

Multi Room

MULTIELITE

Flexible and economical multi room comfort.

That's better. That's Actron.

ActronAir

ActronAir. Because Australia needs Australian air conditioning.

The year 1984 saw Advance Australia Fair become our National Anthem, the 1 dollar coin come into circulation and a small family air conditioning business open its doors. Today, ActronAir is a proud Australian company recognised for making world class air conditioners. Well, it stands to reason. The team at ActronAir experience the harsh Australian conditions first hand, and our climate places demands on air conditioning not found in other parts of the world.

And that's why ActronAir's engineers have developed the most advanced air conditioning systems specifically for the unique and harsh Australian environment.

Engineered with a superior operating range from -25°C to 50°C, and a host of innovative features, ActronAir's MultiElite multi split system is engineered to withstand the most extreme conditions Australia can throw at it.

Share the comfort with the MultiElite multi split system

A single wall split air conditioning unit is great for a single room, however, if you need multiple rooms air conditioned, then you need to consider the MultiElite multi split system.

The beauty of our MultiElite is that it allows up to five individual air conditioning heads to be installed throughout your home, office or retail space, using just the one outdoor unit.

**More than
a quarter of a
million Aussies
take comfort in
ActronAir**

A superior operating range suited for Australia

Most overseas air conditioners are only designed with a maximum temperature range of 43°C to 46°C. The MultiElite multi split system operates up to 50°C. Big deal? Well yes.

The temperature around the outdoor unit can reach far higher than what they're saying on the weather report due to direct sun or heat radiating off the ground. They're often located against a wall or fence where there's low air circulation.

“ Nothing beats performing under extremes. Engineered for Australia, you can trust ActronAir to be there when you need it most. ”

Mark 'Frosty' Winterbottom
V8 Supercars Champion & ActronAir Brand Ambassador

Celebrate differences

Different temperatures in different rooms

In a multiple room environment not everyone's preferred temperature is the same. Our MultiElite allows for different temperatures in different rooms at the same time.

Engineered with you in mind

Easy installation and commissioning

The MultiElite comes standard with a number of features to ensure installation is carried out with ease and accuracy. An additional service valve allows for quicker commissioning, while auto wiring correction eliminates any wiring errors, allowing your ActronAir installer to have you in superb comfort in a flash, saving time and money.

Choice and convenience

Capacity to suit your needs

The MultiElite has outdoor capacities ranging from 7.1kW to 13.5kW. The 7.1kW can connect up to 3 heads while the 13.5kW can connect up to 5 heads. These all connect to a single outdoor unit allowing for a better use of energy and space.

Here for the long haul

Protect your investment

ActronAir now uses gold fin epoxy coated protection on both indoor and outdoor coils as standard. This is to further reduce corrosion from the harsh Australian conditions, as well as assisting the defrosting process, thus improving heating efficiency.

MultiElite indoor unit options

Bulkhead

Serene Series 2 Wall Hung Split

Mini-Cassette

Pick up where you left off

Auto-restart

Blackout? No problem. MultiElite's auto-restart function means it restarts automatically in its last programmed setting once power is restored, which means you don't have to spend unnecessary time reprogramming your system.

Better control in your hand...

MultiElite's remote controllers; WRE2621 (not compatible with Serene Series 2) and RC-02 (not compatible with Bulkhead and Mini Cassette) features a large screen and buttons for more logical and legible daily use.

Remote controller

WRE2621

Remote controller

RC-02

- ❶ White backlight
- ❷ Large, easy to read display
- ❸ ON/OFF
- ❹ Mode
- ❺ Feature setting menu
- ❻ Option confirm
- ❼ Timer
- ❽ Fan mode

- ❾ Louvre control
- ❿ Boost mode
- ⓫ LED display ON/OFF
- ⓬ Sleep/Quiet mode
- ⓭ Follow Me
- ⓮ Clock
- ⓯ Turbo Mode

...and on the wall

For those who like a little more control, or who just keep losing the remote, MultiElite can also use a wall mounted wired controller that delivers precise temperature control.

Optional wired wall controller

- ❶ White backlight
- ❷ Large, easy to read display
- ❸ Timer
- ❹ Mode
- ❺ Simple, easy to read buttons
- ❻ ON/OFF
- ❼ Onboard sensor

WRE2621 remote controller is compatible with Bulkhead & Mini Cassette – RC-02 remote controller is only compatible with Serene Series 2. Some Serene Series 2.13 features not compatible with MultiElite, refer to features list for full details. Wired wall controller comes standard with Bulkhead indoor unit. Available as an optional upgrade for Serene Series 2 and Mini-Cassette indoor unit.

