The Hair-Raising Adventures of Jayms Blonde is hilarious, sexy, and definitely a joy to read, but I doubt if it will ever win any major awards. Jayms Blonde is a gorgeous gay guy who makes the bad guys pay. He is a hairdresser by trade and a secret agent by choice, a former U.S. Navy Seal who can use an Uzi as well as a teasing comb. With the aid of his faithful pedicurist Precious Needmoore, they lead an elite band of Pink Berets to save the world from bad hair and bad air. It just get wilder as you read along. The hair salon is at street level, and below this facility is the headquarters of STOP (Stop Terrorizing Our Planet), a secret environmental espionage agency created by Jayms and his fabulous celebrity clientele. Throw in the evil cartel ZENRON (Zealot Environmental Nazis Ruthlessly Obliterating Nature), and you have the basis for this new superhero to show what he is worth. It is outrageous, but it is fun to read. This is another hard-cover book, priced at \$24.94, published by iUniverse, Inc. of Lincoln, Nebraska, written by Robert W. Cabell, and available at your favorite bookstore.
