

# How to Wear a Hairpiece / Topper

## Items to prepare

- Hairpiece or half wig (topper)
- Comb or brush
- Hair iron (hair straightener) or curling iron if necessary

Gently brush the hairpiece with light touch from the tips of the hair.

Open all the clips attached to the back side.

Place the hairpiece on the top of your head and move it gently to your desired position while making adjustments. Once it is in the right position, secure it with the clips.

Use a comb or brush to blend your natural hair with the hairpiece for a seamless look.

For styling, you can use a hairdryer or a hair straightener. (For the straightener, a temperature of 130-150°C for approximately 10 seconds works best!)

Now you look stunning!

## Please note:

- Setting the temperature too high or applying heat for too long can potentially damage the wig.
- Curls form when heat is applied for human natural hair, but for wigs, curls are created during the cooling process.
