

2022

COVID-19 PRECAUTIONS, REQUIREMENTS & RESTRICTIONS

We have been away from each other for two years. Can you believe it? It's true and way too long! As we prepare to gather and travel again, there are safety precautions we need to have in place. Please read the standard precautions, requirements & restrictions below very carefully. We anticipate a great travel experience for all!

PLEASE READ CAREFULLY

Vaccination Card:

For our International tours, you may be asked to show a PCR vaccination card before you travel and upon entry into each country. You may also be asked to provide a COVID Vaccination QR Code. Many countries have lifted having to show a negative test result before entering their country. And the United States have lifted having to take an Antigen test to return to the US. We do not speak for non-CST tour events that you may encounter during your stay. Refer to each tour requirements provided by our agency.

For our domestic US Tours, you may also be asked to show a vaccination card. However, we do not speak for non-CST related events that you may encounter during your stay.

Travel Insurance with Medical Coverage”

It is now mandatory for you to provide a Travel Protection Insurance Policy before traveling internationally. Your policy must also have a medical coverage... the amount will be determined per country.

Masks:

Masks will be required for all inside events where it is made mandatory. For outside events, masks are not mandatory unless an establishment says so. If you position yourself next to patrons who are not wearing masks, please DO NOT request that their masks be worn. Address it with the group coordinator or guide.

Personal Space:

For our inside events, please keep the recommended 6 feet or more distance. For our outside tours there is enough space to practice social distancing. Please be mindful and respectful of people's personal space.

Covid Test:

For our International Tours, you may be asked to show a negative COVID Test result with a PR Code 72 hours prior to entering said country.

As a safety precaution for domestic US Tour events, we recommend that you take a Covid-19 Test before attending the event. Follow the CST Terms & Conditions and "Know-B-4-U-GO!"

Hygiene:

During our tour days, CST will have sanitizers available in the event you left yours behind. We ask that you come well prepared with your own! Please practice hand hygiene.

Social Distancing:

If you can't stay at least 6 feet apart from people who don't live with you, you may want to wear your mask at all times.

Each Tour:

Will have its own customized precautions, requirements & restrictions.
