News for your

Comfort

A word from our owner >>>

Thank you for taking time to read our very first Newsletter!! The goal of this Newsletter is to serve our customers. We want to care for you and your HVAC systems by providing excellent service and the latest information from our industry. Please feel free to text or email us things you would like to learn more about from the HVAC industry and we will include the answer to these questions in future issues! You can email us at comfortcontrolsystems@gmail.com, call us 336-970-1223 (does not receive texts).

I want to take a moment to tell you a bit about myself. I have been happily married for 21 years to my beautiful wife Katie who is part owner in the business. Together we have four amazing children. I have been in the HVAC industry for 22 years and started Comfort Control Systems 12 years ago. I truly enjoy serving each of our customers and strive to be the best HVAC company in the area!

Money Saving Tips

An air conditioner will cool the air in your home fairly quickly. For economical operation, turn it on only when your home is occupied. You may consider installing a programmable thermostat. These allow you to set the time when the air conditioner will turn on, such as 30 minutes before you arrive home from work on a hot day. Contact us for Automatic and Programmable Thermostats. During the day, keep the drapes or blinds closed on windows that face east, south, and west. This will help reduce solar heat gain into your home.

Air Conditioner Efficiency

Each air conditioner has an energy-efficiency rating that lists how many Btu per hour are removed for each watt of power it draws. For room air conditioners, this efficiency rating is the Energy Efficiency Ratio, or EER. For central air conditioners, it is the Seasonal Energy Efficiency Ratio, or SEER. These ratings are posted on an Energy Guide Label, which must be conspicuously attached to all new air conditioners. Many air conditioner manufacturers are participants in the voluntary EnergyStar® labeling program. EnergyStar-labeled appliances mean that they have high EER and SEER ratings. In general, new air conditioners with higher

However, the higher initial cost of an energy-efficient model will be repaid to you several times during its life span. Your utility company may encourage the purchase of a more efficient air conditioner by rebating some or all of the price difference.

Buy the most efficient air conditioner you can afford, especially if you use (or think you will use) an air conditioner frequently and/or if your electricity rates are high.

“Even if your air conditioner is only 10 years old, you may save 20%-40% of your cooling energy costs by replacing it with a newer, more efficient model.”

Buying New Air Conditioners

Today’s best air conditioners use 30% to 50% less energy to produce the same amount of cooling as air conditioners made in the mid 1970s. Even if your air conditioner is only 10 years old, you may save 20% to 40% of your cooling energy costs by replacing it with a newer, more efficient model.

Your Guide to Preventive Maintenance

Believe it or not, preventative maintenance is arguably the #1 thing you can do to help extend the life of your HVAC System.

Your System

Imagine your HVAC system is like a car. In order for your car to function properly you know you will have to periodically change the oil. This helps your car to run properly and last longer. Face it, your car won't run without the proper amount of oil. Most people don't think about servicing their HVAC system regularly. If you don't then you should!

56 Point Inspection

We offer a 56 point inspection that will help your system run properly. This inspection also allows you to be proactive by having your system maintained by a professional at least 2 times a year.

This will also allow us to identify and repair any problems before they become "major" issues. Once our tech completes the 56 point inspection, you will receive a full report of their findings. From there you will decide what repairs if any need to be made. It truly is the best way to extend the life of your system!

Comfort Packages

We have developed 4 comfort packages for you to choose from. At minimum, each package offers our 56 point tune up twice a year, 10% off parts and labor on service visits, and many other discounts. What if you have 2 or 3 systems? No problem! We have packages for that too. Check out our website to see everything we offer. Go to www.comfortcontrolsystemsnc.com and click on *Our Services*, then choose *Preventative Maintenance* to see all of our packages.

Insider Tips >>>

Cleaning the Air in Your Home

Over the past couple of years most of us have become obsessed with cleanliness and killing every possible germ we come in contact with. No doubt this is completely understandable with the COVID Pandemic that has sauntered into all of our lives, albeit completely uninvited. As we venture into this "after COVID" time, I'd like to pose a question: How are you protecting your family from the air in your house? Some of us haven't even considered the effects of less than fresh air in our homes. Did you know that the air quality inside your home can be five times more polluted than the outdoor air? This is because most of us do not properly sanitize the air in our homes. Of course we have filters for our air conditioning units, some of us even have HEPA filters.

However, some bacteria, viruses, mold spores, and other toxins are too small to be filtered out. Yes not even the HEPA filters are able to thoroughly clean the air in your home. So what is the solution? We can help you with that! There are several products we offer that can clean the air in your home. This could help everyone in your house by protecting from the germs that float throughout your house. We offer solutions for every budget, from our UV lights, to the REME HALO, to our ionizer. Each of these items will properly sanitize the air you breathe while you are relaxing at home. Go ahead take a step closer to cleaner air and give us a call. I promise you will notice a difference!

Monthly Specials

*Welcome to the specials corner! Every month we will showcase a special for the month! It will include discounts on items to make your home more comfortable. Give us a call for more information. (336)970-1223- **only receives phone calls**. If you would like to text us the number is 336.490.5684- **only receives text messages**.*

With the official start of Spring, it is only fitting that our monthly special for May is:

A Discounted Tune Up for your AC system!!!

Take advantage of this special today so your system will be ready for the summer weather that will be here before you know it!
