

# DAILY CAT CARE

## FEEDING BASICS

Start with high-quality kitten or adult cat food based on your cat's age. Choose a feeding spot that feels safe and consistent. Avoid overfeeding and give occasional healthy treats.

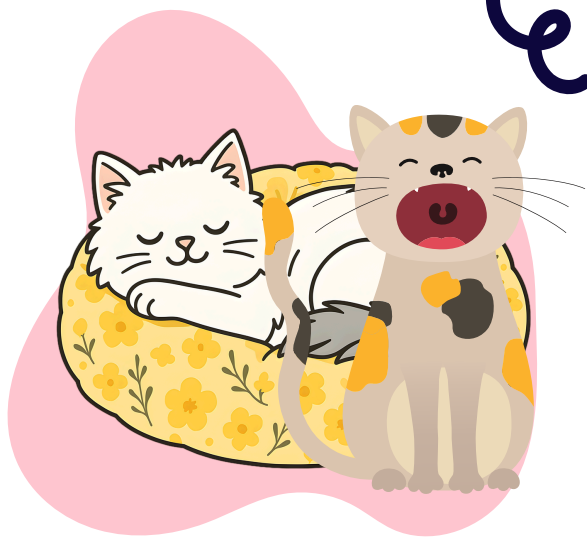

## FRESH WATER ACCESS

Keep water bowls clean and full at all times.

Try a pet fountain to encourage drinking, especially for indoor cats. Place water in quiet, low-traffic areas.

## LITTER BOX 101

Scoop daily and clean weekly. Start with a low-sided box for kittens and place it in a quiet, private spot. Use unscented litter and track your cat's habits.

## SAFE SLEEPING SPACE

Cats love quiet, warm spots to rest. Set up a soft bed or blanket in a calm area where they feel safe. Avoid placing it near noisy appliances or heavy foot traffic. Bonus: let them choose their favorite nap zone!

## BONDING & TRUST

Give your cat time to adjust. Sit near them, speak gently, and let them come to you. Play, petting, and routine build trust — and that's the foundation of everything.
