

FX *airguns* MADE IN SWEDEN

RETAIL BOOK

07/05/26 MP

was looking for, he started a journey to create the airgun of his dreams. Two decades later, he has more than succeeded.

The highly skilled FX team (with Fredrik at its helm) has since its small beginnings, relentlessly introduced cutting edge technologies that has propelled the airgun industry into a new era where FX Airguns are globally considered an industry leader.

FX Airguns was founded by Fredrik Axelsson in the small picturesque town of Mariestad, Sweden in 1999. As a passionate airgun enthusiast, he was constantly in search of the best airgun available. When Fredrik didn't find what he

Impact M4 Black

IMPACT M4

The FX Impact is an airgun that over time has proven itself to be suited for just about any discipline, whether you're a professional benchrest shooter, hunter, or a regular all-around shooter. The platform offers the perfect setup for every occasion. The FX Impact has been taken first places and countless podium spots at all the major competitions around the world since its release. So, FX Airguns made it their mission to make the FX Impact M4 not only better in many different ways but also stronger and more ridged so you as a shooter can keep competing at the top and fighting for those wins!

Trigger

Introducing the FX QUICK SET TRIGGER! We all know that the trigger lays at the core and foundation of any great shot taken. Due to the multipurpose function of the Impact Platform, FX have created one trigger to suit every style and one that can easily and quickly be changed from a hunting to a match grade trigger in seconds.

Rigidity

To further enhance the performance and shooting experience FX have improved the overall rigidity of the FX Impact M4 by designing a new top plate that is much thicker and stronger bringing more rigidity throughout the entire platform.

Grip

In additions to the new QS Trigger unit and top rail, FX have also improved the overall feel and comfort of shooting the Impact. They have designed a new style grip that is more defined, comfortable to grip onto, with just the right amount of palm swell.

AMP regulator

The FX Impact M4 now comes standard with the new brass piston regulator that is stronger, has faster refresh rates, is more consistent and can easily handle the higher bottle pressures.

Scope rail

The new top plate also features a dovetail rail machined on to it enhancing the strength but at the same time bringing more flexibility when it comes to mounting your optics. The new scope rail that is longer than before can slide along that rail to get you that perfect mounting position and can be tightly secured in place with perfect alignment to the overall system!

LEOPARD

COMPOSITE - AIR TUBE

Leopard Composite Standard 600mm Air-Tube

Leopard Composite Compact 500mm Air-Tube

LEOPARD COMPOSITE - AIR TUBE

The FX Leopard Composite combines the performance and versatility of the original Leopard tube model with a reinforced composite stock, creating an ultra-lightweight bullpup that is rugged, reliable, and exceptionally maneuverable.

Like its siblings, the composite model derives its power and accuracy from an over-the-barrel air tube, which serves the dual purpose of maintaining constant pressure around the barrel while improving balance and reducing overall weight. For maximum versatility, the composite version includes a forend-mounted Picatinny rail and a generous optics rail capable of accommodating everything from full-length rifle scopes to the latest night-vision devices.

For added performance, the FAC models feature a 54cc plenum integrated into the stock. This enhancement increases the volume of regulated air and improves efficiency, resulting in greater power delivery and higher shot counts.

The new rotary magazine ensures smooth, effortless cycling and is designed to accept projectiles up to 13 mm in length, offering additional space for heavier slugs.

The FX Quick Tune System makes adjustments fast and intuitive, allowing you to fine-tune your setup with ease. Paired with the externally adjustable AMP MKII regulator, the Leopard provides exceptional versatility and control.

Additionally, the fully adjustable two-stage trigger delivers a crisp, clean break with every shot, enhancing both precision and consistency.

LEOPARD BOTTLE

Leopard Standard 600mm Bottle

LEOPARD BOTTLE

The FX Leopard bottle version incorporates a rigid over-the-barrel air system combined with a carbon fibre bottle, maximizing on board air for an exceptional shot count, providing extended shooting sessions and optimal performance for both low-power and high-power setups

Featuring a 20 MOA incline built directly into the scope rail and a picatinny accessory rail at the bottom, this version is the perfect companion for both long-range and benchrest shooters.

Plus a newly designed plenum, seamlessly integrated into the buttstock, providing 54CC of regulated air volume for FAC models.

The new rotary magazine ensures a smooth and effortless cycling experience and is designed to accommodate projectiles up to 13mm in length, offering extra space for heavier slugs to be used.

