HOTTEST BRITISH SUMMER

CONFIRMED ONCE AGAIN

& Just As We Said It Would...

CONFIRMED! ✓

- ✓ Our projections from late June and early July called this before anywhere else (we knew what July and August had in store) ...
- ✓ ... and then repeatedly repeated it throughout the remainder of July and August in many dated postings ...
- ✓ and prior to the big July heatwave and hot summer indicators from as early as late February 2026.

HOT!

HOTTEST BRITISH SUMMER ON RECORD FOR 2026!

Please feel free to check these publicly dated posts ahead of anywhere else worldwide for yourself:

Hottest British Summer Confirmed Once Again & Just As We Said It Would...

Well, everyone,

The hottest British summer for 2026 has been confirmed and is doing the rounds for a good several days as of now (long enough for others to self congratulate each other falsely on it with NO proof whatsoever)...

However, our projections from late June and early July and prior to the release of the mid-summer statistics called this before anywhere else (we knew what July and August had in store) and then repeatedly repeated it throughout the remainder of July and August in many dated postings and prior to the big July heatwave and hot summer indicators from as early as late February 2026.

Please feel free to check these publicly dated posts ahead of anywhere else worldwide for yourself:
