

# TIPS FOR EYEBROW STICKERS

1. How to use the eyebrow stickers
2. How to remove the eyebrow stickers
3. Applying symmetrical eyebrows
4. Applying onto your own eyebrows

# 1. How to Use Eyebrow Sticker

Please use it before applying makeup by removing sedum.

**1**  
Prepare eyebrow stickers, scissors, cotton or tissue paper, water, and a soft eyebrow powder.

**2**  
Peel off the protective film from the cardboard with the eyebrows drawn on it.

**3**  
Cut around the very close edges of the part with the eyebrows drawn on it.

**4**  
Place the glossy surface onto your eyebrows. It can be adjusted and repositioned as many times as you like, as long as it is not wet.

**5**  
Wet the entire eyebrows with a wet towel, cotton, etc. The key is to gently presee it so that it does not shift.

**6**  
After waiting for about 10 seconds, slowly peel off the sheet.

**7**  
Gently press with a tissue to remove moisture and ensure adhesion.

**8**  
Apply a soft eyebrow powder on the top of the eyebrow stickers. Be careful not to apply near the edge of the stickers.

**Completed!**

Soft powder and cream eyebrow products are recommended. Be careful as hard powder products may not adhere well.

## 2. How to Remove Eyebrow Sticker

**Sellotape (Scotch-tape), facial cleansing oil, Vaseline etc. can be used to remove.**

**It is waterproof, so it won't come off even if you take a shower.**

**\*Note: it is difficult to remove with facial cleansing gel or cream.**

### 3. Applying Symmetrical Eyebrows

#### Tips for applying symmetrical eyebrows

Each sheet has an eyebrow shape printed on the back.

You can use it as a guide while looking in the mirror.

To get the best result, make sure both eyebrows are positioned symmetrically, taking into account the balance of your entire face.

## 4. Applying onto Your Own Eyebrow

### Applying onto your eyebrows

It can be customized your way to use.

You can use it by cutting it to your preferred size.

For example, if only the outer end of the eyebrow is sparse, it's recommended to cut the sticker in half and apply it.

Additionally, for those who have their own eyebrows, trimming them shorter makes it easier to blend and achieve a neater application.

\* It can adhere well to your skin and create a nicer look after shaving your eyebrows.
