Situation	Sewer Back Up Coverage	Water Protection
Water enters thru sewer, sump or septic tank.	Included	Included
Sewage enters thru sewer, sump or septic tank.	Included	Included
Severe rain storm causes surface water to enter home.	Not Included	Included
Lake or river overflows, causing flood water to enter your home.	Not Included	Included
Sewage or water enters home thru sewer, sump or septic tank at the same time as surface water, flood or ground water, which comes in thru window or doors.	Not Included	Included

Coverage Takes into Effect When...

Flood – rising of, the breaking out or overflow of any inland body of water

Ground Water – sudden and accidental of water thru the rising of the water table. It's the saturation of ground water after an event.

Surface Water – sudden and accidental entrance of water that enters your dwelling after an event.

Sewer Back Up – Water or Sewer form sewer, septic, sump pit or drain.

Why Should You Consider This Coverage?

- ❖ Changing weather patterns means more severe damage and higher costs to repair
- ❖ Climate change, aging housing, catastrophic weather events and seasonal changes – these are all reasons why water damage is now the #1 Contributor to claim in our province today.
- ❖ Our Water protection program offers comprehensive water damage coverage, to the vase majority of qualifying policyholders.
