

Evaluate the Evidence

Be Informed

Phantom of the Workplace

What is the NNU Hiding behind the Mask?

Why has it been so difficult to get NNU and their supporters to be completely transparent?

Has anyone seen a copy of the fees and assessment schedule that the NNU uses to discipline members that don't act a certain way?

Why do they continue to say they can "guarantee" you will absolutely never lose anything even after being shown proof that it can and does happen?

Why do they misrepresent legal definitions to mislead your thoughts?

Why do they imply that they have the ability to control the business plan of the hospital when that is simply not true?

We know the good and bad of Hopkins – NNU, it is time for you to take off the mask and show us all your scars and warts. Only then will nurses have all the information they need to make a fair choice.
