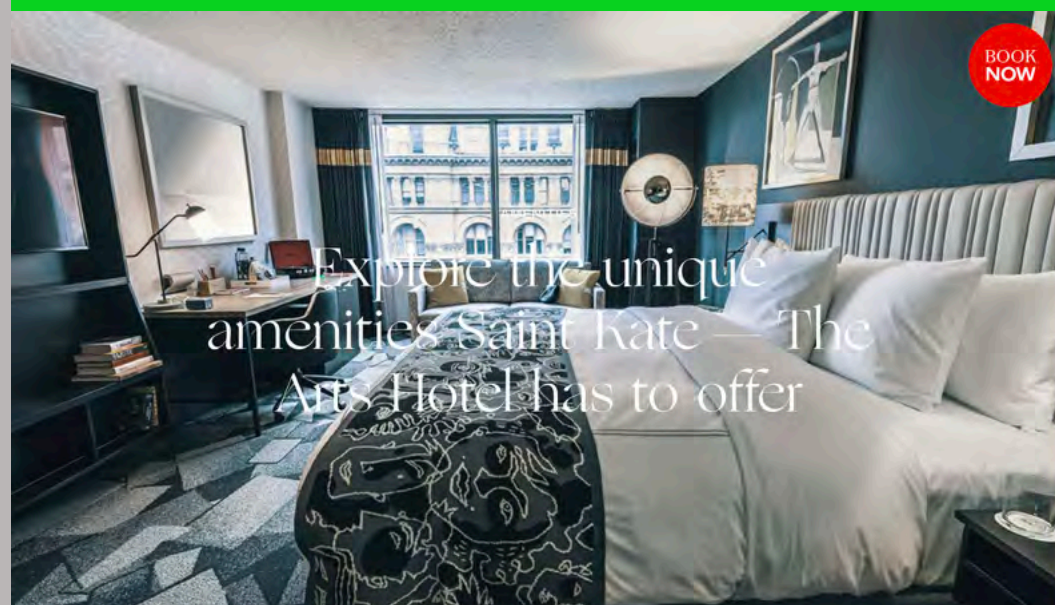

DABCP, DABCDISM, DABDSM

Step by step presentation to start a TMD and Sleep Practice. Dr. Klauer will outline everything from where to get a clinical education to business protocols to starting a TMD and Sleep practice. Also, where should your patients be coming from and how to stand out and make a name for yourself as a dentist in your community.

Dr. Ben Sutter, Dr. Curtis Westersund, Dr. Robert Kerstein, Dr. Marcelo Freire Matos, Dr. Brock Rondeau, Dr. John Droter and Dr. Ray Becker.

THINGS TO DO & PLACES TO VISIT

2023 SPRING MINI RESIDENCY

3 SESSION COURSE | 48 CE CREDITS

SESSION 1 | APRIL 21-22, 2023

Austin, TX | 8:00AM - 5:00PM

- Screen SBD, Sleep Disordered Breathing, OSA, Craniofacial Pain
- Find CR
- Interpret CBCT and MRI Imaging
- Perform Electrodiagnostics: JVA
- Use Motor Nerve Reflex Evaluation (Neural and Orthopedic Screening)
- Understand Head and Neck Anatomy Understand Airway and TMJ Neuroanatomy
- Diagnose and Plan Treatment

SESSION 2 | MAY 19-20, 2023

Austin, TX | 8:00AM - 5:00PM

- Evaluate Sleep Disorders
- Triage Sleep Appliance Therapy
- Understand the different types of headaches
- Recapture Discs
- Chose Orthotic Design & Indications
- Understand Pharmacology

SESSION 3 | JUNE 23-24, 2023

Austin, TX | 8:00AM - 5:00PM

- Understand how Sleep Disorders cause TMJ Pain
- Understand Neuropathic Disorders
- Understand Typical and Atypical Neuralgias
- Understand Musculoskeletal Pain
- Understand Physical Medicine Modalities
- Use Orthodontic/Orthopedic, Removable and fixed prosthodontics treatment for facial/jaw pain and breathing disorders
- Create a Nutrition Plan
- Treat Pediatric OSA
- Use Myofunctional Therapies and Myobrace

TMJ & Sleep Therapy Centre INTERNATIONAL

INVITES YOU TO

The American Academy of Craniofacial Pain is hosting their 37th Symposium in Spokane, WA. Featuring top industry speakers, critical continuing education, and engaging networking opportunities. The AACP Clinical Symposium is the most effective (and enjoyable) way specialized dentists can continue their education and expand their knowledge.