The FX quick tune system makes adjustments fast and intuitive, allowing you to fine-tune your setup with ease, paired with the externally adjustable Amp MKII regulator, the leopard offers unmatched versatility and control.

Additionally the fully adjustable two-stage trigger delivers a crisp, clean break with every shot, enhancing precision and consistency.

LEOPARD AIR TUBE

Leopard Standard 600mm Air-Tube

LEOPARD AIR TUBE

The FX Leopard tube version features a sleek, highly manoeuvrable design with an over-the-barrel air tube, maintaining a rigid barrel assembly in a compact, lightweight platform. the integrated forend rail system allows for maximum versatility, offering countless mounting points for accessories with a full-length arca rail and M-Lok slots. The perfect hunting and all-round platform.

Featuring a 20 MOA incline built directly into the scope rail and a picatinny accessory rail at the bottom, this version is the perfect companion for both long-range and benchrest shooters.

Plus a newly designed plenum, seamlessly integrated into the buttstock, providing 54CC of regulated air volume for the FAC models.

The new rotary magazine ensures a smooth and effortless cycling experience and is designed to accommodate projectiles up to 13mm in length, offering extra space for heavier slugs to be used.

The FX quick tune system makes adjustments fast and intuitive, allowing you to fine-tune your setup with ease, paired with the externally adjustable Amp MKII regulator, the leopard offers unmatched versatility and control.

Additionally the fully adjustable two-stage trigger delivers a crisp, clean break with every shot, enhancing precision and consistency.

PANTHERA MKII

BOTTLE

Panthera MKII 700mm Bottle

Panthera MKII 500mm Bottle

FX PANTHERA MKII

The best slug-shooting target rifle from FX Airguns just got even better with the introduction of the FX Panthera MKII.

An evolution of the much-loved Panthera, the MKII pushes the boundaries of the innovative Dynamic action block and further refines one of the finest target rifles FX has ever produced. With enhanced rigidity, improved ergonomics, and a host of performance-driven upgrades, this latest edition delivers next-level precision for serious competitive shooters.

- Improved Rail system for enhanced rigidity
- 30 MOA Optics rail
- Full Length ARCA Rail (except hunter)
- M-Lok mounting system (except hunter)
- Quick Set Trigger (one trigger 3 settings)
- Improved Ergonomics
- High Power Short Impulse Valve
- Fully Adjustable Stock
- Ability to add discrete internal forend weights.

FX PANTHERA

The FX Panthera is unlike any rifle FX Airguns has made before. It is a dedicated slug rifle, purpose-built with precision competition in mind, and complete with airgun innovation that continues the FX Airguns tradition of pushing the boundaries of airgun performance.

The Panthera includes technology that is a generational leap-forward for an airgun. It begins with the new Dynamic Block, a new breech block designed from the ground up for performance slug shooting. The Dynamic Block utilizes a compact one-piece valve. This High-Power / Short-Impulse Valve is extremely efficient while allowing an immense and precise flow of air.

The plenum feeding the Panthera is revolutionary and the first of its kind. The Dynamic Plenum is an over-the-barrel plenum which provides a consistent regulated pressurized plenum around the barrel, adding incredible stiffness to the barrel as well as allowing multiple plenum lengths to be employed to match the calibre and power of the rifle.

The results of the Dynamic Breech & Plenum are extraordinary! Testing has yielded constant 10 shot strings with standard deviations in the low 1.0–2.0 range with extreme spreads as low as 3-4.

The Panthera stock is designed for competition. It features a 14.75" long Arca rail complete with M-LOK sections and a barricade block nestled next to the breech. Achieve an ideal balance point by adding external M-LOK compatible weights or internal FX Barrel Weights that attach under the shroud. The Panthera further fits the shooter using a fully adjustable buttstock and an adjustable cheekpiece that is also ambidextrous.

PANTHERA HUNTER COMPACT BOTTLE

FX PANTHERA HUNTER COMPACT

The Panthera Hunter Compact includes technology that is a generational leap-forward, designed in a lightweight and compact body for the modern shooter.

The plenum feeding the Panthera is revolutionary and the first of its kind. The Dynamic Plenum is an over-the-barrel plenum which provides a consistent regulated pressurized plenum around the barrel, adding incredible stiffness and power to the rifle.

The Panthera Hunter Compact now features a carbon fibre 300cc bottle in the front, plus you can now double up through the pressurised stock with a additional double air adapter kit and bottle. The Panthera Hunter Compact further fits the shooter using a fully adjustable buttstock and an adjustable cheekpiece that is also ambidextrous. Finished off with dual 45° angled manometers on the left side of the block - displaying bottle pressure and regulated plenum pressure, a quick tune system and a 6 MIL / 20 MOA picatinny rail.

