

Shellfish managers with the Washington Department of Fish and Wildlife (WDFW) announced tentative days of razor clam digs at four coastal beaches from Oct. 15 through Feb. 1. All beach openings are dependent on final approval of marine toxin testing, which usually occurs about a week or less prior to the start of each digging series. Below are the tentative dates, along with low tides and beaches.

- March 28, Friday, 6:29 p.m.;
- 0.0 feet; Long Beach, Twin Harbors, Copalis
- March 29, Saturday, 6:58 a.m.;
- 0.1 feet; Long Beach, Twin Harbors, Copalis
- March 30, Sunday, 7:43 a.m.;
- 0.8 feet; Long Beach, Twin Harbors, Mocrocks

MINUTES WITH THE MAYOR

Hello, Everyone,

The month of March has flown and April 1st is right around the corner, no fooling! I'm eager for upcoming better weather and spring flowers. Warmer temps are welcome encouragement for enjoying the outdoors and getting a little exercise and fresh air.

I'm looking forward to the commencing of our road projects this summer. More information to follow in future issues of The Pe Ell Sun.

The yard waste box has returned. The same rules still apply to using the box responsibly and wisely. Thank you.

Although we've turned the calendar page over to spring, it's still important to make sure your furry and feathered pets have adequate food and shelter. Please continue keeping storm drains cleared of debris. It's still imperative to use caution when driving on rain-slickened roads and don't forget to check on your neighbors and senior citizens in the community who may need extra assistance with transportation, errands, food, medications and appointments.

If you would like to receive EMS updates now or in the future, please sign up for Lewis County Alerts on the Lewis County Department of Emergency Management site at: <https://lewiscountywa.gov/departments/emergency-management>. This is especially helpful in keeping our citizens updated and informed on disruption in normal water service.

If you haven't already done so, check out the Town of Pe Ell web site at www.townofpeell.com.

Questions? I'm always a phone call away and my door is always open to talk. Looking forward to visiting in April.

Take care and God bless,

Mayor Lonnie

Step outside on Saturday, April 12, to witness April's full Pink Moon. This Paschal Moon marks the first full Moon of spring and is used to determine the date of Easter. This month also brings a micomoon.

For the best view of this stunning spring Moon, head to an open area and watch as it rises above the horizon. At this moment, it will appear larger than usual due to the Moon illusion and take on a beautiful golden hue!

The full Moon on April 12, 2025, occurs just before reaching apogee. Apogee refers to the point when the Moon is farthest from Earth. When the full Moon occurs near this point, it's classified as a "micromoon"—the opposite of a supermoon. Since this full Moon happens about 22 hours before apogee, it will appear slightly smaller and dimmer than usual.

While the name "Pink Moon" might suggest a rosy-colored Moon, the reality is a bit less magical. The name comes from the early spring bloom of a wildflower native to eastern North America: Phlox subulata, commonly known as creeping phlox or moss phlox. This flower, often called "moss pink," was in full bloom around April's full Moon.

Thanks to this seasonal connection, the April full Moon became known as the "Pink Moon!"

Hydrant Flushing

The Town of Pe Ell Water Department will begin its biannual hydrant-flushing program on April 14, 2025, to April 18, 2025. Flushing will occur between 8:00am and 3:00pm. These dates and times are approximate and are subject to change due to scheduling and/or weather conditions.

Customers may experience discolored water, low water pressure, or a disruption in water service during this time. Residents are urged to reduce water use and consumption during flushing periods. Please wait until the evening hours (after 4:00pm) to do laundry and please refrain from using bleach, as bleach enhances iron levels in the water and can cause discoloration in clothing. If you find that your water appears cloudy or discolored, open all cold-water faucets and wait until the water runs clear before using it.

What's happening?

The Town of Pe Ell is using fire hydrants to discharge a large volume of water from the water system.

Why flush fire hydrants?

- 1) To clean water lines
- 2) To ensure hydrants are working properly

By discharging a large volume of water through a fire hydrant, water flow within the pipeline is increased. This increased flow scours the inside of the pipeline, removing and then transporting silt, rust and mineral deposits out of the water system. In addition, this process provides the Town with the opportunity to assess the general condition of the hydrant.

Can I drink from the tap during hydrant flushing?

As water is flushed through water lines and out the hydrant, silt and mineral sediment can cause water to become discolored. Although the water may not be visually appealing, it is safe to drink and continues to meet all federal and state drinking water standards. There is no health hazard associated with the discolored water.

How long does hydrant flushing take?

Fire hydrant flushing typically takes 15 minutes to several hours, but discolored water may last up to 4 hours.

How does hydrant flushing affect me?

The main impact of hydrant flushing is discolored water. Here's what you should do if hydrant flushing is taking place in your neighborhood:

- If possible, avoid using water while the hydrant flushing is taking place. By not taking water from the tap or running appliances that use water (dishwashers and washing machines), you can prevent discolored water from entering your household plumbing altogether.
- Don't do laundry while hydrant flushing is taking place. The discolored water can sometimes stain fabrics. Wait until water runs clear at the tap before using your washing machine and wash a load of dark clothes first. Rust will stain light colored laundry. When hydrants near you are being tested, please be sure that both your cold and hot water are rust-free before you launder any whites. If such staining occurs, there is a remedy. Most grocery and hardware stores carry laundry aids which remove rust stains.
- If you encounter discolored water following hydrant flushing, run the cold-water taps throughout your home (bathroom sinks and tubs, kitchen faucets, etc.) for 5 to 10 minutes or until water clears. This allows discolored water to work its way out of your household plumbing. Better yet, collect it and use it to water your lawn or your plants. They don't mind a bit.
- If, after hydrant flushing, your water pressure or volume seems low, clean faucet screens to remove silt and mineral sediment that could be obstructing water flow.

For more information...

or if you experience water quality problems lasting more than four hours following hydrant flushing, contact Town Hall at 360-291-3543
