Welcome

Whether you love or hate using your CMMS, turning it into a high-performing, profitable tool means making it your go-to facility software - an integral part of your daily operations.

That's why we created the CMMS Performance Academy, a one-of-a-kind program designed to help you unlock its full potential.

Inside, you'll gain access to the very best of our proven training curriculum, refined over 20 years, to transform the way you use your CMMS. No fluff, no distractions - just everything you need to streamline administrative tasks, break free from constant fire-fighting, and significantly grow your operating budget without sacrificing your time, peace of mind, or freedom.

What you will learn in the Academy

We want to help you learn new methods and procedures in all areas of CMMS integration, to overcome almost any challenge that comes your way.

THE KEY TAKEAWAYS FOR THE PROGRAMS

- ✓ How you use your CMMS directly impacts your facility department's performance and financial outcomes.
- ✓ Discover how small, strategic changes can lead to significant financial returns.
- ✓ Learn how to break free from the cycle of constant stress and firefighting in daily facility operations.
- ✓ Embrace the mindset that there's always a solution to every challenge.

My Story

ACADEMY@COMPASSAFM.COM

WHY I CREATED THE ACADEMY

After nearly 20 years working with hundreds of facility teams, I noticed many weren't seeing financial or operational gains from their CMMS investments.

When designing the CMMS Performance Academy, I recognized the need for practical, easy-to-implement solutions—not expensive, time-consuming consulting.

My goal is to deliver actionable, real-world microlearning to help you optimize your CMMS. The CMMS Performance Academy offers fast, implementation-ready lessons designed to drive facility department growth and improve CMMS usage every fortnight.

Dominic Murnane

COMPASSAFM.COM

Program Choice

Advisory

Ideal for facility teams that want to learn at their own pace.

This is a just in time model which means that you know at a set date every single fortnight a new video training module and optimisation tip will be uploaded so you can focus your learning on these and begin implementing these within your department.

Accelerator

This is the next step for those who want expedited results from optimising their CMMS without working through all the modules in the Performance Academy Advisory themselves.

This is a 16 week bespoke programme based on the findings of both a CMMS and Operational Analysis.

Manager

When a facilities department team is constantly "fire-fighting" unable to cope with reducing budgets or its performance has simply plateaued..

Now is a good time to reinvent your facility department.

Facility Managers, it's time to say goodbye to 80-hour work weeks and adopt a normal work and family lifestyle

CMMS Performance Advisory

WHAT YOU WILL LEARN

There are four components to the Performance Academy Advisory.

Each fortnight a new element (30 in total) will be delivered to your Google Drive data room. These will consist of a video tutorial on how to exactly generate one type of budget savings with step by step proven procedures that I have used over the last 20 years. There is also a .PDF version of the tutorial.

A detailed optimisation tip on cost, time or knowledge on how to better optimise the use of your CMMS.

You're also going to have a Live Q&A each and every month on Zoom where you can ask questions collaborate with your peers and get those little sticking points on stock to keep moving forward.

Finally, we know that community matters and accountability is key so we have our own private Facebook group where everyone can discuss results and issues with their peers, post questions and much more.

CMMS Performance Accelerator

This is the next step for those who want expedited results from optimising their CMMS without working through all the modules in the Performance Academy themselves.

Over 16 weeks we work directly with you generating a bespoke programme based on the findings of both a CMMS and Operational Analysis.

In as little as 4 weeks you will see changes that will greatly improve the effectiveness and efficiency of your facilities department as well as how to potentially identify savings of up to €1 million in your facilities expenditure.

For more details visit - <https://compassafm.com/cmms-pa-accelerator>

CMMS Performance Manager

There is a famous saying “The definition of insanity is doing the same thing over and over again and expecting a different result.” So, perhaps the solution is to seek change and take a new and creative approach.

If you and your facilities team are constantly "fire-fighting" unable to cope with reducing budgets, you have a costly and ineffective CMMS or your departments performance has simply plateaued...

Now could be a good time to reinvent your facility department.