SPECIFICATIONS

Cocking system	Right hand positioned sidelever with an ambidextrous mount
Magazine type	Removable high capacity 22 shot when Cal .177 18 shot when Cal .22 16 shot when Cal .25 13 shot when Cal .30

Dynamic MKII 500mm Bottle

FX DYNAMIC MKII

Possibly the most versatile rifle ever produced by FX Airguns has just been raised to an entirely new level. Building on the success of the Dynamic—originally developed as the hunting counterpart to the acclaimed Panthera—this latest iteration introduces a series of upgrades designed to expand its capabilities and elevate the overall shooting experience.

With increased rigidity, tighter tolerances, and a host of performance-driven refinements, the latest version delivers enhanced consistency and next-level precision in the field.

- Improved Rail system for enhanced rigidity
- 30 MOA Optics rail
- Full Length ARCA Rail
- M-Lok mounting system
- Quick Set Trigger (one trigger 3 settings)
- High Power Short Impulse Valve
- High Volume Air Bottle
- Optional - Add Internal Forend Weights

DYNAMIC BENCHMARK BOTTLE

Dynamic Benchmark 700mm Bottle

FX DYNAMIC BENCHMARK

Built to meet the demands of modern benchrest competition, the Benchmark builds on the proven success of the Dynamic Block to deliver a rifle capable of performing at the highest level. Key enhancements include a rigid front rest interface, a forward-mounted air bottle, a match-grade trigger, and a traditional benchrest-shaped butt stock, which also allows the addition of weights. The result is a superbly balanced rifle designed to fit conventional benchrest supports while promoting straight, linear recoil movement ensuring consistent, repeatable performance shot after shot.

DYNAMIC BOTTLE

Dynamic Express

Dynamic VP

FX DYNAMIC

The power, innovation, and performance of the Panthera – but geared for hunting.

The FX Dynamic is a pneumatic rifle built for more than competition. It's a rifle that wants to hunt. Harnessing technology at the forefront of airgun performance, the Dynamic brings higher air capacity and configurations than its competition focused sister rifle, the FX Panthera.

The Dynamic also includes a .35 caliber option that will allow up to 200 ft lbs of energy while maintaining world-class FX accuracy and precision.

This purpose-built slug rifle utilizes its namesake breech block. The Dynamic block has a one-piece, compact, short-impulse/high-power balanced valve which is both extremely efficient while also allowing a tremendous and precise amount of air with each shot. Tuned properly the rifle will achieve low single digit standard deviations, one of just many advantages the FX Dynamic offers.

The block is fed by the cutting-edge Over-The-Barrel Power Plenum, a design only found with FX. This allows multiple plenum lengths to be employed to match the caliber and power of the rifle. This plenum also applies consistent regulated pressure to strengthen barrel rigidity.

FX DYNAMIC COMPACT TAKEDOWN

The FX Dynamic Compact Takedown is a pneumatic rifle built for more than competition. It's a rifle that wants to hunt. Harnessing technology at the forefront of airgun performance, the Dynamic brings higher air capacity and configurations than its competition focused sister rifle, the FX Panthera.

This purpose-built slug rifle utilizes its namesake breech block. The Dynamic block has a one-piece, compact, short-impulse/high-power balanced valve which is both extremely efficient while also allowing a tremendous and precise amount of air with each shot. Tuned properly the rifle will achieve low single digit standard deviations, one of just many advantages the FX Dynamic offers.

The block is fed by the cutting-edge Over-The-Barrel Power Plenum, a design only found with FX. This plenum also applies consistent regulated pressure to strengthen barrel rigidity.

This air rifle has dual 45° angled manometers and a Quick Tune System. It is finished off with a compact arca rail for easy transportation as well as a convenient padded carry case.

*UK only edition.

KING BOTTLE

King GRS 500mm Nordic Wolf

KING

The King strives to keep pushing boundaries, this pneumatic rifle range is built for hunting. Think Crown MKII crossed with the Dynamic. Dual regulators provide greater performance and consistency as well as a Quick Tune System. The Over-The-Barrel Power Plenum allows for multiple plenum lengths to be employed to match the calibre and power of the rifle whilst the adjustable stocks provides innovation.

Available in a selection of Norwegian GRS stocks and now a synthetic option, offering unsurpassed shooting comfort making the King stand-out among the rest.

