

Canadian fabric and quilt designer **Libs Elliott** (www.LibsElliott.com) is scheduled to visit Winnipeg April 26 to 28, 2019. She will present a trunk show on Friday, April 26 and six-hour workshops on Saturday and Sunday.

Saturday, April 27: The Weight of Love. This pattern is made up of hex, half-hex and equilateral triangle pieces and was designed randomly using processing code. You'll spend the day making the Weight of Love your very own by customizing it with your selection of solids and prints, and building it using the Y-seam piecing method.

Sunday, April 29: Embrace the Chaos - An Exercise in Controlled Randomness
Using only paper and pencils, Libs will walk students through a series of worksheet exercises that mimic the programming language she uses to generate her quilt patterns. By using controlled elements in a random way, each participant will end up with a unique quilt pattern layout. Students will piece designs using provided block-building instructions. At the end of the class, each participant will leave with their own random geometric quilt design and will have the knowledge required to complete the project at home.
