

How To Wear Wig

Please check followings before putting on a wig.

- Put on a wig net or an inner cap.
- Lightly brush the wig from the ends and set it.
- Prior to wearing the wig, shake it to allow air in and loosen the strands for a cute look.
- If you wear the wig too shallowly, it may cause the top of your head to appear pointed or lead to shifting. Please ensure to securely wear it down to the nape of your neck.

Please adjust the size using the adjuster located on the backside of the wig.

Align the wig properly and put it on from the front. While holding it in place to prevent shifting, tuck the back of the wig into position.

Hold the temple areas with both hands and adjust the position. Lightly bend the temple wires inward to align with your face line.

To achieve greater stability, you can use pins to secure your natural hair, wig net, and wig in place.

Gently brush and style the wig starting from the ends of the hair.

Done!