The King is an awesome pellets shooter without a doubt but where it really excels is shooting slugs thanks to its slug based design. It also includes a .35 calibre option with world-class FX accuracy and precision.

DREAMLINE LITE CYLINDER

Dreamline Lite Compact

Dreamline Lite Compact
Carbon Fibre Bottle

DREAMLINE LITE

The FX Dreamline Lite is a newly styled, ultra-lightweight air rifle that stands apart from previous FX models, weighing just 5½ pounds while offering the highest level of customization in the Dreamline lineup. The compact version delivers full Dreamline performance and features in an exceptionally small package, making it ideal for backpack carry or spontaneous hunting trips. The Dreamline Lite Bottle enhances this versatility by adding air capacity, with a choice between a 480cc bottle for extended shot count or a shorter 300cc carbon fiber bottle to maintain a compact form, and comes equipped with a lightweight folding stock for easy transport on long hunts.

DREAMLINE LITE COMPACT

CARBON FIBRE BOTTLE

Dreamline Lite Compact Carbon Fibre Bottle

DREAMLINE LITE COMPACT BOTTLE

One of the latest additions to the FX range, the Lite Compact Bottle takes the Dreamline concept and makes it lighter, shorter and even more versatile. A 300cc bottle ups the air capacity from the full size cylinder version whilst the overall length is reduced. These changes make the new Dreamline faster to handle and lighter to carry, perfect for hunting or target shooting without a rest.

Dreamline Tactical Compact

DREAMLINE TACTICAL

The Dreamline Tactical brings AR options like the mil-spec receiver tube, full picatinny scope rail, and more... to the airgunner who would like to add common AR parts and options to their airgun. The compact version provides an ultra-compact, high performance airgun without removing any of the features of the standard Dreamline. Perfect for throwing in a backpack or having ready for that spur of the moment hunting opportunity.

The Dreamline Tactical version comes **without** rear stock and buffer tube so that the user can personalize the gun according to their own taste.

DREAMLINE TACTICAL BOTTLE

A bottle version of the acclaimed Dreamline Tactical model this edition doubles the air capacity of its cylinder equivalent yet still manages to keep the weight down. As with the other tactical models this Dreamline accepts AR options like the mil-spec receiver tube, full picatinny scope rail, along with many more. The compact version provides an ultra-compact, high performance airgun with an impressive 300cc carbon fibre bottle, great for hunting in the field.

The Dreamline Tactical version comes **without** rear stock and buffer tube so that the user can personalize the gun according to their own taste.

CROWN MKII

BOTTLE

Crown MKII Standard Plus Synthetic

CROWN MKII

The FX Crown MKII brings more power and even more capabilities to an already near perfect platform.

The increased power available in the MKII comes down to a combination of valving, porting, and plenum space. Other changes to the Crown include a 20 MOA angle built into the picatinny scope rail. With airgunners able to shoot at longer distances, this canting of the scope base at the front is what allows for more usable elevation adjustment in the scope at longer distances.

The FX Crown MKII has some new options, including the GRS Crown stock featuring tool-less adjustments, a broad for-end and a ergonomic GRS grip, offset and angled, offering unsurpassed shooting comfort.

The FX Crown MKII Saber Tactical ambidextrous chassis is packed with features including an extended Arca Swiss rail, foldable stock, built-in detachable bag rider, adjustable buttstock, and other popular features.

WILDCAT MKIII CYLINDER

Wildcat MKIII Compact

Wildcat MKIII Sniper

Model Shown with optional Picatinny Rail
Picatinny Rail Supplied at a Surcharge.

WILDCAT MKIII

The FX Wildcat is a part of airgun royalty. A rifle that was compact before compact became a buzzword in airguns. A perfectly balanced and ergonomically designed bullpup that defined the generation of bullpups that have followed in its footsteps.

The latest edition takes the legendary platform and pushes the boundaries further than before. Users are now treated to more power, more shots per fill and the ability to tune the gun like never before with FX's popular hammer spring adjuster, added to work alongside the AMP regulator. Other improvements include larger magazines and the all new FX Smooth Twist X Superior liner for improved accuracy.

WILDCAT MKIII BT

BOTTLE

**NOW WITH DUAL REGULATORS
AND QUICK TUNE SYSTEM**

POWER PLENUM FAC MODEL ONLY

All FAC Wildcat MKIII BT are now supplied with the 89cc Power Plenum an upgrade that can create nearly double the power of the rifle when used with certain ammo. The plenum also increases the guns shot count thanks to its unique design.

