~ The Birth of the Balm

Rio’s Relief Balm and Oil were created with love to help my beautiful horse Rio with his severe arthritis. I had adopted Rio through the holistic horse rescue I was running at the time. He was 14 when I adopted him and now he was 18. His arthritis and past injuries had taken their toll on him and sadly I was on the verge of helping him cross over. The balm and oil changed everything!! Within a week he went from barely able to walk to trotting around the field with his herd buddies! To me - it was a miracle! After seeing his great results, we started using it on all the horses at the rescue and all the volunteers wanted to use it for their health issues. So was the “Birth of the Balm”. That was in 2011. Rio made it 10 more years to the age of 28 before he crossed the rainbow bridge in 2021. Thanks to the balm and oil I was blessed to have him in my life for 10 more wonderful years. ~ Jake - Equine

Jake - Arthritis and Melanoma Tumors

I have had Jake for 18 years. He is a 24 year old grey quarter horse. In 2001, Jake was diagnosed with **Melanoma** when tumors started showing up all over his body which is common in grey horses. The vet said then that Jake had about a year to live before they would become so uncomfortable that he may need to be put down.

Well Jake defied the odds as he is still here. About four months ago Jake started slowing down dramatically as the tumors were growing so large. The tumor under his armpit was the size of half a cantaloupe. We started putting the **Rio's Relief Balm** on his coronet bands daily to help keep him comfortable which it definitely did. About two months ago he started slowing down again. We decided to give him a half dose of Banamine daily to keep him comfortable - which is not good for them long term.

The owner of the barn had been giving her horse the **Rio's Relief Oil** in his food daily to help with the **arthritis** which had helped tremendously so I decided to try giving it to Jake also. I figured it was all natural - no chemicals - and certainly wouldn't hurt him. Two weeks after giving Jake 20 drops of the oil in his food morning and night we took him off the Banamine and he continued to be comfortable. He has continued to feel better and better. Instead of barely being able to walk around the pasture he is now acting like a 10 year old again. He is happy, healthy and back to running and playing in the field.

To my amazement and that of the barn owner, other boarders and the vet – the tumors are shrinking – yes shrinking!!! The vet has even recommended it to her other client that has a grey horse with tumors as nothing else has helped. For Jake – the **Rio's Relief Oil** is a miracle worker. ~ Paula

~ Cricket and Susie Equines

We are so happy Chicklet and Susie are feeling great! "My Farrier suggested Rio's Relief Oil for my 21-year-old horse, Chicklet, who was getting arthritis very badly in her left knee. She didn't even want to walk around the stall! I called the vet out who said that there was nothing they could do for her and that I was probably going to have to put her down very soon. The Farrier came and we had a really hard time trimming her and she was even on Butte at the time (which she hated with a passion!) We managed to get her hooves trimmed but the good leg had to get rasped on the ground because she couldn't stand any longer on the bad knee. The Farrier had some wonderful treats from Purina so I bought some and put the Rio's Relief Oil on the treats and gave them to her and her 27-year-old stall partner, Susie. I gave the oil twice a day on treats and she was getting noticeably better and was walking around and even going outside to eat grass. Eight weeks later the Farrier came again and we decided to do Chicklet first because she would be the hardest one. (My other mare, Susie, is fantastic about getting trimmed but has to have the back legs done low.) After being on the Rio's Relief and Halo's Healing Oil for eight weeks, Chicklet not only stood on the bad leg the whole time her good leg was trimmed, she also didn't have to lean against me. We had her done in no time at all with zero problems! My older mare Susie didn't have to be done down low either this time. I didn't say anything to remind the Farrier because she wasn't pulling the back legs away from her and put them on the stand with no problem! The only thing that I did differently was giving them Rio's and Halo's Oil. There wasn't anything else that I really did. I am a fan of natural ingredients in my horse's food and my food and the dog's food. I wish Veterinarians would listen to people that tell them this stuff works. All the working horses out there that do reining and cutting and barrel racing, etc. would benefit from these products and that is a fact. I have been around horses most of my life and I believe some of the horses I have had or have known would have lived a lot longer on these products." ~ Robin S, Seneca, IL

~ Velvet Pony

Foundered

~I have had Velvet for 14 years. She is a 26 year old beautiful black pony. Velvet had **foundered** slightly many years ago. Over the years she has been sore and lame at times. In November of 2012, Velvet was very lame - mostly laying down or “parked out” due to pain. I had the vet out and he x-rayed her and determined she has a **16% rotation** of the coffin bone in her front hooves. He said there wasn’t much else we could do but try to keep her comfortable on bute. Long term on bute has negative side effects so I looked for another option. The next day we started putting the **Rio’s Relief Balm** on her coronet bands (right above the hooves) daily. Within two weeks she was no longer laying down due to soreness.

By late January 2013 Velvet was completely sound!! She was getting depressed as she was in a small dirt paddock by herself to heal. Foundered ponies are never supposed to have grass. I decided that we should start putting her out in the grass pastures with her buddies again. If she had to be miserable living by herself - or take a chance on having her out on grass (January grass is pretty dead) and happy - I chose happy for her. Well we continued to keep her on the grass even when spring came along as she was still completely sound and much to our surprise - she has stayed sound.

In April 2013 the vet came out to float her teeth and re-check her feet. The vet took xrays again and she still has **16% rotation**. He was stunned as she was **completely sound** and all her fat pads from **metabolic syndrome were gone**. He said we had gotten all the inflammation out of her body. We kept her on grass all summer with all her friends. She did slow down some days and was cut back to half days on grass for part of the summer.

She is still to this day out with her friends and completely sound and HAPPY. This winter we switched to giving her the **Rio’s Relief Oil** in her feed as trying to put balm on her coronet bands in the freezing cold was impossible. Velvet has been getting five drops in her food morning and night. Velvet is a miracle pony and had defied every odd there is!!! Thank you **Rio’s Relief Balm and Oil!!!!**

~ Tori - Equine

Tori - Cushings and Ringbone

~I started using **Rio’s Relief Balm and Oil** on my 27 year old advanced level 3-day event partner whom I bred and raised. Tori has **cushings and ringbone**. Sue prepared a special custom bottle of **Rio’s Relief Oil** for Tori. After a month, there is significant change in his soundness and energy. His ringbone appears to be going away - the area is much smoother. He is more playful and basically I have my old friend back. He’s enjoying his retirement. This amazing blend of organic herbs and oils ‘specifically blended’ is nothing short of a miracle. I am so grateful for my wonderful friend and this amazing product. Thank you! Seeing what this does for a 27 year old horse – I wish I would have had it when I was competing. I can just imagine what it would do for an athlete!!

~ Vicki Rauwolf, USEF Eventing Judge and TD