VIEW SCHEDULE

SPEAKERS

The American Academy of Craniofacial Pain strives to bring you speakers that will not only inspire and educate your team, but also, those who have true passion for their field and a desire to share their expertise.

Speakers include: Rani Ben-David, Steven D. Bender, DDS, Wade Cooper, DO, Barry Glassman, DMD, David Hatcher, DDS, Kevin Mueller, DMD, and many more.

ALL SPEAKERS

PRE-CONFERENCE BONUS SESSION RADIOLOGY

Bonus Session: The Pre-Conference Session - Radiology is ideal for those who want to enhance their existing knowledge of imaging protocols and methods. The pre-conference is filled with informative sessions designed to ensure dental professionals can accurately identify key TMJ, airway anatomy and design imaging studies that will fulfill all goals.

Dr. David Hatcher is an imaging professional that will provide participants with the in-depth expertise that is critical to make certain patients are receiving the highest quality care. The imaging focused information will aid the dental professional in fully understanding their patient's imaging.

Attendees will leave the pre-conference being able to evaluate cases containing TMJ anomalies that have influenced occlusion and facial growth as well as being able to identify airway anomalies that associated with facial growth and occlusal deficiencies.

Bonus Session: The Pre-Conference Bonus Session will take place on Thursday, August 11, 2022 from 1:00pm - 4:40pm. Once completing the workshop, attendees will easily transition to **On Common Ground: TMJ Art vs. Science**, starting Friday morning.

REGISTER

If you have not joined the American Academy of Craniofacial Pain - now is the time! Join this distinguished group of like-minded doctors focused on non-invasive therapies.

MOTOR NERVE REFLEX TESTING

A HANDS-ON PROGRAM FOR FINDING STRUCTURAL INJURY

16 HOURS LECTURE &
PARTICIPATION CE

November 13-14, 2022

Hyatt Regency Mission Bay Spa and Marina

San Diego, CA

COURSE OBJECTIVES:

- Learn how to treat cause instead of chasing symptoms
- Learn a reproducible SYSTEM for screening and triaging of structural injuries
- Learn how to identify and handle dual primary problems
- Know when to refer and who to refer to
- Learn how being the director of patient care gets you results in treatment
- Learn what to do when the patient is still symptomatic
- Understand the difference between Neural Reflex Testing and Kinesiology (Muscle) Testing and when to use one over the other

COURSE INCLUDES:

**2 Full Days of
Lecture &
Hands-On
Instruction**

**Instructional
Videos & Step-
by-Step Manual**

**Protocol
Flowcharts**

DIRECTED BY:

INTERNATIONAL EDUCATOR

DR. STEVEN OLMOS, D.D.S.

MRC Global Summit
August 29, 2022 - September 2, 2022
MRC International Training Facility, USA

MRC Global Summit

OVERVIEW

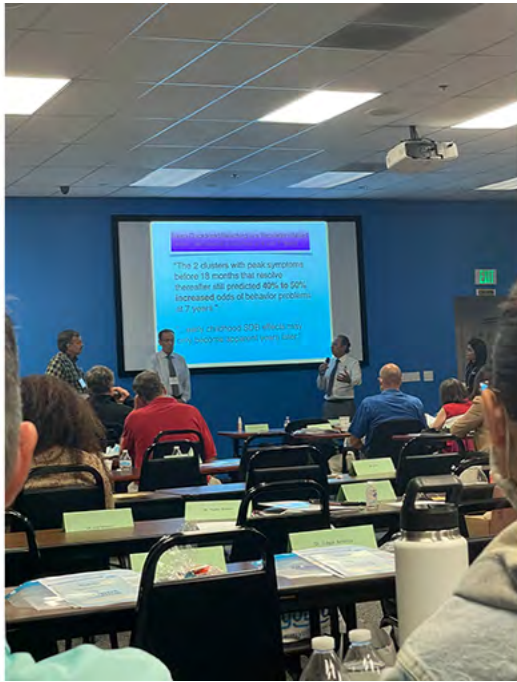

MRC's Global Summit will teach you the myofunctional evaluation system that identifies breathing and myofunctional problems limiting facial growth and causing malocclusion, as well as provide you with the ability to treat myofunctional problems evident in almost every child.

