## ~ Osito - Canine

### Osito

My dog, Osito had very severe itching all over his body, with no rashes, hot spots or fleas visible. His constant scratching was driving me crazy, not to mention how uncomfortable he must have been. I had heard so much about the many uses of Rio's Relief Oil, I decided to give it a try. I started adding a few drops to his food, twice a day, and within a few days the itching was reduced, and now, three weeks later, is almost completely gone. It truly IS a relief!

At Sue Balla's suggestion, I have also been putting a few drops of the oil on the bottoms of my feet at night, and the top of my left foot which aches a lot. The aching goes away almost immediately. I walk a lot, and I can certainly tell the difference in the reduced soreness in my feet. I am sure I will be finding many more uses for this exceptional herbal product. I love it!

## ~ Harley - Canine

~I couldn't be happier with the results I have experienced from **Rios Relief Oil and Balm**. When my dog Harley was a puppy, he loved to chase tennis balls. I lived in the city and we had a lot of concrete parks. Throughout the years, my little guy had broken all his **canine teeth** while either playing at the dog park or going for the tennis ball on concrete. The vet had advised a few years later that we pull the four canine's out because they were not healing back over and starting to cause him pain. This is when I met Sue. Sue told me all about **Rios Relief Oil** and what the possibilities were. I said, hey why not, the last thing I wanted to do was to put Harley through that pain of having his four canines' removed. With three to four drops of oil in each meal, his teeth cleared up in 4 weeks! His energy level is through the "ruff!" I never realized how much pain he was in until **he was pain free**. Thank you BT naturals, not only did you **save Harleys teeth**, the other benefits that we don't even know are happening, are prolonging his life.

## ~ Toby & Scout - Canines

~I use **Rio's Relief Balm** on my dogs, who are both getting towards the older side. Toby, the big dog, gets it on his **hips to help with the stiffness** there. Scout, the little dog, gets it rubbed on the top and bottom of his back feet and legs to help with **stiffness in his back legs**. They love it; twice a day, morning and evening, they come to me to get their balm, and I see them getting around better than before I used it on them.

## ~ Dog Rescue Uses

~I have a holistic **Dog Rescue, "Finally Home Holistic Recovery and Adoption"** ([www.petfinder.com/shelters/il447](http://www.petfinder.com/shelters/il447)) and I have used the **Rio's Relief Balm** in a variety of ways.

1. To relieve a dog of hundreds of **tick bites**.
2. To relieve a **Lab's back when he could no longer walk** well.
3. To relieve a dog when her sister had to be put down.
4. To relieve a dog when he was **afraid of thunder**.
5. To help with **arthritis**

I have 3 Pugs and their **noses get all nasty and dry** just from being pushed in. I have used the Balm on them and their noses are soft and pliable again. **I give out a small Rio's Relief Oil with every dog that is adopted through the rescue.** I think your product is good in just about any scenario. My husband and I use it also.

Thank you for your product!!!!!!!

~ Lynn C.

## ~ Gus Canine

I wanted to say how pleased I was with the Rios Balm and oil. My beloved black Labrador was only four years old when he developed **Cranial Cruciate Ligament Rupture** in both legs at the same time. We have no idea how this even happened. The immediate remedy was surgery. After the surgery we did water therapy for about a year which did seem to ease the discomfort but it was also a very expensive inconvenience. We also tried several medications, but never saw any real improvement and were nonetheless disappointed. We were told by our vet that "Gus" would be prone to **arthritis** and he would always have the limp, of course made worse when it was cold, and we know it gets cold, it can be freeeeeeezing in Chicago. In speaking with Sue she suggested I try the balm and oil, and I immediately thought it couldn't hurt since it was holistic and had no chemicals in it. I started putting two drops on his cookies twice a day. The **Balm** was a little more difficult because his legs hurt, but after a few minutes of getting a massage he realized that he enjoyed it and it felt soothing. He realized not only was he getting extra mommy and me time but also that it felt good. I noticed a difference within a couple of days. He was able to go on longer walks and get on his favorite chair with less difficulty. He wasn't a "couch potato" anymore. It was wonderful to see him be able to play with his two brothers again. The chasing and the wrestling was wonderful to see. Although they were much younger he was able to keep up! I would definitely recommend this product to people whose animals suffer from any type of discomfort. It works and I liked that it was **all natural!!** More than anything I knew my baby was much more comfortable, it always pained me to physically see he was hurting at all. We love our animals, they are our family, and they give us more than we could ever give them and make us better people.

## ~ Bella Canine

~ When we rescued Bella four years ago she was very sick. She had Lyme disease. The vet told us she would need surgery for **hip dysplasia**. Along with that she had injured her leg and had **chronic ear infections**. Surgery was not an option. It was possible Surgery would not work and her life would be filled with more pain. So I looked for an alternative. That's when I found herbal supplements. Trying to fight with your Dog every single day to give them pills is very frustrating. There was such a positive dramatic change in her health though it was worth it. Her ear infections all the sudden went away. Her leg healed. There was no limping. X rays revealed her hip dysplasia was gone! We could not believe it. Were they wrong? As time went on I had my own injury and life got crazy. Giving medication daily got hard. I noticed Bella was limping more and not as active. Then her ear infections came back. The vet asked me what changed. Only one thing had. She was not getting the herbal supplements. At the same time I found **Rio's Relief Balm and Oil**. I immediately started Bella on it. A few drops in her food. Then some on her back leg that she injured. **It was simple! Right away she started moving better, her energy level came back and her ears cleared up.** It's been six months. No ear infections, the vet has even said she has lost some weight which is what he has been wanting! Her **coat is even looking better!** He even asked if I have been brushing her teeth because he noticed that the **tarter is even going away.** I had my doubts before if Bella would be able to finish her training for Search and Rescue work. The vet has cleared her for that, agility and no restrictions at all. I could not be more pleased! Now I'm trying to keep up with her! I am going to start giving it to my cat next!
