## Welcome to Wonder Theory!

Hi, I'm Ashley Strickland, Space and Science writer at CNN. Thanks for signing up for CNN's Wonder Theory newsletter. Every Saturday, we'll explore the most fascinating science news and breakthroughs from the comfort of your inbox.

During my time at CNN, I've covered pioneering space missions, ancient wonders and compelling research. Science is simultaneously the most wondrous part of our lives, and also the most basic. Discoveries redefining both our past and our future are revealed weekly -- and we're exploring the cosmos like never before, unlocking the secrets of the universe one at a time.

The Covid-19 pandemic may have cast a long shadow, but scientific and celestial findings have continued to provide that spark of hope we all need.

While you wait for your first newsletter to arrive, check out some of our most recent [Space and Science news](#) coverage. We'd also love to hear from you. If you have any questions, feedback or anything else, drop us an email at [sciencenewsletter@cnn.com](mailto:sciencenewsletter@cnn.com).

See you Saturday!

Ashley

P.S. To make sure you don't miss a newsletter, add us to your address book.  
If you use Gmail, drop this email into your Primary tab.

P.P.S. To easily manage your newsletter subscriptions, set up your **CNN**  
**account.**
