

Mindscape
Media

Profile

We are a group of creatives specialising in providing video services and other media. Since starting in 2012, Mindscape Media has made a number of corporate videos and documentaries for government agencies, nonprofit organisations, and private companies.

Our team is also highly equipped when it comes to skills needed in post-production - editing, color grading, graphics, sound mixing, etc. Below are links to our reel which showcases these specialties.

OUR PASSION

Shooting documentaries is one of our fortes. We have covered numerous stories from different projects & clients. We enjoy each narrative that we capture and hear, even more fulfilling as film makers to match these stories with our visual aesthetics.

Our most recent project is a 6-part video series commissioned by the Department of Tourism, showcasing Halal Culinary Tourism in Mindanao. We have been producing videos for DOT for the past 6 years now.

Media

dedication

Real estate is an area where we also want to put our ideas and expertise with as a production house. As previous freelancers who were based in Manila, we have worked with several production houses, advertising agencies, and producers for similar takes assigned to a specific task as part of the production team.

Given our background on the whole process on these types of materials, we are fortunate to have been recognized, and to have received collaborative opportunities from different clients locally. We look forward to be in partnership with your company soon.