The five-day summit includes workshops on how to diagnose and treat airway dysfunction, TMJ Disorder and malocclusion, as well as advanced orthodontic and expansion techniques. *MRC* CEO & Founder, Dr. Chris Farrell, will be a key presenter, along with leading myofunctional orthodontic practitioners.

FEATURING

Dr. STEVEN OLMOS
Speaking September 1, 2022
Starting at 8:30am

AGENDA

- Pediatric sleep evaluation & treatment with *The Myobrace®System*;
- Identifying breathing and myofunctional disorders as a causative factor in malocclusion, orthodontic relapse and OSA in adults;
- *Myobrace®* protocols and cases;
- Implementing *Myobrace®* into the pediatric practice with a health focus;
- Learning *The Myobrace®System* from the *Myobrace®* website;
- *Myotalea®* appliance;
- Implementing the sleep appliances;
- Billing;
- Clinic tours;
- TMJ disorder, anxiety and breathing disorders;
- Ankyloglossia in pediatric patient;
- Adult sleep apnea: diagnosis and treatment protocols for the ENT;
- Myofunctional Orthodontic Evaluation (MOE), compliance and activities;
- Approaching breathing, orthodontic and TMJ problems from the perspective of world leading experts;
- The orthotropic approach to facial growth;
- Airway and the Role of the orthodontists in complete health;
- Demystifying the evaluation and diagnosis of TMJBDS (TMJ, Breathing and Disordered Sleep);
- Muscle and joint palpation;
- Malocclusion caused by incorrect myofunctional habits and how to reconcile the problem;
- The keys of myofunctional orthodontics when addressing Class III;
- Pediatric BDS treatment.

PREVENTING COMPLICATIONS IN ADULTHOOD STARTS WITH PEDIATRICS

In celebration of its 5th Annual year, Dr. Klauer is bringing the 2022 Sleep Symposium HOME to South Bend! Formerly the Pediatric Sleep Symposium, this year's event features a lineup of incredible speakers who's work, research, and findings have laid an unbreakable foundation for our industry. Join us to learn from these physicians, dentists, and other healthcare providers who are leading the way in collaboration to diagnose and treat patients suffering from pain, sleep, and airway symptoms. Take advantage this opportunity to learn from and network with the most brilliant minds in the industry, not to mention this is the most fun way to earn 13 CEs!

WHAT WE'LL ACCOMPLISH

01.

EDUCATE

This event educates physicians and dentists about the silent epidemic of poor sleep in children and the subsequent quick turn to medications when proper breathing and sleep can often restore and solve these problems.

03.

COLLABORATE

Dentistry and Medicine must work together. Here, you will engage, collaborate, and network with industry leading experts and other likeminded providers on how we can work together to solve the airway epidemic.

02.

INFORM

Because this content isn't common knowledge across healthcare fields, it is up to us to educate our networks on the importance of screening, proper diagnosis, and treatment of pain, sleep, and airway symptoms.

04.

TREAT

Leave with the confidence to treat your patients' symptoms and identify airway issues in pediatric patients to prevent much larger problems in the future.

REGISTER

SPEAKER LINEUP

FEATURING: COACH LOU HOLTZ

WE ARE HONORED TO WELCOME LOU HOLTZ - FORMER HEAD COACH OF THE IRISH AND ONE OF THE MOST SUCCESSFUL COLLEGE FOOTBALL COACHES OF ALL TIME - AS OUR KEYNOTE SPEAKER!

In his 11 seasons at Notre Dame, Holtz chalked up an overall 100-30-2 mark -- his accomplishments have positioned him alongside those Fighting Irish coaching legends. For many years, Lou Holtz has been considered among the greatest speaking legends in America today. He speaks on overcoming seemingly impossible challenges by setting your own goals and working to achieve them.

DANIEL KLAUER, DDS
Host
DENTIST

Dr. Klauer specializes in the treatment of Craniofacial Pain, TMD, and Sleep Disordered Breathing. His passion is to help patient overcome chronic pain, sleepless nights, and other medical problem by addressing the root causes of these conditions, not just the symptoms.

STEVEN OLMOS, DDS
DENTIST

Dr. Olmos specializes in the research and treatment of craniofacial pain, temporomandibular disorder (TMD), and sleep-disordered breathing. He is known for developing and teaching treatment protocols from an assimilation of his knowledge base which is reflected by his certifications in all philosophies of treatment both medical and dental.
