

William Burt Centre Car Park Receives Essential Resurfacing to Enhance Community Amenities

West Winch Parish Council are, pleased to announce the successful completion of a comprehensive resurfacing project for the William Burt Centre car park. This initiative aims to enhance local amenities and improve the overall parking experience for residents and visitors alike.

The resurfacing of the car park, which began on 6th of November, was conducted in response to community feedback regarding the need for improved parking facilities. The project involved the removal of old asphalt, repair of underlying surfaces, and application of high-quality, durable materials designed to withstand heavy use. The new surface not only enhances the aesthetic appeal of the area but also ensures safety and accessibility for all users.

This project was supported with a Community Infrastructure Levy (CiL) grant from BCKLWN. These grants are provided, via successful application, to groups and organisations, looking to deliver infrastructure to benefit the residents and businesses within the borough.

“Investing in our local area is vital for our community's growth and accessibility,” said Councillor Gavin Ball. “This resurfacing project reflects our commitment to improving local amenities and providing a safe, convenient space for parking. We appreciate the patience of our residents during this process and believe they will find the improvements well worth the wait.”

The newly resurfaced car park will provide enhanced parking options for local businesses, local groups, and residents, encouraging more foot traffic and supporting the economic vitality of the area. With clear markings and increased durability, visitors can expect a safer and more efficient parking experience.

This project underscores the Parish Council's dedication to enhancing community amenities and ensuring that local infrastructure meets the evolving needs of residents. As we continue to invest in our community, we encourage feedback from residents to identify future projects and improvements.
