

## Unisys Proudly Sponsors ENIAC 75<sup>th</sup> Anniversary on February 15

### *Zoom webcast highlights industry-wide celebration of milestone in computing history*

**BLUE BELL, Pa., February 10, 2021** – Each year on February 15, the world celebrates [ENIAC Day](#), marking the 1946 deployment at the University of Pennsylvania of the first all-electronic, programmable computer. This year’s commemoration is special, marking the 75<sup>th</sup> anniversary of the ENIAC launch.

[Unisys Corporation](#) (NYSE: UIS) is a primary sponsor of ENIAC Day 2021. Unisys is the successor to Sperry UNIVAC, the company that traced its origins back to ENIAC inventors J. Presper Eckert and John Mauchly. After ENIAC, those two computing pioneers invented UNIVAC, the first commercial computer. Sperry Corporation and Burroughs Corporation merged to form Unisys in 1986.

In conjunction with other celebratory events hosted by co-sponsors such as the University of Pennsylvania and Compuseum, Unisys is hosting a pre-recorded [Zoom webcast](#) on February 15, beginning at 3:30 p.m. U.S. Eastern Time. The event will feature a contemporary look at the inception design, operation, and impact of ENIAC. It includes comments from distinguished panellists in a range of disciplines: science, history, STEM, women in computing, industry, academia and media.

“ENIAC exemplifies the innovation that has been a hallmark of Unisys technology from the beginning,” said [Jim Thompson](#), ClearPath Forward® Chief Technology Officer and Chief Engineer, Unisys. “We continue to build on that legacy by integrating a new generation of innovations such as cloud, 5G, machine learning and security into our solutions, empowering clients to face new and even unforeseen challenges and gain the competitive edge they have come to expect from Unisys.”

Thompson oversees the evolution of [ClearPath Forward®](#), Unisys' flagship enterprise computing technology – a lineal successor to Eckert and Mauchly's early inventions.
