

Electronic Visit Verification (EVV) for Service Codes of S5125, S5126, T1019, and T1020 Option Selection Form

****If you have one of the above codes or may have one of the above codes you MUST fill out this form****

Wisconsin Department of Health Services (DHS) requires EVV for all services that have the service code of S5125, S5126, T1019, and T1020 (no matter if there is a modifier with it).

If you have one of the service codes listed, you will need to choose an EVV option and submit the information needed below. If your worker is a live-in (permanently resides in the same residence) then that worker is exempt or does not have to use EVV.

EVV does not take the place of a time sheet for payroll, it is in addition to the time sheet and both must be used to be paid correctly. Soft launch for EVV starts 11/2/2020, which means that EVV is to be used as of 11/2/2020.

Please read the options below for EVV and discuss with your worker(s) which option works. If you have more than 1 worker and need more than one option, please indicate that on the back side of this form.

- Mobile phone application (mobile visit verification [MVV]): This option allows the worker to record visits using a smart phone or tablet, even when no cellular, satellite, or other data services are available at the service location.
- Landline phone (telephonic visit verification [TVV]): This option allows the worker to record visits via a landline phone at the service location/member's home using a toll-free phone number.
- EVV digital device (fixed visit verification [FVV]): This option allows the worker to record visits with a small electronic device. The device, which is secured to a surface in the member or participant's home, provides a code that links the time and date the services are provided to the client and service location. The visit information then needs to be submitted by the worker(s) via a phone to the Sandata program. *FVV is the option of last resort and may only be requested if certain criteria are met.*

A valid email address for each of your workers is required for EVV by DHS. We will need this information and on the other side of this document there is a place for you to indicate the email address of your worker and we also will be asking your worker for the same information.

You are able to go to our website www.lkichoice.com or DHS's website at <https://www.dhs.wisconsin.gov/evv/index.htm> for additional information on EVV.

Please fill out the information on the back of this sheet and turn in with the rest of your packet.
