Brief Profile

Started career in the financial industry with several institutions over a course of 20 years in investment and asset management. Managed branches in Taiwan, Hong Kong and Korea with a total staff strength of 120.

Moved on to property and asset management covering the GCC. Acquired, developed and managed workers' dormitories in Dubai, Qatar and Singapore. Subsequently divested asset in Singapore housing 6,000 foreign workers.

Founded Hamilton Labs under Hamilton Holdings Pte Ltd in 2017 focusing on 3D printing in the built environment. Started initiative in India 3D printing concrete toilet units and cubicles. Multiple collaborations with IHLs, architects and industry 3D construction printing, 3DCP, practitioners in Singapore, India, Thailand and the US in product design and materials calibration and development.

Over COVID-19 pandemic, diversified further into multi-disciplined 3DP in the built environment by exploring other 3DP materials like the metals, and high-performance composites. Secured "design & build" work streams in India for G+1 houses.

As part of our CSR efforts, founded Better Life Foundation to improve and save lives by addressing sanitation and affordable housing needs.

Committed to innovating collaboratively for the future of 3D printing and industrial additive manufacturing in the built environment.
