

# TESTIMONIAL for Rescued Kota's Eye Infection:

Meet Kota. He came to Casey's Safe Haven Holistic Horse Rescue with another pony - Comanche. When he arrived, as you can see at the left below photo, he had an infection in his right eye. Casey's does not have a quarantine area on the property, so we had to immediately attend to his infection. We turned him outside and made him a bran mash with Rio's Relief Oil. For his evening meal, we put approximately 40 drops into his food and 20 drops into Comanche's food and the pony in the adjoining stall. Rio's Relief Oil has tremendous immunity booster properties and felt we needed to be pro-active for Kota and the other barn ponies and horses. On Day Two, Kota's infection had completely cleared up! (See right photo below.) We are so thrilled for Kota who is doing fine. He has picked up weight and lives happily with Comanche and Charlie at a foster home.
