

EMP 48-1 Speed Pulse Converter

EMP48-1 has a 1/2 x 26BSC thread commonly used on norton wheel drives

Red is the 12 volt supply required by the sender.

With Smiths Motorcycle, Proled or Classic Speedometers connect to the green wire on the speedometer harness.

Black is - ground.

Should be connected directly to the earth wire from the speedo then to ground.

Yellow or White is the signal output from the sensor

It should be connected to the white/black wire on the Motorcycle, Classic, Proled or Mini Speedometer harness.
