Fleas

We have found live fleas and/or flea eggs on your dog today but don't worry we can solve the problem by applying a flea shampoo treatment; this will remove live fleas. The cost to treat your dog's fleas is £15, this also includes a salon treatment so that we can help stop the spread.

To minimise the risk of reinfestation, we recommended treating the house including your dog's bed whilst they're with us by using flea sprays or foggers.

Before we apply the treatment please let us know if your dog is under 12 weeks of age, lactating, sick or convalescing, has broken or damaged skin, or has recently been treated for fleas.

Although we do not anticipate any issues, this treatment shampoo may cause redness or irritation to your dog's skin (this treatment contains Pyrethrins 0.0475% w/w, Piperonyl butoxide 0.49% w/w)

I understand that Minnie's Dog Grooming cannot be held responsible for redness or skin irritation that may occur when applying a flea treatment shampoo and I would like Minnie's Dog Grooming to proceed.
