

**SIMPLE, EFFECTIVE,
AND 100% NATURAL**

- Encourages production of collagen
- Treats acne scarring
- Rejuvenates skin
- Removes fine wrinkles and tightens loose skin
- Minimally invasive
- Downtime of less than 24 hours
- Improves skin texture and tone
- No chemicals or additives

FAQ

WHAT IS PLATELET RICH FIBRIN (PRF)?

PRF is the most technologically advanced, safest, and effective treatment for skin rejuvenation and hair loss available today. By introducing your body's own platelets back into the face and scalp, it invigorates and strengthens the existing tissues to effectively and naturally regenerate lost tissues due to aging without the use of added chemicals or by-products.

HOW LONG DOES THE PROCEDURE LAST?

The entire procedure takes between 15-30 minutes. Ask your doctor if you have questions.

IS THE PROCEDURE PAINFUL?

The procedure is virtually painless and relies on a simple blood draw as utilized in everyday blood labs.

HOW DOES BIO-PRF® REJUVENATE THE SKIN?

When tissues are required to heal, they need certain proteins and growth factors that stimulate healing. These are naturally found in the human body. The Bio-PRF® method produces up to 6-8 times more regenerative cells when compared to whole blood. That means more growth factors, more ways to fight infections, and reduced post-op pain using what is naturally found in the body.

Patient's Guide

Platelet Rich Fibrin (PRF)

| Wrinkle removal, increase collagen production, acne scarring reduction, skin tightening

The cornerstone therapy within CARE Esthetics® focuses on natural healing properties found within the body.

Platelet Rich Fibrin (PRF) is a technology that uses your body's own natural and powerful healing proteins and concentrated growth factors found within blood to rejuvenate skin, treat hair loss and speed recovery. With a simple blood draw, a concentration of natural growth factors in your own blood can be collected and used to stimulate and treat your skin. The protocols established to produce platelet rich fibrin in its most concentrated format (C-PRF®) were actually developed by lead researchers at CARE Esthetics®.

Following the various spin cycles, PRF injections and microneedling may then be utilized to infuse facial tissues and hair follicles with regenerative growth factors and cells that stimulate, repair and rejuvenate damaged areas within the body. Since no additives are used, it forms a "super" blood clot with significantly elevated concentrations of regenerative cells and growth factors capable of stimulating healing.

advanced and natural treatment 

USE YOUR OWN BODY'S POWERFUL REJUVENATING PROTEINS.

NO ARTIFICIAL COMPONENTS.

100% Natural

Facial Rejuvenation

Treatments

- Eliminate forehead wrinkles and eyebrow furrows
- Stimulate hair growth
- Erase crow's feet
- Rejuvenate and fill undereye hollows
- Restore volume in cheeks
- Soften nasolabial folds
- Fill in smoker's lines
- Soften marionette Lines
- Volumize and plump lips
- Improve and define chin and jawline
- Improve other body areas, hands, arms

The most advanced, safest, and effective treatment for skin rejuvenation and hair loss available today 

PRF IS 3X MORE EFFECTIVE THAN PRP

You may have heard of platelet rich plasma (PRP), a first generation platelet concentrate. One of the downsides of this procedure was that additional use of the anti-coagulants (chemical additives) prevents clotting and thereby diminishes the full potential benefits of platelet concentrates. Recent studies have shown that PRF is up to 3 times more effective than its previous PRP formulations.

CENTER for ADVANCED REJUVENATION & ESTHETICS®

NORMAL ARTIFICIAL PROCEDURES	BIO-PRF® NATURAL PROCEDURES
Typically utilize either dead human cadaver products or animal tissues	Is completely natural and 100% safe
Fairly expensive to procure 'leading' biomaterials	Safe, easy and convenient way to obtain a virtually painless blood sample
Often require expensive chemicals and additives	Is 100% natural, entirely holistic, and chemical free
Has healing properties that vary depending on the human tissue donor or animal species	Is entirely centered around your own body's regenerative properties