WILDCAT MKIII BT

Introducing the new and vastly improved FX Wildcat MkIII BT, featuring increased shot count and enhanced power, courtesy of the massive 89cc Power Plenum fitted on the FAC models, nestled in the stock of the Wildcat.

Taming this massive power center and refining accuracy, is accomplished using dual FX AMP Regulators. Both regulators are externally adjustable and the rear power adjuster makes dialing in the right power easy to adjust for shifting hunting situations. Available in three configurations The Compact is fitted with a 300cc carbon fiber bottle and 500mm barrel, The Sniper with a 580cc carbon fiber bottle and 700mm barrel, VP with a 400cc aluminum bottle and 600mm barrel.

FX BARREL LINERS

BARREL LINERS

FX barrel liners are essentially an inner barrel that fits inside the main STX Barrel. These liners are designed to fine tune the performance of the FX Air Rifle when using certain ammunition.

STX SUPERIOR LINER

With the advent of the new hybrid slugs and advanced pellet technologies, FX have developed a new kind of liner. This superior liner provides the best possible accuracy, whether you are using Slugs, Hybrid Slugs or top quality pellets - accuracy is guaranteed. This liner can be retrofitted to all STX equipped models.

CHRONOGRAPHS

FX TRUE BALLISTIC CHRONOGRAPH

The FX True Ballistic Chronograph is the perfect tool to know how your firearms are performing as this device is compatible with both air rifles and rifles - not just FX specific items.

Coming in at a similar size to an A4 piece of paper and built with a Dopler Radar system, it can measure speeds between 400 and 4000 FPS. This chronograph can provide data on both velocity and muzzle energy as it has an integrated BC calculator. The device charges via a lithium battery with USC-C charging port and uses wirelss to connect to smartphone apps for viewing stats and graphs.

Specification:

- Radar tech works rain or shine
- Large LCD screen
- Indicates subsonic yardage
- Velocity Range: 400 - 4000 fps
- Power Source: Lithium battery powered with USB-C charging port

CHRONOGRAPHS CONTINUED

FX POCKET CHRONOGRAPH DI

Compared to its predecessors the first clear difference features the built in display that shows real-time information on velocities without the need for additional displays or a smartphone. Partnering the built-in screen, the small form factor of the device makes for an easy to use, compact device capable of a wide range of mounting options. Featuring advanced radar technology the D1 Chronograph is able to deliver accurate velocity readings for any projectile travelling between 400-1200FPS in any lighting, weather condition and even in darkness. This makes it perfect for those tuning for performance on any airgun, rimfire even for archery.

Specification: Size: 43 x 48 x 52mm / Weight: 2.71 oz / Interface: Bluetooth / Smart App: iOS & Android /App Name: FX Radar / Measurement Tech: Doppler Radar / Velocity Range: 91-381 m/s (200-1250 FPS) / Power Source: Internal USB-C rechargeable battery

CHRONOGRAPH DISPLAY

Whether shooting in a competition, tuning an airgun, or just keeping a watchful eye on the speed your airgun is performing at, the new FX Chronograph Display is a must-have accessory. This digital display will sync to the FX Radar Chronograph. It provides an instant feedback velocity reading, without the need to look away from your scope – the FX Chronograph Display can be mounted either under the scope on the FX Impact or on the side accessory rail of other rifles using a picatinny adapter.

HYBRID SLUGS

Hybrid Slugs are the perfect blend of pellet and slug. • Higher ballistic coefficient • Lighter weight
• Greater expansion • Can be shot accurately out of most PCP rifles with no modifications.

CROWN MKII

CROWN MKII

The FX Crown MKII brings more power and even more capabilities to an already near perfect platform.

The increased power available in the MKII comes down to a combination of valving, porting, and plenum space. Other changes to the Crown include a 20 MOA angle built into the picatinny scope rail. With airgunners able to shoot at longer distances, this canting of the scope base at the front is what allows for more usable elevation adjustment in the scope at longer distances.

The GRS Crown stock featuring tool-less adjustments, a broad fore-end and an ergonomic GRS grip, offset and angled, offering unsurpassed shooting comfort.

IMPACT MKII

Every so often there are leaps forward in technology that forever change our perception of what is possible. The FX Impact is such a phenomenon and has permanently pushed forward the boundaries of what to expect from an air rifle.

