

Rockpaw Inspections and Assessments, LLC. Environmental Qualification and Data Sheet

Rockpaw Inspections and Assessments, LLC (Rockpaw I&A) is a small business providing home inspection and environmental consulting services to a variety of clientele. Newly established in March 2019 with operations officially open to outside clients in January 2020, Rockpaw I&A services are based on several years of experience in both inspecting and assessing the conditions, hazards, and efficiencies of public and privately owned buildings ranging from hospitals, military and scientific installations, colleges, and private homeowners. Our mission is to provide the best-available, technically and scientifically accurate, and regulatory compliant inspections, assessments, environmental media sampling and laboratory analytical review, and audits to the citizens of Colorado and the governing agencies that serve and support them.

Environmental Investigations, Characterization, and Reporting Services:

Services include environmental site characterization and assessments, hazardous materials surveys (asbestos/lead surveys), radon measurements, mold sampling and identification, indoor air quality analysis, Phase I and II Environmental Site Assessments (ESA), stormwater protection design (SWMP Preparer), RCRA Closure action and reporting support, environmental fate and human health risk assessments, environmental media (air/water/soil) sample collection and reporting, permit application and renewals (state air permits, NPDES, etc.), audits of environmental programs and operations.

Qualification Statement

Mr. Kevin Baugh, CES, is the sole owner/operator of Rockpaw I&A and has a vast experience in environmental science and reporting, building system operations and design, and project management. Mr. Baugh has excelled in the environmental consulting industry working with several different clients with various environmental consultation needs. Services include Phase I ESAs for commercial/private clients, providing limited environmental assessments of specific environmental concerns for the Sacramento Office of Veteran Affairs, and conducting project oversight of a RCRA Closure Plan development project for the U.S. Corps of Engineers. One of more exciting experiences includes conducting a Phase II ESA at McMurdo Station, Ross Island, Antarctica, which included the sampling of Antarctic soils and performing asbestos and lead inspection and verifications in +100 onsite buildings.

Current Rockpaw I&A Projects

- Subcontract to B&B Environmental Safety, Inc. for Environmental Safety Consulting at Clean Harbors Deer Trail with Adams County, CO
- Subcontract to B&B Environmental Safety, Inc. for universal waste collection with VA Northern California Hospital Systems (VANCHS)
- Home inspections with various environmental services available for private and residential customers.