Better Comfort

Follow me for a more attuned temperature

In most air conditioners, the temperature sensor is in the indoor unit. With MultiElite, we have put additional sensors inside the remote controller and wired wall controller. With the remote controller, when you press the Follow Me button you'll have the temperature you want, wherever you are in the room. When it comes to the wired wall controller, you'll have more precise temperature control and comfort at its location.

One of the great things with MultiElite is that you can pre-set your favourite comfort levels. This means that you can simply select these settings with the touch of a button on your remote.

Shhh. Quiet mode in operation

For a good night's sleep, or if you simply seek silence, the MultiElite system has a quiet mode* that reduces indoor unit noise to a whisper-quiet level (between 20 and 30 decibels)†.

Set your comfort remotely

The optional EasyConnect upgrade allows you to control your Serene system wirelessly via your smart device. Cool your home down as you leave work or check you've turned off the air conditioning. It's all in the palm of your hand.

Better Engineered

AC vs DC for rockin' efficiency and performance

The MultiElite system uses ultra-energy-efficient DC, or direct current, inverter technology in its inverter compressor, indoor fans and outdoor fans. Some companies use less efficient AC technology, or combinations of both. This can make a significant difference to your electricity bill.

With an impressive 25 frequency stages, our inverter compressor is up to 35% more efficient than AC technology, while our upgraded DC outdoor fan with five speed settings is up to 40% more efficient. The result is improved efficiencies overall, as well as optimal cooling performance.

*Quiet mode available on Serene and Mini Cassette only. †Based on models up to 5kW.

35% MORE EFFICIENT THAN AC TECHNOLOGY

INDOOR & OUTDOOR FANS 40% MORE EFFICIENT

Better Choice

The answer's easier with multiple choice

When there's more than one room and more than one configuration to consider, the MultiElite simply provides more solutions to meet your needs.

Our MultiElite multi-split system allows you to run up to five indoor units through a single outdoor unit. That's smart, because it can save not only space, but also energy. And while its powerful enough to keep the whole home in air conditioned comfort, MultiElite's DC inverter can also ramp right down to power a single room. MultiElite also allows you to pick the best solution for specific rooms, whether it's a concealed bulkhead system, Mini-Cassette or the ever popular wall mounted systems.

With its choice of multiple indoor units, MultiElite also minimises those family fights over the thermostat, as you can have different temperatures in different rooms at the same time. Now that's better living!

Better Service

Local service you can count on

Our National Service Network has service staff on the ground and parts on the shelves. They're friendly, reliable and prompt. Furthermore, ActronAir's 5 year warranty will keep you comfortable with absolute peace of mind.

Foot Notes 1-9

- EER Rated = Energy Efficiency Ratio (Rated Capacity Cooling, Rated Input Power Cooling)
- COP Rated = Coefficient of Performance (Rated Capacity Heating, Rated Power Heating)
- Maximum FLA based on the following combination:
MRC-071AS-3 + BRE-026BS + BRE-035BS + BRE-052BS
MRC-100AS-4 + BRE-026BS (x3) + BRE-035BS
MRC-110AS-5 + BRE-026BS (x3) + BRE-035BS (x2)
MRC-135AS-5 + BRE-026BS + BRE-035BS (x3) + BRE-052BS
Each installation will require calculation of selected combination (Outdoor + Indoor/s) for correct Full Load Amps.
- Based on MEPS registered combination.
- Refer to AS/NZS 3000 'Australian/New Zealand Wiring Rules' for more details.

- Refer to Catalogue Unit Weight Distribution Guide section for details of weight points.
- Sound Pressure Level at 1m distance is determined as the measured sound pressure at 1m perpendicular to the coil side of the condenser.
- Determination of Sound Power Levels of Noise Sources, AS1217.2 - Precision Methods for Broad-Band Sources in Reverberation Rooms.
- When Demand Response capability option is chosen, the air conditioner will be fully compliant with AS4755.3 in the following modes: DRM 1, 2, 3

Important Notes:

- The Local Electricity Supply Authority may require limits on - starting current, running current and voltage drop, please check prior to purchase.
- When the outdoor temperature exceeds the rated conditions, the cooling/heating capacities may decrease the rated nett values.
- Specifications subject to change without notice.
