

EXACTAWEATHER

HIGH PRESSURE & OCTOBER SUNSHINE PROSPECTS INTENSIFY FURTHER + ANY CHANGES TO STORMY WEATHER/WINTRY BLAST EXPECTATIONS . . .

- ✓ High pressure building influence
- ✓ Drier and sunnier conditions
- ✓ More sunshine for many
- ✓ Temperatures above average at times
- ✓ Extending into the upcoming weekend
- ✓ Potential for even stronger high pressure later

DRIER, BRIGHTER & WARMER AT TIMES

BUT STILL SOME POTENTIAL FOR STORMY WEATHER!

POSSIBLE WINTRY CONDITIONS AROUND 20TH OCTOBER

ONE OF TWO POTENTIALLY STORMY OR NAMED STORM DATES COVERED IN OUR MORE MODERATE TO LONG RANGE/SEASONAL FORECASTS

Enjoy the October Sunshine!

WE'LL BE KEEPING A CLOSE EYE ON ANY CHANGES AND REVIEWING THE CHARTS AGAIN AROUND MIDWEEK FOR AN UPDATE . . .

STAY TUNED!

High Pressure & October Sunshine Prospects Intensify Further + Any Changes To Stormy Weather/Wintry Blast Expectations . . .

The expected high pressure influenced weather and the drier and sunny conditions that we covered for the upcoming week and working week below are now showing signs of extending and even intensifying into the upcoming and next weekend from more recent GFS and ECM computer model runs.

<https://www.facebook.com/share/p/1Jd1dxR6Ux/>

However, some of the more recent runs still also include some potentially stormy and cooler weather conditions with the possibility of wintry conditions for on and around 20th October and for the exact same dates covered in the same update in the above and below on this on our part and is also something we think the models will return to for these same or similar dates over the coming days.

<https://www.facebook.com/share/p/1Jd1dxR6Ux/>

Additionally, these are also one of the TWO potentially stormy or named storm dates that we cover for these same periods and dates (mid to late October) in all our more moderate to long range/seasonal weather forecasts.

<https://exactaweather.com/uk-long-range-weather>

I'll try and keep an eye out for these changes and review the charts again for an update around midweek to see where we are then . . .

Kind regards,

James Madden, Exacta Weather