This all-in-one air rifle has been engineered to satisfy the most demanding airgun shooter with its high-performance features. The Impact is completely adjustable: air valve control, hammer spring tension, and even regular adjustments can be made externally to allow for various shooting scenarios.

DREAMLINE CLASSIC CYLINDER

DREAMLINE CLASSIC

The FX Dreamline Classic is the natural evolution of the FX Streamline. FX has taken the proven Streamline platform and added world class features that take it to the next level; bridging the gap to rifles such as the FX Crown and FX Impact.

Like all Dreamlines the Classic features the STX barrel system; this gives the Dreamline the unique ability of changing both the calibre of the gun as well as the inner liner of the barrel to allow for different twist rates and other bore specifications. This provides a tailored barrel to meet the vast array of projectiles available today.

DREAMLINE CLASSIC

CYLINDER / BOTTLE VERSIONS

DREAMLINE BULLPUP

The Dreamline Bullpup takes the same Dreamline internals of the other models but fits it into a bullpup configuration to shorten the overall length. Whilst retaining all the adjustability and still utilizing the high capacity magazine of the standard Dreamlines.

Like all Dreamlines the Classic features the STX barrel system; this gives the Dreamline the unique ability of changing both the calibre of the gun as well as the inner liner of the barrel to allow for different twist rates and other bore specifications. This provides a tailored barrel to meet the vast array of projectiles available today.

DREAMLINE TACTICAL BOTTLE

DREAMLINE TACTICAL BOTTLE

A bottle version of the acclaimed Dreamline Tactical model this edition doubles the air capacity of its cylinder equivalent yet still manages to keep the weight down. As with the other tactical models this Dreamline accepts AR options like the mil-spec receiver tube, full picatinny scope rail, along with many more. The compact version provides an ultra-compact, high performance airgun with an impressive 300cc carbon fibre bottle, great for hunting in the field.

The Dreamline Tactical version comes **without** rear stock and buffer tube so that the user can personalize the gun according to their own taste.

FX WILDCAT MKII

The Wildcat MKII is a pre-charged pneumatic (PCP) air rifle. It uses a bullpup design, meaning the action and air cylinder are located behind the trigger giving a more compact overall rifle for a given barrel length.

It features one of FX's signature systems: an internal air regulator, ensuring consistent shots throughout the air supply, and interchangeable barrel liners (the "Smooth Twist X" barrel system) that allow different twist rates and calibres via barrel-liner swaps.

SPECIFICATIONS

Cocking system	Sidelever
Magazine type	8 Shot in Cal 4.5 (.177)
Stock	Laminate Black Pepper

WILDCAT MKIII BT

Introducing the new and vastly improved FX Wildcat MkIII BT, featuring increased shot count and enhanced power, courtesy of the massive 89cc Power Plenum fitted on the FAC models, nestled in the stock of the Wildcat.

Taming this massive power center and refining accuracy, is accomplished using dual

FX AMP Regulators. Both regulators are externally adjustable and the rear power adjuster makes dialing in the right power easy to adjust for shifting hunting situations.

KING GRS BOTTLE

FX KING

The King strives to keep pushing boundaries, this pneumatic rifle range is built for hunting. Think Crown MKII crossed with the Dynamic. Dual regulators provide greater performance and consistency as well as a Quick Tune System. The Over-The-Barrel Power Plenum allows for multiple plenum lengths to be employed to match the calibre and power of the rifle whilst the adjustable stocks provides innovation.

Available in a Norwegian GRS stock, offering unsurpassed shooting comfort making the King stand-out among the rest.

T12 CYLINDER

T12

A lightweight rifle with few moving parts that settles for many years of trouble free shooting. It has a spring tensioned removable magazine and is made in anodized aluminum. All stocks are ambidextrous/equal on both sides to suit most shooters.

Cocking and reloading is achieved through a traditional bolt action design, whilst an adjustable match grade trigger provides crisp accurate trigger pulls for maximum accuracy.

SPECIFICATIONS

FX MAVERICK

The FX Maverick is a brand-new platform for FX Airguns. A rifle purpose built from the ground up with heavier pellet and slug shooting in mind. The Maverick features the largest power plenum yet on an FX rifle with the latest FX innovation, dual regulators!

The Dual FX AMP Regulators is brilliant in its concept and execution. The first regulator pre-reduces the pressure in preparation for the second regulator. This provides less stress on the second regulator and achieves a more constant output pressure with less standard deviations. Both AMP Regulators can be adjusted externally and should be adjusted in harmony with each other (maintaining a 30-40 BAR difference between the 1st & 2nd regulator).
