

Evaluate the Evidence

Be Informed

Put it in Writing #1

These questions that stem from information contained in the NNU Constitution¹.

Dues Questions:

January 1, 2012 through June 30, 2012. Effective July 1, 2012 and annually on July 1 of each year thereafter, the maximum amount (cap) of regular direct member dues shall increase based on the average wage increase in the preceding calendar year at the three (3) NNU-directly represented or NNU Affiliate-represented facilities with the highest RN base rate wages.

- Does this mean the maximum amount I would have to pay for dues can change and be based off states with higher costs of living?
- Can NNU promise, in writing, dues will never be higher than the 2.2x's hourly rate?

The dues amount will be the same for full-time and part-time collective bargaining members.

- So I pay the same dues per month if I am working 20 hours a week as my co-workers that work 36 or 40?

Special Assessments:

A special assessment on all members for a finite period of time for lawful trade union purposes may be levied by the Convention.

- Does this mean, the union can actually charge union members fees in addition to dues if the union administrating body has a need for more money, even if it is not directly related to the collective bargaining agreement with my employer?
