

Corona Ngatuvai

Corona Ngatuvai is the chief technical architect for the Utah Department of Technology Services (DTS). Corona was introduced to public service through the Utah Department of Health (DOH), where he implemented networks for health departments in central and southern Utah. He also facilitated the centralization/optimization of IT services within DOH before joining DTS in 2006. Once at DTS, Corona led Utah's migration to the cloud. Since then he has been instrumental in the development and implementation of numerous enterprise initiatives.
